DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the *Bhadol* Crops of Bengal, 1913-14.

(NOTE.—On the average of the five years ending 1911-12 the area under autumn rice in Bengal represents some 5·8 per cent. of the total area under rice in British India.)

Character of the season.—In February and March the rainfall was above the average, but deficiency in April interfered with the sowings to some extent. In May the weather conditions were favourable for the growth of the various *bhadol* crops; but in June considerable damage was done to them by excessive rainfall and weeding operations were also impeded. In July conditions improved a little, but in August the unusually heavy floods in the Burdwan and Presidency Divisions, and in some Eastern Bengal districts, had a disastrous effect on the crops, especially on low lands. Fair weather generally prevailed in September and the crops recovered somewhat from the injury done by the floods. Damage by insect-pests was reported from parts of Dacca and Khulna.

Acreage.—The total area under the various *bhadoi* crops this year is 5,987,300 acres against 6,226,300 acres of last year, the normal area being 6,647,400 acres. Of these 4,882,100 acres are reported to be under *aus* rice against 5,008,000 acres of last year. The decrease is chiefly due to want of rain at sowing time, to excessive rain afterwards and to the extension of jute cultivation.

Outturn.—From appendix I attached to the report it will be seen that only Birbhum reports an average outturn. Rangpur, Pabna and Chittagong report a crop between 91 to 97 per cent.; Bankura, Hooghly, Malda and Dacca between 80 to 90 per cent.; the 24-Parganas, Murshidabad, Jessore, Khulna, Burdwan, Dinajpur, Bogra, Mymensingh, Faridpur, Tippera, Noakhali and Chittagong Hill Tracts report between 60 to 79 per cent. The outturns of the remaining districts are between 59 to 50 per cent. The low outturns are chiefly attributed to excessive rain and floods.

According to the final estimates of the district officers the outturn of the different *bhadoi* crops for the province as a whole works out to 74 per cent. of the normal against an outturn of 87 per cent. of last year.

Taking 75 per cent. as the outturn of *aus* paddy, the gross yield for the province, on the basis of a normal yield of 10 maunds of clean grain per acre, is estimated at 26,901,400 cwts. against 32,010,300 cwts. of last year.

CALCUTTA,
The 1st December 1913.

Director of Agriculture, Bengal.

FARIDPUR	Bhadol paddy (autumn rice).	255,800	180,800	181,000	75	70	Latter part of July. Normal.	Bhadol paddy crop was very badly damaged by heavy rain previous to the submission of the preliminary forecast. The damage was particularly heavy in Gopalganj, Bhadol tracts, where the crop was almost entirely destroyed. Damage by insects to a slight extent is reported from Bhadariganj in the Madaripur subdivision. In higher lands the crop was fairly good, but even here heavy rain in June caused damage and retarded the growth. Hence the low outturn.

CHITTAGONG	Bhadol paddy (autumn rice).	202,000	189,700	208,700	94	97	Middle of August. Normal.	The increase in area under bhadol paddy is due to early rainfall and to revision of areas made in the recent settlement. The growth of the crop was good owing to favourable weather condition at the beginning, but in August and September some damage was done by continuous rain; hence the outturn is slightly below the normal.

Flinders passage—Obstruction reported.

No. 581 (third publication).—The Portmaster, Brisbane, has given Notice (No. 16 of 1913) that an obstruction, on which the S.S. *Maranoa* is stated to have struck in 1908, is reported to lie 7 cables S. 73° W. from Scott Rock, with the north-east extreme of King Point bearing S. 51° E. one mile distant and the south-east extreme of Wednesday Island N. 43° E. The depth of water on the obstruction is not stated. As the S.S. *Suva*, with a draught of 15' 10", is reported to have recently struck what is considered

the same obstruction, and in view of the existence of two dangers south-west of Scott Rock, it is advisable that ships using Flinders Passage should not pass to the southward of Scott Rock, but the following directions should be followed:—

Approaching from the south-eastward a course should be steered N. 56° W. for the west extreme of Wednesday Island, until No. IV Tuesday Islet is in line with Strait Rock bearing N. 86° E. This mark should be kept on astern until Double Hill bears S. 14° W., then proceed as before directed.

- Letter No. 1547, dated the 22nd August 1913, and enclosures, from the Bengal Chamber of Commerce.

THE question of the congestion at the Calcutta jetties, owing to insufficient accommodation and the absence of adequate transport facilities for the present volume of trade, has been engaging the attention of Government for some considerable time past. There has been a very great expansion of the trade of the port and a large increase in the number and tonnage of vessels entering it, and representations have been received from the Liners' Conference, the Calcutta Import Trade Association, and others complaining of serious delays to vessels and consequent loss due to the inadequacy of the facilities for the discharge of cargo at the jetties, and urging the appointment of a commission to consider the question of providing increased accommodation at these jetties.

2. To alleviate the congestion, the Bengal Government, at the instance of the Port Commissioners, Calcutta, have, from time to time, sanctioned remedial measures, such as the reduction of the free time allowed to importers for clearing goods, the rearrangement of existing jetties and sheds, the construction of additional jetties, etc. These, however, have proved but partial remedies and are insufficient to meet the ever-increasing requirements of the trade of Calcutta.

3. The Government of Bengal agree with the Bengal Chamber of Commerce and other bodies who were consulted, that the subject for consideration is one of wider range than an enquiry into the facilities afforded to the Import Trade at the jetties, and that it concerns rather the question whether proper facilities of all kinds are being provided to enable the port and railway authorities to deal promptly and adequately with the rapidly-expanding trade of Calcutta, in accordance with a well-defined and carefully-thought-out policy. There are several projects for improving transport facilities and the railway and other approaches to the port, which have been prepared at various times and which are now under consideration, such as the provision of a railway bridge over the Hooghly at Panihati, the expansion of the docks, the provision of new coaling-berths on the Howrah side of the Hooghly, the Grand Trunk Canal Project, the removal of the Hatkhola jute mart and additions to the jetties. These projects are of the first importance and involve enormous expenditure and they should, it is rightly held, be examined and co-ordinated by a committee whose duty it would be to make an exhaustive enquiry into the requirements of the trade of the port and the means by which these requirements could be met.

4. The Bengal Chamber of Commerce were accordingly asked, in June 1913, to call together a conference of representative non-official gentlemen and railway expert authorities to consider whether a small committee of experts should not be appointed to investigate and advise on the whole question of the development of railway and port facilities in Calcutta. At the conference, which was held, on the 8th August 1913, and was attended by representatives of all the leading associations and public bodies of Calcutta, as well as by the representatives of the railways, the following resolution was passed unanimously :—

“Whereas it is in the opinion of this conference urgently necessary that a full and complete investigation should be made into the question of the general policy of the development of the Port of Calcutta and of the transport and all other facilities connected therewith, be it hereby—

RESOLVED that this conference strongly recommend that the Government of Bengal should appoint forthwith a small investigating authority, or commission, to consist of six or seven members empowered to deal comprehensively with the whole question : and that such commission shall include an officer of Government to act as president, the president of the Bengal Chamber of Commerce, another commercial member to be selected by that Chamber, a railway expert and an officer experienced in port affairs.”

5. The Governor in Council accepts the recommendation thus made and is pleased to appoint the following investigating committee :—

- | | | |
|----|---|------------|
| 1. | THE HON'BLE SIR WILLIAM DUKE, K.C.I.E., C.S.I.,
I.C.S. | Chairman. |
| 2. | SIR HENRY BURT, K.C.I.E. | } Members. |
| 3. | THE HON'BLE MR. A. M. MONTEATH | |
| 4. | THE HON'BLE MR. J. C. SHORROCK | |

| 6. | MR. A. G. LYSTER | |
| 7. | MR. H. F. HOWARD, C.I.E., I.C.S. | |

MR. R. N. REID, I.C.S., is appointed to be Secretary to the committee.

The committee is empowered to—

- (1) examine the existing traffic and port facilities in Calcutta and its immediate neighbourhood ;
- (2) investigate the present and future requirements of the trade of Calcutta, and
- (3) determine the extent to which the various transport agencies shall provide new works and other facilities in order that these requirements may be fully met for as long a period as it is reasonable to prepare a forecast.

The committee is also empowered to call witnesses and experts, if necessary, to enable it to come to a decision on the questions placed before it.

The Chairman will fix the place, date and hours of meeting in communication with the members.

ORDER—Ordered that a copy of the resolution be forwarded to the Chairman and members of the committee, the Government of India and the Financial Department of this Government for information.

Ordered also that the resolution be published in the *Calcutta Gazette* and copies forwarded to the editors of the daily newspapers.

By order of the Governor in Council,

- (1) Letter from the Port Officer, Calcutta, No. 6742, dated the 12th August 1913, submitting the Annual Report of his Department for the year 1912-13.
- (2) Letter from the Port Officer, Chittagong, No. 442 P., dated the 17th September 1913, submitting the Annual Report of his Department for the year 1912-13.

PORT OF CALCUTTA.

There were four casualties in the Pilot Service during the year. Two Branch Pilots retired from the service, one Leadsman Apprentice resigned and another was dismissed for misconduct. Two Leadsman Apprentices were recruited from England. The total strength of the service stood at 56 pilots and 14 Leadsmen.

2. There was an increase in the number of vessels visiting the port, 1,730 with a gross tonnage of 7,074,530 having entered the port during the year under review against 1,708 with a gross tonnage of 6,765,071 in the previous year. One thousand seven hundred and eighteen vessels with a gross tonnage of 7,019,679 left the port against 1,704 vessels with a gross tonnage of 6,750,128 in 1911-12. Pilotage receipts amounted to Rs. 15,33,673 against Rs. 14,76,000 in 1911-12 and Rs. 14,37,370 in 1910-11.

3. Three hundred and two of the incoming steamships drew over 21 feet, while 1,104 of the vessels which left the port drew over 21 feet of water. One sailing ship, drawing over 21 feet, entered, and one left, the port.

4. Seven inward-bound vessels were neaped during the year for want of sufficient depth of water over the bars of the river at Saugor, and one outward-bound vessel was neaped at Calcutta. No vessels were neaped during the previous year. Four vessels were detained at the Sandheads for want of pilots against five in the previous year. Three officers were carried off to sea in August owing to bad weather at the Sandheads against twelve in 1911-12.

5. Twenty-one groundings occurred against twenty-three in the previous year, and two collisions against two in 1911-12. Six of the groundings were accidental and four were due to alteration in the channel of the river. In eight cases, the pilot was held to be free from blame, in two cases the groundings were attributed to his imprudence or error of judgment, and in one case to unskilfulness. The pilots in fault were suitably dealt with by Government. As regards the two collisions, the enquiries held showed that one case was due to error of judgment, and the other, to negligence.

6. No court under Act XII, 1859 (The Calcutta Pilots Act) was held during the year under report.

7. Ninety-seven candidates appeared at the examinations for the grant of Colonial and Home Trade Certificates of Competency, of whom 51 passed. There were 642 candidates for examinations for the grant of Certificates of Competency as Master, Serang, Engineer and Engine-driver under the Inland Steam-Vessels Act, 1884, of whom 184 passed. There was no candidate for Steam-Tug Pilot's license.

8. Mr. G. Robertson, the First Engineer and Shipwright Surveyor, was on six months' combined leave from 14th May 1912, when Chief Engineer C. F. Laslett, R.I.M., Engineer and Shipwright Surveyor, Chittagong, acted for him. Engineer A. A. Macdonald, R.I.M., Second Engineer and Shipwright Surveyor, Calcutta, was transferred to Chittagong during the above period. Engineer W. G. Horley, R.I.M., Third Engineer and Shipwright Surveyor, acted as Second Engineer and Shipwright Surveyor, and an Engineer of the British India Steam Navigation Company, Mr. Neil McLeod, was appointed to act for Engineer Horley.

Commander C. J. C. Kendall, D.S.O., R.I.M., was Port Officer throughout the year; Commander C. B. Henley, R.I.M., was Deputy Port Officer and Deputy Shipping Master up to 30th April, 1912, when he reverted to the Royal Indian Marine, and Commander G. N. Forteath, R.I.M., was appointed Deputy Port Officer and Deputy Shipping Master in his place. Lieutenant O. Goldsmith, R.I.M., was Assistant Port Officer and Deputy Shipping Master throughout the year. The acknowledgments of Government are due to Commander Kendall for his efficient supervision of the work of the Department during the year under review.

PORT OF CHITTAGONG.

9. Seven hundred and eighty vessels (including sailing vessels) entered and 791 left the port representing a gross tonnage of 675,630 and 689,056. respectively. It is impossible to compare these figures with those of the previous year, as inland steamers have been included in the statistics for the first time.

10. One grounding, one collision and two cases of fire on board vessels occurred in port during the year. One vessel was damaged by a cyclone.

11. One hundred and thirty-six candidates appeared at the examinations for the grant of Certificates of Competency as Master, Serang and Engine-driver under the Inland Steam-Vessels Act, 1884, of whom 67 passed.

12. Commander E. Gray Mills, R.I.M., was Port Officer throughout the year. Chief Engineer C. F. Laslett, R.I.M., was Engineer and Shipwright Surveyor up to 13th May 1912, when he was appointed to officiate as First Engineer and Shipwright Surveyor, Calcutta. Engineer A. A. Macdonald, R.I.M., Second Engineer and Shipwright Surveyor, Calcutta, acted for him during this period. Chief Engineer Laslett resumed his appointment at Chittagong on 21st November 1912, which he held till the end of the year 1912-13. The acknowledgments of Government are due to Commander Mills for his efficient supervision of the work of the Port of Chittagong during the year under review.

**RESOLUTION ON THE ANNUAL IRRIGATION REVENUE
REPORT FOR THE YEAR 1912-13.**

No. 51537.

GOVERNMENT OF BENGAL.

IRRIGATION DEPARTMENT.

Dated Calcutta, the 16th December 1913.

RESOLUTION.

READ—

The Annual Irrigation Revenue Report for the year 1912-13.

THE **Major Irrigation Works** in Bengal are the Midnapore and Hijili Tidal Canals. These works are in operation. The **Minor Works** for *navigation* are the Calcutta and Eastern Canals, the Madaripur Bhil Channel, a portion of the Orissa Coast Canal, the Nadia Rivers and the Gaighatta and Baxi khal, while the work of this class for irrigation is the Eden Canal. The Utterbhag Lock under construction in connection with the Magra Hât Drainage Scheme is treated as a minor work for navigation. Training works on the rivers Ganges, Bhagirathi, Gorai, Dhaleswari and Buriganga are also classed under this head.

2. The capital outlay on the Major Works up to the end of March 1913 amounted to Rs. 1,11,08,431. The works constructed for this outlay comprise two weirs, the Midnapore and Panchkura weirs, and 98.75 miles of main and branch canals, of which 69.75 miles provide for both irrigation and navigation and 29 miles for navigation only. There are in addition 254½ miles of distributaries. During the year under review no addition was made to the length of either the canals or the distributaries.

3. The total receipts from the major works amounted to Rs. 2,73,212 and the working expenses to Rs. 2,46,387, the net result being a profit of Rs. 26,825 against a deficit of Rs. 17,393 in the preceding year. This profit is made up of a net revenue of Rs. 3,538 on the Midnapore Canal and of Rs. 23,287 on the Hijili Tidal Canal. The better results shown are, however, due in the main to the fact that the system of distribution of the establishment charges adopted by the Accountant-General during the year 1911-12 was discontinued. The general revenues of these canals, which depend considerably upon receipts from navigation, have suffered of late years from railway competition.

4. The area irrigated during the year was 80,958 acres as compared with 80,975 acres in 1911-12, and an average of 75,118 acres for the triennium ending March 1912. The demand for water was moderate and the irrigation effected was satisfactory.

5. The capital outlay on canals classed as **Minor Works and Navigation** was Rs. 93,200 during the year and Rs. 1,15,83,617 to the end of the year. The receipts for the year amounted to Rs. 5,93,584 and the

working expenses to Rs. 7,34,549. The financial results of the year and the capital expenditure to date are exhibited in the following statement :—

6. **The Calcutta and Eastern Canals** are a series of navigable channels, mostly natural and partly artificial, by which communication is maintained between Calcutta and Eastern Bengal. The receipts from navigation tolls amounted to Rs. 4,00,833 as compared with Rs. 4,14,406 in the preceding year. The decrease is chiefly due to fluctuation of traffic.

7. **The Madaripur Bhil Channel** connecting the Madhumati and Kumar rivers, formerly a portion of the Calcutta and Eastern Canals, now forms a separate project. The capital expenditure during the year was incurred on (1) deepening by dredging the channel through the bhil, which work was completed during the year; (2) dredging the Lower Kumar river, which was taken up during the year; and (3) constructing a toll office and other works in connection with the scheme. The total capital outlay to the end of the year amounted to Rs. 30,32,551 against the sanctioned estimate of Rs. 34,32,191 for the project. The receipts and working expenses (direct and indirect) during the year were respectively Rs. 1,03,093 and Rs. 93,969 as against Rs. 1,23,706 and Rs. 7,483 in the year 1911-12. The decrease in receipts is chiefly on account of the abnormal shoaling up of the western entrance of the route and to some extent to the reduction of toll charges on passenger boats. The increase in working expenses is on account of heavy expenditure incurred in dredging the Manikdah entrance channel.

8. **The work in the Nadia Rivers** consists in the training of the shallow channels by bandals with the object of scouring shoals and maintaining a sufficient depth of water for boat and steamer traffic. This object is only partially attained. The work done is of use, however, as it guards against the danger of these offshoots of the Ganges, which combine and afterwards form the Hoochly, closing up altogether in the dry season, and also provides a supply of fresh water for the towns and villages on their banks. The receipts and working expenses were Rs. 28,984 and Rs. 1,47,758, respectively, as against Rs. 33,506 and Rs. 81,821, respectively, in the preceding year. The decrease in receipts is due to a falling off in the number of steamers and flats on account of the poor outturn of the crops and extensions of railways on both sides of the Bhagirathi. With the growth of railway lines on either bank of the Bhagirathi it is not likely that the revenue from these rivers will improve to any material extent.

9. **The Gaighatta and Baxi Khal**, a short channel connecting the rivers Damodar and Rupnarayan, was maintained at an annual cost of Rs. 8,956 against Rs. 4,579 in the previous year. The increased expenditure of the year was due to the silt clearance of the khal, which alone cost Rs. 6,035. The collection of tolls and fishing rights were leased out during the year at Rs. 4,900.

10. **The Eden Canal** was originally constructed for sanitary reasons, but it is now used to some extent for irrigation. It was worked

during the year at a profit of Rs. 15,847 against Rs. 3,637 during the previous year. The improvement was due to an increase in the area irrigated from the canal, which for the year under review came to 27,013 acres against 24,351 acres in the year 1911-12. There is an increasing demand for irrigation from this canal. The area under irrigation cannot, however, be materially increased unless either a weir is constructed across the Damodar river or steps taken to provide a supplementary head sluice below Jujuti and improve the distributary channels of the Eden Canal. A scheme for a weir and canal is under consideration, and observations are being taken for the location of a new sluice.

11. **The Utterbhag Lock** is being constructed on the Peali river to give access to the channels constructed under the Magra Hât Drainage Scheme to boats coming from the Sundarbans and Eastern rivers. It is expected that the lock will be completed in the year 1913-14.

12. Training works were, as usual, carried out in the Buriganga and Dhaleswari rivers to facilitate navigation and to improve the water-supply of the town of Dacca. The results were satisfactory, and the least depth of water on any shoal during the year was 2 feet 6 inches. Training works were also carried out on the river Ganges between Digha and Damukdia to maintain a minimum depth of 5 feet of water over the worst shoals. The number of shoals trained were 14, of which only 1 was situated within this Presidency, the remaining 13 being in the province of Bihar and Orissa. It has been decided that the entire cost of these training works will be borne by this Government for the three years 1912-15. To improve navigation as well as the sanitary conditions and water-supply of the town of Rampur Boalia training works were carried out on the river Ganges there by the India General Navigation and Railway Company and the Rivers Steam Navigation Company, Limited, with the help of a subsidy of Rs. 5,000 from this Government. At the mouth of the Bhagirathi river, at its offtake from the Ganges, dredging and bandalling operations were carried out during the year to improve sanitary conditions by an increased flow in the river. The combined effect of dredging and bandalling induced a current throughout the year; this not only helped navigation but afforded a supply of good drinking water to important towns and villages along the river. Dredging operations were also conducted during the year at the entrance of the Gorai river, with the result that a navigable channel was maintained with a minimum depth of 6 feet.

13. The Waterways Standing Committee held three meetings during the year. The most important subject dealt with was the proposed canalization of Tolly's Nala and construction of a steamer canal for inland steamers and boats between Calcutta and Eastern Bengal. At the recommendation of the Committee Mr. O. C. Lees, retired Chief Engineer, Public Works Department, was deputed to deal with the whole question and to report upon the projects from the engineering, commercial and financial points of view. The report has since been received and is now under the careful consideration of Government.

14. The Irrigation Department during the year was in charge of Mr. F. A. A. Cowley, Superintending Engineer, as Deputy Secretary to this Government. With the creation of a second Chief Engineer for Irrigation this post has since been abolished. The thanks of Government are due to Mr. Cowley for his efficient conduct of the affairs of the Department during the year.

ORDER.—Ordered that a copy of this Resolution be published in the *Calcutta Gazette*, and that a copy thereof and of its accompaniments be submitted to the Government of India in the Public Works Department and circulated to other Governments and to all Departments and officers of this Government as useful.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Winter Rice Crop of Bengal,
1913-14.

(NOTE.—On the average of the five years ending 1911-12 the area under winter rice in Bengal represents some 19·8 per cent. of the total area under rice in British India.)

Character of the Season.—In April the rainfall was generally defective throughout the province, but in May the fall was above the normal which hindered to some extent ploughing operation and the preparation of seed-beds. In June also the rainfall was much in excess of the normal, and transplanting was delayed in consequence. The rainfall in July and August was approximately normal, but the heavy floods in the Burdwan Division and also in some of the Eastern Bengal districts considerably damaged the crop especially in low lands. The damage, however, was made good to a large extent by replanting parts of the flood-affected areas. The prospects and condition of the crop were greatly improved by the rainfall in September and October. Injury by insect-pests has been reported from parts of Khulna, Bakarganj, Faridpur, Tippera, Noakhali and Chittagong Hill Tracts. On the whole the weather conditions were not very unfavourable for the growth of the crop.

Acreage.—According to the figures furnished by the District Officers the area sown this year is 14,524,700 acres against 15,313,900 acres last year or a decrease of 789,200 acres.

Outturn.—From Appendix I it will be seen that four districts only report more than a normal crop, viz., Birbhum 117, Rangpur 115, Rajshahi 105 and Malda 125 per cent. Khulna, Burdwan, Pabna, Chittagong and Noakhali report a normal crop. Seven districts report a crop between 90 to 95 per cent. Eight districts report a crop between 70 to 87 per cent. Jessore and Howrah each reports 67 per cent.; while Midnapore reports as low as 60 per cent. only, due chiefly to damage done by excessive rain and floods. According to the District Officers' estimates the provincial outturn works out to 88 per cent. of the normal against 98 per cent. of last year. On the basis of the normal yield of 12 maunds of clean grain per acre the provincial outturn, as worked out from District Officers' estimates, is 112,688,000 cwts. against 132,312,100 cwts. of last year.

APPENDIX I:

Second Forecast of the Winter Rice Crop of Bengal, 1913-14.

DISTRICT.	Estimated normal area under winter rice.	Estimated area under winter rice—		Estimated out-turn as a percentage of the normal yield per unit of area.		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
24 Parganas ...	Acres. 899,700	Acres. 837,400	Acres. 777,700	88	75	November. Normal.	The decrease in area this year is due to heavy rainfall during the time of sowing. The outturn was estimated in the first forecast to be 8 annas, but the rains in October having done much good to the crop the outturn is now estimated 9 annas.
Nadia ...	186,000	135,300	129,600	86	75	Not yet begun ...	The decrease in the area sown as compared with last year's figure is due to unfavourable weather conditions. The increase in area as compared with first forecast is due to revision of estimate of the area in the Naushipara thana. Much damage was done to the crop by excessive rain in Badar, Chaudanga and Banaghat subdivisions. Hence the outturn is below the normal.
Murshidabad ...	345,600	337,900	288,600	83	92	Ditto ...	The decrease in area as compared with last year is due to floods in Kandi subdivision and to excessive rain at the time of sowing in other subdivisions. The excessive rainfall retarded the growth of the crop. About 3 to 4 annas of the crop has been damaged by floods. Hence the outturn is expected to be below the normal.
Jessore ...	468,100	466,300	406,100	117	67	Ditto ...	The decrease in area as compared with last year is due to heavy rainfall. A low outturn is expected on account of the damage done by rain and flood.
Khulna ...	655,700	759,500	732,500	123	100	Beginning of November. Normal.	The increase in area as compared with the first forecast is due to transplantation of the crop in certain tracts of Bagerhat and Bakkhira after the submission of the first forecast. The decrease as compared with last year is due to want of rain at the beginning and excessive rain afterwards. The weather was favourable since the submission of the first forecast, and the outturn so far is normal.
Burdwan ...	874,300	706,000	746,000	92	100	Harvesting not yet commenced.	The increase in area is due to favourable rainfall at the time of sowing. The damage done to the crop by flood and excessive rain was made good to a large extent by re-plantation of the damaged area in September, and the extent of damage is now estimated at 2 annas over the flooded area. The outturn is expected to be normal since the condition of the crop has greatly improved on account of recent favourable weather.
Birbhum ...	604,600	496,800	506,100	75	117	Second week of November. Early.	The increase in area this year is due to good rainfall. The weather was favourable to the growth of the crop. The outturn so far is good.
Bankura ...	310,600	476,400	490,000	83	83	Not yet begun ...	The increase in area this year is due to favourable weather conditions at the time of sowing. The weather was favourable for the growth of the crop, but the floods of Damodar and Bhope damaged the crop to some extent, causing the outturn to fall below the normal.
Midnapore ...	1,408,000	1,618,400	1,369,500	100	80	Harvesting not yet commenced.	Cause of increase over the area shown in the first forecast is due to the fact that in the Contal subdivision a large area has been cultivated after the subsidence of the flood-water. The weather condition was favourable since the submission of the first forecast. Damage done by excessive rain and flood at the early stage is the cause of the falling off of the outturn below the normal.
Hooghly ...	276,700	251,400	240,800	96	87	First week of December. Normal.	The decrease in area this year is due to heavy rainfall and flood at the time of sowing. The increase as compared with the first forecast is due to revision of estimates made on further inquiry. The outturn is below the normal on account of damage caused by the flood.
Howrah ...	135,300	106,600	99,500	83	67	Harvesting not yet commenced.	The decrease in area this year is due to excessive rain. On further inquiry it has been ascertained that the area actually under the crop exceeds the estimates made at the time of the first forecast. Hence the figure shown in the first forecast has been revised. The favourable weather conditions in September and October have benefited the crop, but the outturn is expected to fall below the normal owing to damage done by the floods.

SUPPLEMENT TO THE CALCUTTA GAZETTE, DEC. 17, 1915. 1915

District.	Estimated normal area under winter rice.	Estimated area under winter rice--		Estimated outturn in a percentage of the normal yield per unit of area--		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
Rajshahi	Acres. 497,000	Acres. 502,400	Acres. 476,700	75	108	First week of December. Normal.	The decrease in area as compared with that of last year is due to heavy rain which submerged and destroyed the plants in thana Baraigram. Good rainfall throughout the district has been favourable to the crop, and the outturn is expected to be above the normal.
Dinajpur	1,180,800	964,000	1,016,400	70	94	Harvesting not yet commenced.	Increase in area this year is due partly to timely rainfall and partly to ploughing some jute fields under winter-rice cultivation. The weather conditions have been favourable, and no damage has hitherto been done to the crop.
Jaipur	551,300	527,400	482,400	90	90	Ditto	The cause of decrease in area as compared with last year is the want of sufficient rain at the time of sowing. Since the submission of the first forecast there has been an increase in area by 12,000 acres owing to favourable weather conditions. The weather was unfavourable at the time of transplantation, hence the outturn is expected to be below the normal.
Darjeeling	65,300	37,100	36,800	92	92	In the Hills harvesting begun by the second week of November, which is early. Harvesting not yet begun in the Terai.	The character of the weather at the time of sowing being unfavourable, the outturn is a little below the normal.
Bangpur	221,300	746,300	696,000	110	115	First week of December.	There has been a decrease in area in Sadar subdivision only, for which no reason has been stated. The weather conditions have been favourable. The rainfall in October has greatly improved the prospects of the crop.
Bogra	303,000	303,000	303,000	75	95	Harvesting not yet commenced.	The rainfall in September and in the beginning of October has done immense good to the crop. The growth of the crop was retarded to some extent by early submergence of the flood. The outturn is expected to be better than that of last year.
Pabna	444,000	470,000	470,000	110	100	Third week of November. Normal.	The rainfall in September and October has improved the prospects of the crop, and a normal outturn is expected.
Maida	300,000	306,000	306,000	100	125	End of November.	A bumper crop is expected, owing to early cultivation and favourable weather throughout the season.
Dacca	633,100	696,600	687,300	93	80	November. Normal.	The decrease is due to extension of late cultivation. The weather was unfavourable on account of insufficient rainfall. An unusually low flood has also proved injurious to the crop. The outturn will therefore fall below the normal.
Mymensingh	1,194,700	992,000	985,300	103	90	Not yet commenced.	The increase in area as compared with the preliminary forecast is due to the fact that about 8,000 acres of jute field, which had been submerged under water on account of excessive rain, was put under the cultivation of winter rice. The decrease as compared with last year is due to want of rain at the sowing. Damage by insect pests and flood is estimated at 10 per cent. in the district.
Faridpur	541,000	437,600	430,800	83	70	Ditto	The crop suffered to some extent on account of the deficiency of rain in September, but was much benefited by the good rainfall in October. The flood level was very low this year and has adversely affected the crop in the Madaripur subdivision. Large area under paddy in (topalganj) subdivision was destroyed by early rise of water in June. Hence the outturn is not expected to be above 70 per cent.
Bakerganj	1,300,000	1,329,200	1,301,000	100	80	Ditto	Last year's estimate of area was a little too high. A reduction of area was also caused by floods. The rainfall was excessive at the time of sowing. A certain amount of damage has been done by floods and insect pests. Hence the outturn is likely to fall below the normal.
Chittagong	418,400	418,800	421,800	110	100	Beginning of November. Normal.	The increase in area this year is due to timely and sufficient rainfall, and also to rise in the price of rice. The weather has been on the whole favourable, and the outturn is estimated at 100 per cent., although some damage was caused by flood, especially in the Ikla Valley.

	Acres.	Acres.	Acres.				
Tippera ...	724,800	728,000	720,000	100	70	Middle of November.	The decrease in area is due to floods. The broadcasted paddy was extensively damaged by the flood, but the transplanted crop fared well. About 80 per cent. of damage was caused by flood and insect-pests.
Noakhali ...	569,900	664,500	692,400	125	100	First week of November. Normal.	The decrease in area this year is due to floods. The crop has been damaged by the flood in the Parasuram and Ohlagainala thanas, in Feni subdivision. Slight damage was done by ulu in one thana. The weather was good since the submission of preliminary forecast, and the outturn on the whole is expected to be normal.
Chittagong Hill Tracts.	15,500	22,000	22,000	90	90	Not yet harvested	The weather has been good since the submission of preliminary forecast. The seedbeds were in the beginning destroyed by heavy flood, and new seedbeds had to be prepared. Consequently the transplantation began late. A kind of pest called "Leda" also did some damage to the seed-beds, but the insects died out before they could do any serious damage.

Third Forecast of the Cotton Crops of Bengal, 1913-14.

(NOTE.—On the average of the five years ending 1911-12, the area under cotton crops in Bengal represents some 0·2 per cent. of the total area under cotton in India.)

Character of the season.—The early crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera, and also to a small extent in the districts of Bankura and Midnapore. The late crop is grown only in the last two districts. The early crop is generally sown before the rains and the late crop partly before and partly after the rains. Weather conditions have not been generally favourable for the growth of the early crop. The condition of the late cotton so far is reported to be fairly good. Some damage has been done to the early crop by untimely and excessive rain in the Chittagong Hill Tracts and Hill Tippera, thus affecting the outturn to some extent.

Area sown.—The total area sown with the early crop is reported to be 49,098 acres against 49,250 acres last year, the decrease being due to untimely and excessive rain in Hill Tippera and the Chittagong Hill Tracts.

The area sown with late cotton is reported to be 1,900 acres against the same area last year.

Outturn.—The estimated outturn of early cotton amounts to 19,065 bales, against 19,406 bales last year. The outturn of late cotton is estimated at 1,158 bales against 1,151 bales last year.

First Forecast of the Wheat Crop of Bengal, 1913-14.

[Note.—On the average of the five years ending 1911-12 the area under wheat in Bengal represents some 0·5 per cent. of the total area under wheat in India.]

The ratio of the irrigated wheat acreage to total acreage in (a) British India and (b) in the territory now reported on has in the five years ending 1911-12 averaged (a) 38·9 per cent. and (b) 16·9 per cent. respectively.]

Explanatory.—Three forecasts of the wheat crop are published. The first forecast deals only with the area sown and the general character of the crop.

Area sown.—The total area sown with the crop up to date this year according to district officers' estimates amounts to 138,700 acres against 146,300 acres last year.

Character of the season.—The rainfall in September, though defective, was general throughout the province. In October it was generally above the average, and was helpful to the sowings of the crop which began in normal time. Sowings were, however, late in Jalpaiguri, Malda and in parts of Murshidabad and Rangpur. The rainfall in November generally favoured the growth of the crop. The season has been favourable so far, and the present condition and prospects of the crop are reported to be fairly good in most districts.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR NOVEMBER 1913.

I. *Character of the season.*—Light to moderate rain fell throughout the province during the third week of the month. The rest of the month was almost without any rain. The fall for the whole month was slightly in excess of the normal in all the districts, excepting the 24-Parganas, Burdwan, Bankura, Dinajpur, Rangpur, Bogra, Pabna, Mymensingh, Tippera and Noakhali. The usual rainfall statement is appended.

II. *Progress of agricultural operations.*—Preparation and sowing of lands for *rabi* crops were progressing briskly throughout the month. Harvesting of winter rice commenced in places by the second week of the month.

III. *State of standing crops.*—Condition of winter rice and other standing crops was good except in some parts of flood-affected areas.

IV. *Prospects and probable outturn of harvests.*—The prospects of the winter and spring crops were generally hopeful and a fairly good outturn was expected.

V. *Damage to crops.*—Slight damage was done by rain in places to ripe paddy. Some damage by insect-pests was also reported from parts of Tippera and Noakhali.

VI. *Condition of agricultural stock.*—The condition of agricultural stock was reported to be fair. Cattle-disease was found to be prevalent in parts of the districts of Nadia, Khulna, Burdwan, Birbhum, Bankura, Mymensingh, Chittagong, Noakhali and Chittagong Hill Tracts.

VII. *Failure of pasturage and fodder.*—Want of fodder was felt in parts of Midnapore only.

VIII. *Prices of food-grains.*—During the second fortnight of the month under review the price of common rice rose in two districts only, fell in fifteen districts and remained stationary in the rest. It varied from 6 seers per rupee at Rangpur to 10 seers at Bankura.

IX. *Condition of agricultural people.*—The condition of agricultural population was reported to be fairly good. Gratuitous relief and agricultural loans were paid to those people of the Burdwan Division who suffered from the flood.

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF THE YEAR 1913-14.

FINANCIAL DEPARTMENT.

SEPARATE REVENUE BRANCH (SALT).

Dated Calcutta, the 16th December 1913.

THE following report on the state of the salt market for the second quarter of the year 1913-14, comprising the months of July, August and September 1913, in the Presidency of Bengal, is published for general information.

2. The quantity of salt of every description cleared during the quarter amounted to 2,932,048 maunds (including 1,941,357 maunds issued under the credit system), as compared with 3,768,949 maunds (including 2,582,217 maunds issued under the credit system) in the previous quarter and 3,096,293 maunds (including 1,494,035 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 30,84,217 (including Rs. 23,04,111 adjusted under the credit system), as against Rs. 30,60,361 (including Rs. 21,16,475 adjusted under the credit system) in the previous quarter, and Rs. 27,65,935 (including Rs. 13,65,395 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined table I shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter, compared with the figures of the corresponding quarters of the two previous years :—

(a) Inclusive of 1,941,357 maunds of salt issued under the credit system. Besides this quantity, 18,002 maunds of salt were issued under the credit system to inland bonded warehouses.

Compared with the corresponding quarter of the previous year and the same quarter of 1911-12, importations were less by 7·2 per cent. and 37 per cent., respectively, and clearances were less by 3·8 and 13·2 per cent. As compared with the corresponding period of the previous year, the

increased imports from Massowah, Salif and Port Said and the decreased imports from Aden, Hamburg and Bremen and the United Kingdom are especially noticeable.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter as compared with the preceding four quarters :—

The stocks remaining in the *golas* at the close of the quarter were less than those of the previous quarter and the corresponding quarter of the previous year, but greater than those of the quarters December 1912 to March 1913.

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published as usual in the *Calcutta Gazette* by the Director-General of Commercial Intelligence when they are available.

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar amounted to 547 maunds, as against 273 maunds in the previous quarter and *nil* in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter amounted to 100 maunds, as compared with 40 maunds in the previous quarter and 80 maunds in the corresponding quarter of the previous year.

8. The shipments of Liverpool salt during the quarter for the port of Calcutta according to the published market reports amounted to 25,810 tons. No vessel is at present on the sea bound for Calcutta with salt from Hamburg and Bremen.

9. Table III shows the average wholesale prices* per 100 maunds of Liverpool and other descriptions of salt at the port of Calcutta during each fortnight of the quarter:—

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 15th December 1913.

Summary.—During the week under report general rain fell all over the Province facilitating the growth of the *rabi* crops. Harvesting of winter rice is going on briskly, but its progress has been retarded in places owing to recent rainfall. Sowing of *rabi* crops is approaching completion. The outturn of winter rice is reported to be fairly good. The condition and prospects of *rabi* crops are good. Cattle-disease is reported from seven districts. The average price of common rice has slightly fallen as compared with that of the previous week. Agricultural loans were issued in Midnapore, Hooghly and Howrah.

RESOLUTION ON THE ANNUAL PROGRESS REPORT OF THE FOREST ADMINISTRATION IN THE BENGAL PRESIDENCY FOR 1912-13.

REVENUE DEPARTMENT.

FORESTS.

CALCUTTA, THE 22ND DECEMBER 1913.

RESOLUTION—No. 4439M.R.

READ—

The Annual Progress Report of the Forest Administration in the Bengal Presidency for 1912-13.

Read also—

The corresponding report of the previous year and the Government Resolution thereon.

Mr. O. E. Mounzel was in charge of the circle throughout the year, and all divisions and divisional offices except Darjeeling, which had been under the charge of Mr. J. B.
June 1913.

2. *Changes in area and in administration.*—No changes were made in the actual areas under the different classes of forest during the year, but owing to the recomputation of the areas in the Sundarbans reserved forest from the most recent maps, a nominal addition of 208 square miles has been made to the area under reserved forest, which is now returned as 4,888 square miles.

The redistribution of the forest staff between Bengal, Bihar and Orissa, and Assam was finally sanctioned by the Government of India in April last. This province has been given a permanent staff of 11 officers of the Imperial Forest Service (excluding the Conservator, supernumeraries and probationers), 7 officers of the Provincial Service, and 446 officers of the Subordinate Service.

3. *Reservation and demarcation.*—No forest settlements were completed during the year. Some progress was made in the important and urgent work of demarcation in the Chittagong and Chittagong Hill Tracts Divisions, but there is still a considerable amount of work to be carried out. The Governor in Council agrees with the Conservator that demarcation is for the present the most important duty of the officers in charge of these divisions, and trusts that next year's report will afford no ground for the suggestion that it is not receiving sufficient attention.

4. *Communications and buildings.*—Steady progress, assisted by the special grant made by the Government of India from the Imperial surplus, was made in the improvement of communications and buildings. The expenditure on communications amounted to Rs. 35,516 against Rs. 25,252 in the previous year, 17 miles of cart road, 43 miles of bridle paths and 14 miles of footpath being constructed. The total expenditure on new buildings and on repairs was Rs. 65,809, as compared with Rs. 50,461 in 1911-12.

5. *Working plans.*—A revised working plan for the reserved forests of the Darjeeling Division was sanctioned during the year. A proposal to disforest the Chakaria Sundarbans reserve in the Chittagong Division, which has been under consideration for some time, has now been finally disposed of. It has been decided, on the advice of the revenue and forest officers concerned, to retain the area as reserved forest. A revised working plan has been sanctioned for a period of eight years, with effect from the 1st July 1913.

6. *Protection.*—The number of forest offences reported during the year was 1,572 against 1,539 in the preceding year. The average for the preceding three years was 1,450. The increase is largely in the number of undetected cases, special efforts having been made in the Buxa Division to obtain a more complete record of forest offences. As a result, attention has been drawn to the localities in which such offences are most numerous, and the measures taken for the protection of these localities have improved forest conservation. His Excellency in Council is glad to see that special attention is being paid to this matter by the Conservator. It is clearly necessary, in order to ensure proper protection, that the record of forest offences, whether detected or undetected, should be as complete as possible.

Another case of counterfeiting a Government hammer for use in the criminal misappropriation of *sundri* timber was discovered. The accused were convicted and sentenced to six months' rigorous imprisonment.

The measures taken to ensure protection from fire were again very successful, only 1,643 acres, consisting mainly of grass lands, having been burnt over, as compared with 2,642 acres last year.

No change was made in the area open to grazing, which includes 4,770 square miles, of which, however, 4,030 square miles consist of the unclassed forests in the Chittagong Hill Tracts. The number of cattle impounded during the year was 2,221, the average for the three previous years being 1,601. The chief increase was in Kurseong and was due to more systematic impounding. The question of the reservation of grazing lands for the milk supply of Darjeeling has been further examined, and in view of the extension of the practice of stall feeding, it has been found possible to reduce the area open to grazing in the Darjeeling Division from 13,000 to 8,000 acres. Orders to this effect have been issued since the close of the year. The Governor in Council is assured that the Forest Department will do all in its power to encourage the use of cut fodder so as to enable a further extension of stall feeding and a further reduction in the area open to grazing to be effected.

The enquiry made into the over-exploitation of dead *sāl* trees from the Buxa forests referred to in last year's report has shown that the mortality in *sāl* trees was largely due to the attacks of a beetle which has not yet been identified by the Forest Zoologist, who has classed it among the Platypidae. Further investigations into the life-history of the insect are being made, and it is hoped in this way to ascertain how the pest can best be combated. The apprehension that the over-extraction was due to the organized manufacture of dead *sāl* on the part of persons interested in obtaining timber at low rates has fortunately proved to be unfounded, though there is reason to believe that the control exercised over the cutting of dead *sāl* was insufficient to prevent the felling of stag-headed and partly dead trees. Measures have now been taken to exercise stricter control by localising the fellings and marking the trees before sale.

7. *Exploitation*.—A considerable advance has been made during the year towards the exploitation of the Bengal forests by commercial agency. A concession, which is expected to have important results, has been granted to Messrs. Burn & Co. for the extraction of timber and bamboo from the forests of the Darjeeling, Tista and Kurseong Divisions. Surveys for the wire ropeways, which it is proposed to erect, have been carried out during the year, but extraction is not due under the agreement until 1914. A further agreement with the same firm for the extraction of timber from certain parts of the Buxa Forest Division was ratified after the close of the year. Negotiations are also in progress for a concession in regard to the extraction of bamboo for paper pulp from the reserved forests in the Chittagong Hill Tracts.

A license has been granted to the Chief Medical Officer of the Assam-Bengal Railway for the collection of *Chaulmugra* (*Taraktog--s Kurzii*) seeds in portions of the forests of the Chittagong and Chittagong Hill Tracts Divisions, but it did not come into force till the 1st July 1913.

Khedda operations were carried out in the Tista and Kurseong Forest Divisions, resulting in the capture of three elephants on which royalty was paid. It is hoped to undertake Khedda work on a larger scale in Jalpaiguri, Buxa and Chittagong during the present season.

8. *Financial results*.—The total revenue during the year increased by Rs. 1,02,209, while the expenditure decreased by Rs. 23,406. The surplus was Rs. 9,05,461, as compared with Rs. 7,79,846 in 1911-12 and Rs. 6,72,656, the average of the past five years. All divisions, except the Chittagong Hill Tracts, have contributed to the increase in revenue, which is mainly due to the realization of large outstandings from the previous year, the arrears of revenue having been reduced from 1½ lakhs at the beginning of the year to less than half a lakh at its close.

9. The number of persons reported to have been killed by tigers in the Sundarbans during the year was only 70, as compared with 142 in the previous year, and 122, the average number for the last five years. As, however, the decrease in the damage caused by tigers was accompanied by a proportionate decrease in the number killed, there is reason to fear, as the Conservator suggests, that the result was due to fortuitous circumstances rather than to the measures adopted in recent years for the destruction of these pests. The matter will continue to receive careful attention.

10. The thanks of the Governor in Council are due to Mr. Muriel for his capable and efficient management of the department and for his full and complete report, which contains ample evidence of the careful supervision exercised by him over all branches of forest work in this Presidency. His Excellency in Council notices with pleasure the Conservator's appreciation of the good work done by most of the officers of the department during the year.

By order of the Governor in Council,

J. H. KERR,

Secretary to the Government of Bengal.

Explanatory.—Three forecasts are issued for the spring oilseed crops. The first forecast deals only with the area sown and the general condition of the crops.

Area sown.—Oilseeds are chiefly grown in the Dacca, Rajshahi and Presidency Divisions. In the other two Divisions the area under the crops is very small. The total area under the crops sown up to now this year (excepting *til* for which separate forecasts are issued) is reported to be 1,549,500 acres against 1,589,600 acres last year.

Character of the season.—The rainfall in September was general throughout the Province. In October, it was generally above the average and proved sufficient for the sowings of the crops which began generally in normal time. The sowings were a little late only in Malda and in parts of Jessore and Jalpaiguri. The rainfall in November generally proved beneficial to the growth of the crops. The season has been on the whole favourable and the present condition of the crops is reported to be fairly good.

D. N. MOOKERJI,

for *Director of Agriculture, Bengal.*

DEPARTMENT OF AGRICULTURE, BENGAL.**Forecast of the Winter Til (Sesamum) Crop of Bengal, 1913-14.**

[Note.—On the average of the five years ending 1911-12 the area under til in Bengal represents some 5·7 per cent. of the total area under til in British India.]

Character of the season.—Although the crop was sown during the normal time in almost all the districts the weather was not uniformly favourable at the sowing time as it was unusually rainy. Excessive rainfall during the latter part of September hindered the growth of the crop and also damaged it to some extent in most of the districts. The floods and the deposit of sand left by the flood-water had an injurious effect on the crop in some parts of the Burdwan Division. The weather condition of Dacca, Mymensingh and Pabna, the most important *til*-growing districts of Eastern Bengal, was however favourable, and a good outturn has been reported in these places.

Acresage.—The total area cultivated with the crop as estimated by the District Officers is 55,800 acres this year against 64,700 acres last year. The decrease occurred chiefly in Tippera, Nadia, Malda and Rangpur owing to the excessive rainfall and in Midnapore owing to floods.

Outturn.—According to the estimates of the District Officers, the outturn of the crop for the province works out to 80 per cent. against 86 per cent. last year. Taking the normal yield per acre to be $4\frac{1}{2}$ maunds, the gross yield for the province is estimated at 7,000 tons against 10,400 tons last year.

	Acres.	Acres.	Acres.					
24-Parganas ...	300*	300	300	83	100	August. Late...	November. Normal ...	The weather condition was favourable for the cultivation and growth of the crop.
Nadia ...	5,300	2,600	900	67	50	August. Normal ...	Middle of November. Normal.	The decrease in area sown this year as compared with last year is due to excessive rainfall at the time of sowing. Extensive damage was done to the crop by heavy rain; hence the outturn is much below the normal.
Murshidabad ...	4,100	1,100	1,300	83	83	July and August ...	November and December. Normal.	Increase in area this year is due to extension of cultivation of this crop in the Lalbagh subdivision of the district. The character of the weather was not favourable at the time of sowing. Excessive rainfall at the beginning and want of rain at the latter part of October did some damage to the crop. Hence the outturn has fallen below the normal.
Jessore ...	17,400	1,300	1,500	83	67	August. Normal ...	Latter part of November. Normal.	The weather was unfavourable at the time of sowing owing to heavy rain which retarded the growth of the crop. Excessive rainfall in September damaged the crop to some extent. Hence the decrease in the outturn.
Khulna ...	2,800	1,800	1,900	100	100	Latter part of August. Normal.	Middle of December. Normal.	The weather was favourable for the cultivation and growth of the crop.
Burdwan ...	500	200	300	67	67	August. Normal ...	December. Normal ...	The weather at the time of sowing was favourable and a larger area than in the previous year was sown. In Asansol subdivision heavy rain later in the season damaged about one-third of the crop. This accounts for the falling off of the outturn.
Birbhum ...	500	500	500	83	100	August. Normal ...	Latter part of November. Normal.	The weather was favourable for the cultivation and growth of the crop. The outturn is normal.
Bankura ...	2,300	2,900	2,900	83	83	20th July. Normal ...	Not yet commenced ...	The weather was fairly favourable. The outturn is expected to be somewhat below the normal.
Midnapore ...	30,800	2,100	7,000	83	80	Latter part of June. Normal.	End of September. Normal.	The decrease in area this year is due to floods. Excessive rainfall hindered the cultivation and growth of the crop and also damaged it to the extent of 75 per cent. in the subdivisions of Santal, Tamluk and Ghatal and other low-lying tracts.
Hooghly ...	1,000	700	500	83	83	Middle of September. Normal.	End of November. Normal.	The decrease in area as compared with that of the last year is due to early heavy rains in certain parts of the district. The weather at the time of sowing was favourable, but the outturn is below the normal owing to the deposit of sand left by the floods in certain parts of the district.
Howrah ...	300	300	300	83	83	1st week of November	Not yet commenced ...	The weather has been favourable since the time of sowing. A fairly good outturn is expected.
Rajshahi ...	2,700	2,700	2,500	83	70			The crop is reported to be fair.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 22nd December 1913.

Summary.—During the week under review scattered showers of rain fell in some of the districts of the Rajshahi and Dacca Divisions. Its effect on all *rabi* crops except mustard is good. Transplanting of summer rice and harvesting of winter rice are in progress. The outturn of winter rice is reported to be fairly good. The prospects of *rabi* crops are hopeful. Fodder is insufficient in parts of Midnapore and Hooghly. Cattle-disease is reported from nine districts. The average price of common rice has fallen by about 3·3 per cent. as compared with that of the previous week. Agricultural loans continue to be issued in Midnapore.

3. Government reserves to itself the right to alter the quantity and class of opium to be offered for sale in each month. No reduction in the quantities to be sold, however, will be made without three months' previous notice.

4. The following are the conditions of sale. Government reserves to itself the right of altering all or any of these conditions after giving three months' previous notice, and power is reserved to vary the upset price referred to in condition (ii) at any time without such previous notice:—

(1) The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

(ii) The opium will be ordinarily offered for sale at an ~~agent~~ price of Rs. 1,200 per chest of uncertified opium and will be sold to the highest bidder above that price, except under the circumstances for which provision is made by clause (xiii) of these conditions of sale. The bids must advance by Rs. 5 at a time.

(iii) The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M., but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of Government, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or if the whole quantity advertised shall not be sold on the day appointed, the Government may dispose of the lots which remain on hand at a future sale.

(iv) Each lot shall contain five chests, excepting one lot at the December sale, which will consist of four chests of Patna opium and one chest of Benares opium.

(v) A promissory note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such promissory notes shall be redeemed on the part of the purchasers at this office by Bank of Bengal receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday,

DEPOSIT.

When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest.

On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest.

On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.

And so on, Rs. 100 being added to the deposit for every bid additional to the extent of Rs. 400.

the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as Government shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

(vi) The said promissory notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

(vii) The promissory notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

(viii) No tender of money, Bank of Bengal receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause (v) on the fifth day following the day of sale, will be afterwards accepted: Provided always that money so subsequently tendered may be taken in payment of the said promissory note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. (v) and No. (vi).

(ix) The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and, in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as Government shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages

that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

(x) Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

(xi) No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

(xii) The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India notes, Bank of Bengal receipts, or Government securities, a sum equal to the amount for which a promissory note would otherwise be taken under the fifth of these conditions.

(xiii) With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bona fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 1,200 specified in the second of these conditions.

(xiv) The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether fifteen lots, provided always that there remain a sufficient number of lots of the opium to complete the said fifteen.

(xv) In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

(5) The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Government of Bengal:—

No. 1—Certificate of the opium advertised for sale.

No. 2—Report of the examination of such opium.

(6) The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug, when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the office of the Government of Bengal.

(7) Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Government of Bengal. But, in accordance with established usage, under no circumstances will the Government entertain or recognize

any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

By order of the Governor in Council,

H. L. STEPHENSON,
Secretary.

No. 172 Marine.—In exercise of the powers conferred by section 36 of the Indian Steam-ships Act, VII of 1884, and in supersession of the rules sanctioned under the Notification of this Department No. 118 Marine, dated the 21st December 1909, the Governor in Council is pleased, with the previous sanction of the Governor-General in Council, to make the following rules to regulate the granting of certificates of competency to Engineers of sea-going steam-ships.

H. H. GREEN,
Offy. Secy. to the Govt. of Bengal.

CHAPTER 1.

GENERAL RULES.

1. *Certificates of competency granted to persons who pass requisite examinations.*—Certificates of competency will be granted to those persons who pass the requisite examinations and otherwise comply with the requisite conditions. For this purpose Examiners have been appointed and arrangements have been made for holding the examinations whenever necessary at the port of Calcutta.

2. *How to apply.*—Candidates for examination must fill up a form of application (form Exn. 3) at the Port Office. The form properly filled in, together with the candidate's certificate of apprenticeship testimonials and discharges, must be lodged with the Port Officer not later than the day before the day of examination. As discharges and testimonials may have to be verified before the candidate can be examined, it is desirable that they should be handed in, together with the form Exn. 3, as many days as possible before the date of the examination which the candidate desires to attend. In the absence of the necessary verification the candidates cannot be examined.

In all cases in which certificates of discharge in the home or other trade which have not been officially issued at a Mercantile Marine Office are produced as evidence of any part of a candidate's qualifying service, they should be submitted to the Port Officer for verification.

3. *Gaps in service.*—The Examiner should be particularly careful to ascertain that there are no gaps in the candidate's service which are not properly accounted for before he is allowed up for examination.

4. *Calculation of service.*—The candidate's services as shown on his discharges should be reckoned by the calendar month, *i.e.*, the time included between any given day in any month and the preceding day of the following month, both inclusive. The number of complete months from the commencement of the period, ascertained in this way, should be computed, after which the number of odd days should be counted. The day on which the agreement commences as well as that on which it terminates should both be included and all odd days should be added together and reckoned at 30 to the month.

5. *Service must be verified.*—Service which cannot be verified by proper entries in the articles of agreement of the ships in which the candidates have served cannot be counted.

6. *Application in special cases.*—In cases where the services of a candidate require verification, or where he is in doubt whether his service complies with the regulations and wishes to submit his case for special consideration, all certificates, discharges and testimonials, together with the form of application,* properly filled in, should be submitted to the Port Officer, who will either deal with the case or transmit it to Government for decision.

* Form Exn. 3, which can be obtained at the Port Office.

7. *Inquiries*.—All other inquiries regarding examinations should be made and dealt with in the same way. The point on which information is sought should be clearly stated, and certificates, discharges, testimonials, &c., should be forwarded when they are material to the inquiry.

8. *Age*.—Should any doubt exist as to the age of a candidate, he will be required to produce a certificate of birth.

9. *Fraud and misrepresentation*.—It is provided by section 104 of the Merchant Shipping Act, 1894, that any person who makes, assists in making, or procures to be made, any false representation for the purpose of procuring, either for himself or for any other person a certificate of competency, shall in respect of each offence be guilty of a misdemeanour, which is punishable, on summary conviction, with imprisonment for a term not exceeding six months, with or without hard labour, or with a fine not exceeding one hundred pounds.

10. *Testimonials—shore service*.—All candidates will be required to produce, in addition to the official discharge certificates, testimonials as to their workshop service and as to their service at sea. The testimonials as to workshop service must be signed by the employer, and must testify to the candidate's conduct and ability, and state what kind of work he was engaged on (e.g., fitting, erecting, turning, machine work, &c.), and for how long (see paragraph 31).

11. *Testimonials—sea service*.—Testimonials as to service at sea must testify to the applicant's sobriety, experience, ability and general good conduct for at least the last twelve months' service at sea preceding the date of application to be examined. They must be signed by the Master and Chief Engineer, or, in the case of testimonials to Chief Engineers, by the Master and Superintending Engineer, and must clearly state whether the applicant was on regular watch and in regular charge of a watch on the main engines or boilers. It is desirable that testimonials of candidates should be endorsed by the Superintending Engineer. No time spent in clerical work will be allowed to count.

12. *Further as to testimonials*.—In cases where a testimonial from the Chief Engineer, or from the Master, is for any sufficient reason not obtainable, one may be submitted from the Superintending Engineer in place of that of the Chief Engineer, and from the Marine Superintendent in place of that of the Master, or from the Managing Owner or Secretary or Chairman of a large Company in place of either; but in every such instance the testimonials must declare that the facts stated are in accordance with the reports made by the Chief Engineer or the Master, as the case may be, or else that the facts are within the writer's personal knowledge.

13. *Penalty for misconduct*.—Candidates who have neglected to join their vessels after having signed articles, or who have deserted their vessels after having joined, or who have been found guilty of gross misconduct on board, will be required to produce satisfactory proofs of two years' subsequent service and good conduct at sea, unless the Government, after having investigated the matter, should see fit to reduce the time.

14. *Physical defects*.—When a candidate is observed to be hard of hearing, or is labouring under any other obvious physical defect, the signatories of his testimonials are required to mention that defect specifically, and to state whether it in any way interfered with the efficiency of the candidate as an Engineer on watch. When these modified testimonials are such as to completely satisfy the Examiner that the defect is not such as to interfere with the efficient discharge of the applicant's duties as Engineer, the examination is proceeded with; otherwise the case is referred to the Government. Candidates afflicted with nervous impediment in speech may write their answers to *viva voce* questions.

15. *Foreign service*.—The testimonials of service of Foreign or British engineers serving in foreign vessels, which cannot be verified by the Port Officer, must be confirmed either by the Consul of the country to which the ship in which the candidate served belonged, or by some other recognized official authority of that country; or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its own merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Government.

16. *Foreign Engineers must know English*.—Foreign Engineers must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them.

9363, dated the 1st October 1913.
from the Commissioner of Police, Calcutta.

THE Commissioner of Police, Calcutta, has submitted a proposal to amend the rules cited in the preamble and has suggested the appointment of a

Committee to consider the following matters :—

I.—With regard to all classes of motor vehicles—

- (a) whether licensed drivers who are reported to be incompetent should be re-examined ;
- (b) whether the use of horns should be regulated ;
- (c) whether any changes are required in the rules relating to traffic ; and
- (d) whether any other changes in the rules are required.

II.—With regard to heavy motor-cars—

- (a) what kind of tyres should be allowed, especially in the case of steam and petrol motor tractors ;
- (b) whether heavy motor-cars should be restricted to certain streets ;
- (c) whether the speed limit of heavy motor-cars should be raised ;
- (d) whether the rules in respect of the use of trailers should be amended ; and
- (e) whether rules should be framed for motor-omnibuses.

III.—With regard to motor-cabs—

- (a) whether the types of motor-cars to be used as motor-cabs should be prescribed ;
- (b) whether the use of “engaged” labels should be prescribed to warn the public that the cab is not available for hire ; and
- (c) whether a schedule of fares should be drawn up and rules framed making penal the non-payment of fares.

2. The Governor in Council accepts the proposal of the Commissioner of Police and desires that a Committee consisting of the following members should consider the question :—

- (1) Commissioner of Police, Calcutta, *President*.
- (2) Chief Engineer and Shipwright Surveyor.
- (3) Mr. E. J. Oakley, of Messrs. Kilburn & Company.
- (4) Mr. R. A. A. Jenkins, of the P. & O. Steam Navigation Company.
- (5) Mr. J. P. Wyness, a representative of the Calcutta Corporation.

If any further rules on the subject or any modifications of existing rules are deemed to be necessary, they should be drafted by the Committee and submitted for the approval of Government.

ORDER.—Ordered that copies of the resolution be forwarded to the Chairman of the Calcutta Corporation ; Mr. J. P. Wyness ; the Chief Engineer and Shipwright Surveyor ; Mr. E. J. Oakley ; Mr. R. A. A. Jenkins, for information, and to the Commissioner of Police, Calcutta, with request that he will be so good as to take the necessary steps to convene Committee.

By order of the Governor in Council,

J. G. CUMMING,

Offg. Chief Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 1st December 1913.

Summary.—During the week under report no rain fell throughout the province except some slight showers in parts of Dinajpur, Darjeeling and Chittagong. The sowing of *rabi* crops continues. Prospects so far are good. Harvesting of winter rice is in rapid progress and the outturn is reported to be good. The condition of sugarcane crop is fairly good. Cattle-disease is reported from eight districts. The average price of common rice has fallen by about 1·3 per cent. as compared with that of the previous week. Agricultural loans were issued in Bankura, Midnapore and Howrah and gratuitous relief was given in Midnapore.

No. 4012 M.R.—The 29th November 1913.—The following is published for general information :—

J. H. KERR,
Secy. to the Govt. of Bengal.

INDIAN FOREST SERVICE.

Regulations as to the appointment of Probationers, 1914.

1. *Appointments.*—The Secretary of State for India in Council will, in the summer of 1914, make **not less than five appointments** of Probationers for the Indian Forest Service, provided that so many candidates are considered to be in all respects qualified.

In making these appointments, he will act with the advice of a Selection Committee.

2. *Applications for appointment.*—Applications for appointment must be made on a printed form to be obtained from the Secretary, Revenue Department, India Office, Whitehall, London, S. W., and to be returned to him not later than **Wednesday the 1st July 1914**. Candidates must be prepared, if called upon, to attend at the India Office, at their own expense, for a personal interview with the Selection Committee within three weeks from that date.

3. *Age limit.*—Candidates must be not less than 19 but under 22 years of age on the 1st January 1914.

Note.—For the year 1914 only, candidates who have taken an honours course (or other course specified in paragraph 5) which under the Regulations of the University, occupies four years, will be subject to the age limits which have hitherto been in force, viz., 19 and 22 on the 1st July of the year in which selection is made.

4. *Nationality, &c.*—Every candidate must be a natural-born subject of His Majesty. He must be prepared to give an undertaking, if selected, that he will not marry before he reaches India. If he does so, he will forfeit his appointment. He must be of good physique, and must produce evidence of character to satisfy the Secretary of State for India in Council that he is suited for the Indian Forest Service.

5. *Qualifications.*—Candidates must have obtained a degree *with Honours* in some branch of Natural Science* in a University of England, Wales, or Ireland, or have passed the Final Bachelor of Science Examination in Pure Science in one of the Universities of Scotland.† A degree in Applied Science will not be considered as fulfilling these conditions. Candidates will be required to produce evidence that they have a fair knowledge of either German or French.

Note.—Applications for appointment will be accepted from candidates who on the 1st July 1914 have already sat at an examination for a degree as mentioned above, but have not learned the result of the examination.

6. Should there be more candidates considered to be qualified in every respect than vacancies to be filled, the Secretary of State reserves the right to require them to pass a competitive examination conducted by the Civil Service Commissioners, on the results of which their final selection would depend. Particulars of this examination, which would be held in August, will be found in Appendix I.

7. *Medical Examination.*—Selected candidates will be required to undergo a strict examination by a Medical Board at the India Office, at which particular stress will be laid on good vision and hearing, and to satisfy the Secretary of State for India that they are physically fit for service in the Indian Forest Department (see Appendix VI).

Candidates who do not satisfy the Secretary of State for India that they are physically fit for appointment to the Indian Forest Service will not be admitted to the competitive examination mentioned in Regulation 6.

* A Moderatorship in Natural Science or in Experimental Science at the University of Dublin will be considered as fulfilling these conditions.

† Graduates in Forestry at the University of Edinburgh are regarded as satisfying the requirements of this paragraph if they pass the Final Examination of that University in some one branch of Natural Science embraced in the degree in Pure Science.

8. *Period of Probation.*—Before appointment to the Indian Forest Department, a probationer will be required :—

- (i) to have obtained, either before selection as probationer, or within the period of two years' probation, the degree or diploma in Forestry at one of the Universities named in the margin ;*
- (ii) to have undergone a special course of instruction in Forestry, under the direction and supervision of the Director of Indian Forest Studies appointed by the Secretary of State for India in Council, in such British and Continental localities as may be selected for the purpose ;
- (iii) to have passed an examination in certain special subjects, namely, Systematic Botany of Indian trees, Indian Geology, Forest Law, Indian Working Plans, and, if required, an Indian vernacular language ;
- (iv) to have undergone a final competitive examination in Forestry (see Appendix II) ;
- (v) to have satisfied the Secretary of State, in such manner as may be determined, of his ability to ride.

The period of probation will in ordinary cases be two years. The Director of Indian Forest Studies will instruct probationers in each case as to the order and manner in which they should fulfil these various requirements.

9. *Charges.*—The probationers will be required to defray all expenses of lodging, board, tuition, and excursions, while at the University, and on practical instruction in Great Britain and on the Continent, with the exception of fees payable to local forest officers in Great Britain and on the Continent.

10. *Allowances.*—The Secretary of State for India in Council will make payments to each probationer at the rate of 120*l.* annually, not exceeding a total of 240*l.* (besides the fees to local officers mentioned above). These payments will ordinarily be made on the following dates in each year :—

	£
On the 1st December	30
On the 1st March	30
On the 1st June	60

The cases of probationers whose probation does not extend over the full two years will be specially considered.

The grant of the allowances is subject to the following conditions :—

- (a) that the progress of the probationer in his studies is satisfactory ;
- (b) that the probationer gives security to refund the payments in respect of this advance, as well as such payments, not exceeding 60*l.* in all, as may have been incurred by the Secretary of State on the probationer's behalf in respect of fees to local forest officers, in the event of his failing to qualify for an appointment in the Indian Forest Service, or not signing the articles of agreement as specified in paragraph 13, or failing to join the Indian Forest Service at the end of the period of probation.

11. *Conduct.*—Every Probationer will be required to conduct himself during the period of probation in a manner satisfactory to the Secretary of State, and to give evidence of satisfactory progress in his studies in such a manner as may be required, failing which, or in the event of serious misconduct, he will be liable to have his name removed from the list of Probationers.

12. *Appointment and Seniority.*—Probationers who comply with the requirements of Regulation 8 within the sanctioned period of time, and also satisfy such other tests as may be prescribed, will be appointed Assistant Conservators in the Indian Forest Department, provided they are of sound constitution and free from physical defects which would render them unsuitable for employment in the Indian Forest Service. Their position in the provincial Forest Lists will be determined by the Secretary of State for India in Council on the report of the Director of Indian Forest Studies ; but

in making selections for the post of Conservator, officers joining the service in the same year are reckoned as equal in seniority unless the Secretary of State for India in Council shall for special reasons have directed otherwise in any particular case or cases.

Probationers will be allowed at the end of the period of probation to state their preference in respect to the Provinces to which they desire to be allotted; but the distribution will be made to the several Provinces according to the needs of the public service, at the discretion of the Secretary of State for India in Council. Officers are, however, at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

13. *Articles of Agreement.*—A probationer is required, on qualifying for appointment as Assistant Conservator, to sign articles of agreement setting forth the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and must engage his own passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

14. *Passage Allowance.*—An allowance on account of passage to India will be paid to each probationer on appointment to the Indian Forest Service, to the amount of 37*l.* 10*s.* for passage to Calcutta, Madras, or Bombay, and 43*l.* for passage to Rangoon.

Notes.—The above is the normal rate of passage allowance. In consequence of the surtax of 10 per cent. at present charged by shipping companies in respect of passages to India the above rates of passage allowance have been raised to 41*l.* 5*s.* and 46*l.* 5*s.* respectively. Should this surtax be removed, these rates will be reduced to those given in paragraph 14.

15. *Salary.*—An Assistant Conservator of Forests will draw pay at the rate of Rs. 380 a month (equivalent to 304*l.* a year when the rupee is at 1*s.* 4*d.*) from the date of his reporting his arrival in India.

16. *Promotion, Leave, Pension and Provident Fund.*—Promotion, leave, and pension will be governed by the Regulations laid down by the Government of India, and applicable to Forest officers, such regulations being subject to any modifications or alterations which may be made in them from time to time by the Government of India, and their interpretation in case of any doubt arising being left to that Government. A copy of the existing regulations can be seen on application at the India Office.

Certain information regarding appointments in the upper controlling staff of the Indian Forest Service, the pay of which has been recently improved, will be found in Appendix III; a summary of information regarding Leave is contained in Appendix IV; and regarding Pensions and the Provident Fund in Appendix V.

INDIA OFFICE,

October 1913.

APPENDICES.

APPENDIX I.—COMPETITIVE EXAMINATION.

In the event of the Civil Service Commissioners being requested by the Secretary of State for India in Council to hold an examination in any year of candidates nominated by him to compete for appointment as Probationers for the above Service, the following will be the subjects in which such candidates will be examined :—

	Maximum marks.		Maximum marks.
1. English Composition	100	5. Physics	... 100
2. German or French	100	6. Geology	... 100
3. Elementary Chemistry	50	7. Botany	... 100
4. Higher Chemistry	100	8. Zoology	... 100

Not more than three of the subjects numbered 4 to 8 may be offered.

Candidates must pass to the satisfaction of the Civil Service Commissioners in the first three subjects.

In the subjects numbered 4 to 8, only marks showing real attainment will be counted towards the order of merit, so that a candidate who has a thorough knowledge of one or two of the optional subjects may obtain on that knowledge alone as many marks as a candidate who offers the maximum number of the optional subjects on a lower standard.

SYLLABUS.

Languages.—The examination in German and French will include translation, composition and conversation.

Sciences.—The standard of the examination in Higher Chemistry, Physics, Geology, Botany and Zoology will be that of the Honours Schools of the Universities.

The examination in Elementary Chemistry will consist of a written paper on the more elementary parts of Inorganic Chemistry, together with the outlines of Organic Chemistry.

APPENDIX II.—FINAL EXAMINATION.

1. With a view to the allocation of the annual Currie Scholarship for Indian Forest students (value about 35*l.*), and to facilitate the allotment of probationers to the several provinces in accordance with paragraph 12 of the Regulations as to appointments in the Indian Forest Service, probationers who have completed their prescribed course of training will be required to undergo a competitive final examination in Forestry.

2. A list of the probationers in order of merit will be prepared by adding together (a) the marks obtained at the final examination, and (b) the marks obtained during the course of practical training in forestry under the control of the Director of Indian Forest Studies. The maximum of marks obtainable under (a) will be the same as under (b).

3. The final examination will consist of an oral examination and three or more papers, as follows :—

- (i) One or more papers in Silviculture, Forest Protection (including Forest Botany and Forest Entomology), and Forest Utilisation (including Forest Engineering).
- (ii) One or more papers in Forest Management, Forest Mensuration, Forest Valuation, and Forest Administration.
- (iii) A paper in General Forestry (Practical) dealing with the work done and with the forests visited during the course of practical training.

4. The final examination will be held at the beginning of October. Arrangements as to the date and place of examination will be made by the Director of Indian Forest Studies. Probationers will not be required to pay any fee for the examination.

APPENDIX III.—LIST OF APPOINTMENTS OPEN TO MEMBERS OF THE IMPERIAL BRANCH OF THE INDIAN FOREST SERVICE.

APPENDIX IV.

[NOTE.—Appendices IV and V are intended merely to show the principal leave and pension rules in the Civil Service Regulations at present applicable to officers appointed to the Indian Forest Service by the Secretary of State from the United Kingdom, without going into minute details, and do not profess to deal with every case that may arise. The rules are subject to alteration, and any disputed question must be decided with reference to the authorised text of the Civil Service Regulations for the time being.]

LEAVE.

Long leave.

1. Furlough and special leave with allowances (*see* paragraph 5) are admissible to an aggregate maximum amount of six years during an officer's service. The amount of furlough "earned" is one-fourth of an officer's active service, and the amount "due" is that amount less any enjoyed.

2. Furlough without medical certificate can, if due, be generally taken after eight years' active service, and again after intervals of not less than three years' continuous service. It is limited to two years at a time.

3. Furlough on medical certificate may be granted (a) to an officer who has rendered three years' continuous service, for not more than two years, but capable of extension up to three years; and (b) to an officer who has not rendered three years' continuous service, up to one year in any case, and up to such longer period, if any (but not exceeding two years in all), as the officer may have furlough "due" to him.

* The officer holding this appointment draws, in addition to the pay of his grade, a minimum local allowance of Rs. 200 a month.

† These appointments are allotted to the various provinces as follows:—Burma, 66; Madras 31; Bombay, 27; Central Provinces, 24; United Provinces, 19; Punjab, 12; Bengal, 12; Assam, 13; and Bihar and Orissa, 5; and 4 Imperial Instructors at Dehra Dun.

‡ Until he has passed the prescribed Departmental Examinations, an Assistant Conservator is liable to stoppage of increments of pay. On passing the examinations he will resume drawing pay under the time scale at the rate to which his length of service entitles him.

§ These draw a local allowance of Rs. 150 a month in addition to their grade pay, with the exception of the President, Forest Research Institute and College, in whose case the allowance is at the rate of Rs. 200 a month. Of these 10 appointments, the four posts of Imperial Instructors have been sanctioned for five years for 1912, for the present.

NOTE.—Under the improved scale of salary shown above, no Exchange Compensation Allowance is granted.

4. The allowances admissible during furlough are—

- (1) During the first two years of furlough without medical certificate and during so much of furlough with medical certificate as may be "due"—half average salary, subject to certain maximum and minimum limits.
- (2) After the expiration of the period for which the foregoing allowances are admissible—one quarter of average salary, subject to certain maximum and minimum limits.

5. Special leave may be granted at any time for not more than six months, with intervals of six years' service; allowances, calculated as during furlough, are given during the first six months only, whether taken in one or more instalments.

Short leave.

6. Privilege leave is a holiday which may be granted to the extent of one-eleventh part of the time that an officer has been on duty without interruption; and it may be accumulated up to three months, earned by 33 months' duty. During privilege leave, the officer retains a lien on his appointment, and receives the salary which he would have received if on duty. An interval of not less than six months must elapse between two periods of absence on privilege leave.

Privilege leave may be prefixed to furlough, special leave, or extraordinary leave without allowances. The whole period of leave thus taken in combination is known as combined leave. Combined leave may not be granted for a period of less duration than six months, nor, except on medical certificate, may it be extended beyond two years.

7. Subsidiary leave in India for a minimum of 10 days, usually with half average salary, is granted to an officer proceeding on or returning from leave out of India, or on retirement, to enable him to reach the port of embarkation or to rejoin his appointment. It is admissible only at the end and not at the beginning of combined leave.

8. Short leave is also granted to enable officers to appear at examinations, &c.

9. Extraordinary leave without allowances may be granted in case of necessity, and, except in certain specified cases, only when no other kind of leave is by rule admissible. It may be granted in continuation of other leave.

General Rules.

10. Leave of absence can never be claimed as of right, and is given or refused at the discretion of Government.

11. When leave allowances other than privilege leave pay are paid at the Home Treasury, or in a Colony where the standard of currency is gold, rupees are converted into sterling at the rate of exchange fixed for the time being for the adjustment of financial transactions between the Imperial and Indian Treasuries, unless any other rate has been exceptionally authorised. But for the present the rate of conversion is subject to a minimum of 1s. 6d. to the rupee. Privilege leave pay when issued from the Home Treasury (this is only admissible when privilege leave is combined with other leave) is converted at 1s. 4d. to the rupee.

APPENDIX V.

(See Note under Appendix IV.)

PENSIONS AND PROVIDENT FUND.

1. An officer of the Indian Forest Service is eligible for a pension on voluntary retirement after completing 20 years' qualifying service or attaining the age of 55 years. If at an earlier date he is compelled to retire from the service through ill-health, not occasioned by irregular or intemperate habits, he becomes eligible for an invalid pension or a gratuity according to the length of his service.

The amount of pension or gratuity is regulated as follows :—

After a service of less than 10 years, an invalid gratuity not exceeding one month's emoluments for each completed year of service.

After a service of not less than 10 years an invalid pension not exceeding the following amounts :—

Years of completed service.	Maximum limit of pension.
	Rs.
10	1,000 a year.
11	1,400 "
12	1,800 "
13	2,200 "
14	2,600 "
15	3,000 "
16	
17	
18	
19	

After a service of not less than 20 years, a retiring pension not exceeding the following amounts :—

Years of completed service.	SCALE OF PENSION. Sixtieths of average emoluments.	Maximum limit of pension.

Officers who have shown special energy and efficiency during an effective service of three years as Inspector-General of Forests or Conservator may, at the discretion of the Government of India, be allowed an additional pension of Rs. 1,000 a year, subject to the condition that the officer must not retire voluntarily before the completion of a total qualifying service of 28 years.

Subject to certain prescribed conditions, rupee pensions are now issued to pensioners residing in countries where the Indian rupee is not legal tender at the rate of exchange of 1s. 9d. the rupee.

2. A General Provident Fund has also been established on the following basis :—

- The contribution is compulsory up to 6½ per cent. on salaries, with voluntary contributions of not more than a further 6½ per cent. Subscriptions on leave of any kind are optional.
- Compound interest on such payments is annually credited by Government to each officer subscribing, the rate being at present 4 per cent. per annum.
- The sum which thus accumulates to the credit of an officer is his absolute property, subject to the rules of the Fund, and is handed over to him, unconditionally, on quitting the service; or, in the event of his death before retirement, to his legal representatives or such other person or persons as, under and subject to the rules of the Fund for the time being in force, may be entitled thereto.
- Other forms of life insurance will, however, if they fulfil certain conditions, be accepted in lieu of the contributions in (a).

APPENDIX VI.

GENERAL PHYSICAL REQUIREMENTS.

[*Notes.*—These Regulations are published for the convenience of candidates and in order to enable them to ascertain the probability of their coming up to the required physical standard. But it must be clearly understood that the Secretary of State reserves to himself an absolute discretion to reject an unfit any candidate whom he may consider, after hearing the opinion of his medical advisers, to be physically disqualified for the public service; and that his discretion is in no respect limited by these Regulations.]

1. A candidate must be in good mental and bodily health, and free from any physical defect likely to interfere with efficient performance of duty.

2. In the examination of candidates the Medical Board will apply the following table of correlation of age, height, and chest girth :—

Age.	Height without Shoes.	CHEST.	
		Girth when expanded.	Range of Expansion.
	Inches.	Inches.	Inches.
19 to 20 ...	62½ and under 65	35	2
	65 " 68	35	2
	68 " 70	35½	2
	70 " 72	36	2
	72 and upwards	36½	2½
21 and upwards ...	62½ and under 65	35	2
	65 " 68	35½	2
	68 " 70	36	2
	70 " 72	36½	2½
	72 and upwards	37	2½

3. *Measurement of height.*—The candidate will be placed against the standard with his feet together, and the weight thrown on the heels, and not on the toes or outside of the feet. He will stand erect without rigidity, and with the heels, calves, buttocks, and shoulders touching the standard; the chin will be depressed to bring the vertex of the head level under the horizontal bar, and the height will be noted in parts of an inch to eighths. No fixed limit of height is imposed.

4. *Measurement of chest.*—The candidate will be made to stand erect with his feet together, and to raise his hands above his head. The tape will be carefully adjusted round the chest, the posterior upper edge touching the inferior angles of the shoulder blades, and its anterior lower edge the upper part of the nipples. The arms will then be lowered to hang loosely by the side, and care will be taken that the shoulders are not thrown upwards or backwards so as to displace the tape. The candidate will then be directed to empty his chest of air as much as possible. This is best done by continuous whistling with the lips as long as sound can be produced. The tape is carefully gathered in during the process, and when the minimum measurement is reached it is recorded. The candidate will then be directed to inflate his chest to its utmost capacity. This maximum measurement will likewise be noted. The girth with the chest fully expanded and the range of expansion between the minimum and the maximum will then be recorded.

5. The hearing must be good.

6. The speech without impediment.

7. The teeth in good order, i.e., decayed or broken teeth must be properly stopped or crowned, and deficient teeth replaced by artificial teeth where necessary for effective mastication.

8. The chest must be well formed, the lungs and heart sound.

9. Rupture, hydrocele, varicocele, varicose veins in a severe degree, or other condition likely to cause inefficiency will disqualify a candidate, unless such condition is cured by operation.

10. The limbs, feet and toes must be well formed and developed, with free and perfect motion of all the joints.

11. A candidate must have no congenital malformation or defect likely to interfere with efficiency.

12. A candidate must not be the subject of chronic skin disease.

13. Evidence of previous acute or chronic disease pointing to an impaired constitution will disqualify.

14. Candidates may, not more than two years before they are qualified to compete for an appointment, undergo a preliminary examination by the Medical Board, which meets at the India Office every Tuesday, under the following conditions :—

(a) Applications must be addressed to the Under-Secretary of State, India Office, Whitehall, London, accompanied by a fee of two guineas, and a statement of the candidate's age.

(b) Candidates must pay their travelling expenses.

(c) Candidates considered to be unfit by the Medical Board at this preliminary examination are not bound to accept its opinion, but may, *at their own risk*, continue their studies, with the knowledge that they will have to submit themselves for a final medical examination by the Medical Board, prior to their appointment.

(d) On the other hand, it must be distinctly understood that the preliminary examination by the Medical Board is held solely for the candidate's information, and that if after that examination he is reported to be apparently fit, he has not on that account any claim to be accepted as physically fit when he presents himself for the final medical examination, upon which alone his acceptance or rejection will depend. Candidates may be considered fit for the Service at the preliminary examination, but may be found at the final examination to be unfit, either on account of some physical defect which did not exist or passed undetected at the preliminary examination, or for other reasons.

REGULATIONS AS TO THE STANDARD OF VISION FOR THE INDIAN FOREST SERVICE.

1. If myopia in one or both eyes exists, a candidate may be passed, provided the ametropia does not exceed 2.5 D, and if with correcting glasses, not exceeding 2.5 D, the acuteness of vision in one eye equals $\frac{5}{6}$ and in the other $\frac{5}{6}$, there being normal range of accommodation with the glasses.

2. Myopic astigmatism does not disqualify a candidate for service, provided the lens or the combined spherical and cylindrical lenses required to correct the error of refraction do not exceed —2.5 D; the acuteness of vision in one eye, when corrected, being equal to $\frac{5}{6}$, and in the other eye $\frac{5}{6}$, together with normal range of accommodation with the correcting glasses, there being no evidence of progressive disease in the choroid or retina.

3. A candidate having total hypermetropia not exceeding 4 D is not disqualified, provided the sight in one eye (when under the influence of atropine) equals $\frac{5}{6}$, and in the other eye equals $\frac{5}{6}$ with + 4 D or any lower power.

4. Hypermetropic astigmatism does not disqualify a candidate for the service, provided the lens or combined lenses required to cover the error of refraction do not exceed 4 D, and that the sight of one eye equals $\frac{5}{6}$ and of the other $\frac{5}{6}$, with or without such lens or lenses.

5. A candidate having a defect of vision arising from nebula of the cornea is disqualified if the sight of one eye be less than $\frac{1}{2}$. In such a case the better eye must be emmetropic. Defects of vision arising from pathological or other changes in the deeper structures of either eye, which are not referred to in the above rules, may exclude a candidate for admission into the service.

6. Squint, or any morbid condition, subject to the risk of aggravation or recurrence, in either eye, may cause the rejection of a candidate. The existence of imperfection of colour sense will be noted on the candidate's papers.

NOTIFICATION.

State Scholarship of £200 per annum tenable in the United Kingdom by European and Anglo-Indian Girls or Women Domiciled in India.

THE scholarship will be granted for educational or medical training and will be tenable in the United Kingdom for a period of three years in the first instance, with possibility of extension in special circumstances, and in particular in the case of medical students, to four and five years. The scholarship will carry with it no conditions as to any subsequent career or service under Government, and no expectation of such employment is held out.

2. The term "educational training" will be held to include (a) training for teaching in secondary institutions, (b) training in domestic sciences, (c) training as teachers of modern European languages, (d) training as music mistresses, (e) training as art teachers, (f) training in Kindergarten methods.

3. The scholar will be selected by the Government of India from among candidates nominated by the Local Governments. Intending candidates are requested to make application to the Inspector of European Schools, Bengal, No. 285, Bow Bazar Street, Calcutta, from whom further particulars may be obtained, in time to reach the Director of Public Instruction not later than January 15th. The application should be accompanied by (1) evidence of having obtained the B.A. degree or, in the case of a medical candidate, a degree in medicine of an Indian University; (2) a medical certificate of fitness to undergo abroad the course of study proposed; (3) a certificate of age; (4) a certificate from some person of recognised position well acquainted with the candidate, to the effect that she is a native of India within the meaning of Statute 33 Vict., Chap. 3, section 6, and that her parents are not resident in India for temporary purposes only; (5) the names, addresses and other particulars of friends or relatives in the United Kingdom to whom the applicant's parents or guardians are willing to commit her guardianship during vacation.

4. The selected candidate will be provided with a second class passage to England, and with a second class return passage if she completes the full period of residence or is compelled by sickness to return within that period.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta,
or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra
and Oudh, Allahabad.

DECLARATION.

No. 5279.—The 4th December 1913.—Whereas certain land was required
Burdwan. by the Bengal Government, under the provisions of
Act I of 1894 and Act XVIII of 1885, for a public
purpose, viz., for Charanpur No. 3 Assisted siding of the East Indian
Railway, which takes off the Sitaramapore-Baraboni Loop at mile 132
feet 2,800 and extends to mile 132 feet 5,000, such land being edged with
pink on the plan L. A. M. A. No. 229, and whereas coal mines are situate
under the said land, and whereas Messrs. Apcar & Company have given
notice to the Government of Bengal, in accordance with the provisions of
Act XVIII of 1885, that the said Company intend to work the seam, known
as the Pouiata seam, and whereas the mines have been inspected by
the officer appointed by the Bengal Government for the purpose under
section 5 (1) of Act XVIII of 1885, and whereas it appears to the Bengal
Government that the working out of the coal of the mines underlying the
said land is likely to cause damage to the surface of the said land and to the

works constructed thereon, and whereas the said Messrs. Apcar & Company have agreed not to work and get minerals underlying the land acquired for their siding, or underlying the land acquired for the branch or other lines with which the siding is connected or underlying the land of the branch or branches connecting the said siding with the main line, in such a manner as to injure or to endanger the safety of the undertaking or any part thereof, nor to claim any compensation for any restricted working:

Now, therefore, the Governor in Council is pleased to declare, under section 5, sub-section (2), clause (b) of the abovementioned Act XVIII of 1885, that the working shall be carried on by the said Messrs. Apcar & Company in the manner and subject to the restrictions below specified, viz.:—

Galleries not exceeding 12 feet in height by 12 feet in width may be driven at distances apart not less than 50 feet centre to centre, leaving pillars not less than 38 feet square, to be left unworked for the support of the acquired land:

Provided that under the land lying between No. 2 pit and No. 3 pit, such galleries shall be driven as shown by the red centre lines on the plan.

Manholes not exceeding six feet in height by three feet in width by four feet in depth may be made where required by any rules made under the Indian Mines Act, 1901.

Any inrush of water, quicksand or soft material shall be reported to the Chief Inspector of Mines without delay.

These restrictions apply to the Ponjata seam only and to the area edged with pink on the plan, and Messrs. Apcar & Company shall give notice under section IV of the Land Acquisition (Mines) Act, 1885, of their intention to work any other seam under such area or to work coal under any other area of acquired line, and that in all the above cases, except to comply with the above conditions, no further excavation shall be made in any of the galleries which already have been driven, the actual heights and widths of which have been carefully recorded on the plan marked L. A. M. A. No. 229 signed by the Chief Inspector of Mines.

The plan referred to may be seen in the office of the Chief Inspector of Mines in India by the parties concerned.

... *Ex-officio.*

Mr. R. D. Mehta, C.I.E.

Babu J. N. Adhikari.

„ Debendra Nath Ghosh.

„ Pran Krishna Pal.

„ Jyotirindra Nath Banarji.

Under section 23 (1) of the Act, the Governor in Council is also pleased to appoint Mr. R. D. Duncan to be Chairman of the Municipality.

No. 2142M.—The 3rd December 1913.—The following draft rules, which, in exercise of the power conferred by section 290 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), His Excellency the Governor in Council proposes to make in supersession of rules (1) to (9) published under Eastern Bengal and Assam Government Notification No. 310M., dated the 19th January 1909, and subject to which the Commissioners of the Narayanganj Municipality may allow communication-pipes to be laid down from the service-pipes of the Commissioners for the purpose of leading water to premises for domestic purposes only, are published for the information of persons likely to be affected thereby.

11. The draft rules will be taken into consideration on the 16th January 1914 and any objection or suggestion which may be received by the undersigned through the District Magistrate and the Divisional Commissioner before that date will be duly considered.

Draft Rules.

1. So long as the Commissioners deem it practicable and consistent with the maintenance of an efficient water-supply, they may allow any owner or occupier of a holding paying a water-rate imposed under the provisions of Part VII of the Bengal Municipal Act, 1884, on the annual value of such holding when such annual value is not less than Rs. 100 to lay down communication-pipes from the service-pipes of the Commissioners for the purpose of leading water to such holding for domestic purposes only, subject to the following rules and conditions.

2. The owner or occupier of any holding requiring water to be laid on to such holding for domestic purposes, or requiring any addition or alteration to an existing water-supply must apply for the same on a printed form to be supplied free of cost at the Municipal Office.

3. A fee of Rs. 2 must be paid to the Commissioners by such owner or occupier for each connection before any work is commenced. This fee must be paid at the time when the application for the connection is deposited, and will be in addition to all other costs and charges imposed under these rules.

4. (i) Each holding shall have a separate connection from a service main, and extensions from the communication-pipe of one holding to another shall not be allowed.

(ii) A branch main may be allowed to rate-payers applying for the same at their own expense and from the branch main connections to holdings may be extended. Such branch main when laid down shall be the property of the Municipal Commissioners.

5. The owner or occupier of the holding in respect of which the connection is required, must pay the entire cost of the connection, including the supply and fixing of the fittings referred to in rule 7, and must also pay the cost of such alterations in or repairs to, roads, drains, sewers, gas or water mains or pipes and the cost of such other works as may be necessitated by, or result from, the work of making such connection.

6. (i) The work required may, at the option of the Commissioners, either be carried out by the Commissioners themselves at the expense of the owner or occupier of the holding in respect of which the work is required, or may be carried out by a person or firm employed by such owner or occupier and approved by the Commissioners.

(ii) No laying down, repair, alteration, removal or extension of any communication-pipes and fittings shall be undertaken except under the direct supervision of the Water-works Engineer of the Municipality.

7. A holding connection shall comprise the following parts or fittings:—

- (a) a brass or gun-metal ferrule inserted in the main supply pipe,
- (b) a galvanized iron communication-pipe from the ferrule to the meter,
- (c) a stop-cock and its surface-box,
- (d) a meter,
- (e) service-pipes from the stop-cock to the taps, and
- (f) taps.

8. (i) All the fittings referred to in rule 7 shall be exact duplicates of standard samples kept in the office of the Commissioners, and approved by them in a meeting.

(ii) All fittings shall be inspected and tested and stamped by an officer of the Municipality before being fixed.

(iii) If any owner or occupier shall desire to adopt any fitting of a pattern different from the standard patterns he must present such fitting for the approval of the Chairman, and any fittings so presented may, if considered satisfactory by the Chairman, be stamped and samples thereof may be purchased and placed among the standard fittings.

9. Every communication-pipe must be capable of withstanding a pressure of a column of water 100 feet in height and must be of a quality approved by the Water-works Engineer of the Municipality.

10. (i) Whenever any communication-pipe has to be laid across a sewer or open drain or in any place where in the opinion of the Commissioners it is liable to injury or contamination, such pipe must pass through a cast-iron pipe of sufficient length to afford due protection to the communication-pipe.

(ii) No more bends or elbows than are absolutely necessary shall be allowed in any communication-pipe. No bend by heating and no gradual bend or long sweep such as is likely to cause the pipe to split shall be allowed.

11. The stop-cock and its surface-box shall be placed as near as practicable to the points where the supply-pipes enter the holding to be supplied, but must not be within any private premises. The surface-box shall be so designed that it can be locked and the key of it shall remain under the control of the Water-works Engineer. The stop-cock shall be capable of adjustment so that the supply to the holding may be regulated thereby.

12. (i) The meter shall be placed as near to the stop-cock as possible and in a position where it can be conveniently examined.

(ii) The meter must be fixed in a brick chamber covered over with a cast-iron surface-box of approved pattern.

(iii) Subject to the provisions of rule 13, no meter must be touched or interfered with in any way except with the permission of the Chairman.

13. The Commissioners shall depute an authorized person to read every meter not less than once a quarter, and shall give notice to the occupier at least twenty-four hours before the reading is recorded.

14. Not more than one cistern connection shall ordinarily be allowed to any holding. All cistern connections shall be provided with a ball-cock. The size of all cisterns permitted shall be regulated by the Commissioners.

15. (i) No connection shall in any case be sanctioned unless and until the applicant makes provision to the satisfaction of the Commissioners for draining away waste water.

(ii) When the holding is within 50 feet of any public drain, a connection from the service-pipes shall not be sanctioned, unless and until the applicant constructs a drain of masonry work for carrying off the waste water to the said public drain.

16. When the Commissioners are satisfied that any owner or occupier of a holding having a connection from the service-pipe has wilfully contravened or has failed to observe any of the above rules and conditions or continues to wilfully waste water after having been warned against doing so, they may turn off the water from such holding for such time as they may think fit.

17. (i) Every owner or occupier of any holding in respect of which a connection has been made under these rules shall be entitled to a supply of 3,000 gallons of water per quarter for each rupee paid by him quarterly as water-rate in respect of such holding.

(ii) For all water in excess of the amount allowed under sub-rule (1) such owner or occupier shall be charged quarterly as follows:—

	Per 1,000 gallons.	Rs. A.
(a) For any excess quantity of water not exceeding one-half of the amount of the free allowance.	0	6
(b) For any excess quantity of water exceeding one-half of the amount of the free allowance, but not exceeding the amount of free allowance.	0	8
(c) For any excess quantity of water exceeding the amount of the free allowance, but not exceeding twice the amount.	0	12
(d) For any excess quantity of water exceeding twice the amount of the free allowance.	1	4

18. If the owner or occupier of any holding which is supplied with water under these rules shall refuse or neglect to pay any of the fees or charges imposed in accordance with these rules for a space of fourteen days after he has been served with a notice of demand for the same, the Commissioners may, at any time after the expiration of that period, and without further notice, disconnect any pipe forming part of the connection made in respect of such holding, and may recover the cost of disconnecting such pipe from such owner or occupier:

Provided that the disconnection of such pipe shall not relieve any person from any liabilities which may have been incurred under these rules.

19. The sizes of the ferrules and the diameter of the communication-pipe referred to in clauses (a) and (b) of rule 7, and the number of taps shall be fixed in accordance with the annual valuation of the holding as follows:—

Annual valuation of holding.	Sizes of ferrule.	Diameter of communication-pipe.	Number of taps.
Under Rs. 200 ...	$\frac{3}{16}$ inch.	$\frac{1}{2}$ inch.	1
From .. 200 to Rs. 399 ...	$\frac{1}{4}$..	$\frac{1}{2}$..	2
.. .. 400 .. " 599 ...	$\frac{3}{8}$..	$\frac{3}{8}$..	3
.. .. 600 .. " 899 ...	$\frac{7}{16}$..	$\frac{3}{8}$..	4
.. .. 900 .. " 1,199 ...	$\frac{1}{2}$..	$\frac{3}{4}$..	5
Rs. 1,200 and above ...	$\frac{3}{4}$..	$\frac{3}{4}$..	6

Every tap shall be of the same size as the pipe to which it is attached, and shall be of brass and of the pattern known as screw-down. Every tap shall be at least three feet above the surface of the earth in the holding.

No. 2156M.—The 4th December 1913.—In exercise of the power conferred by section 27 of the Bengal Municipal Act, 1884. 24-Parganas. (Bengal Act III of 1884), the Governor in Council is pleased to appoint Mr. W. F. Davie to be a Commissioner of the Garden Reach Municipality, in the district of 24-Parganas, vice Mr. H. M. Peat, resigned.

No. 2158 L.S.-G.—The 3rd December 1913.—In exercise of the power conferred by section 138, clauses (i), (j) and (t) of the Bengal Local Self-Government Act of 1885 (Bengal Act III of 1885), read with section 3 of the Bengal, Bihar and Orissa and Assam Laws Act, 1912 (VII of 1912), the Governor in Council is pleased to make the following amendments in the District Engineer's Account Rules published with notification, dated the 1st July 1888, at page 263 of Part IB of the *Calcutta Gazette* of the 4th *idem*, as amended for Eastern Bengal by Eastern Bengal and Assam Notification No. 459M., dated the 18th January 1910, and for Western Bengal by Bengal Government Notification No. 473 L.S.-G., dated the 6th March 1908, namely:—

(1) For rule 2 in Part IXA of the said District Engineer's Account Rules for Western Bengal, *substitute* the following:—

2. (1) An imprest may be granted by the District Board to the District Engineer of such amount as the Board may from time to time fix, provided that it shall in no case exceed Rs. 1,000.

(2) No portion of the District Engineer's cash imprest shall, on any account, be kept outside the safe.

(2) For rule 4 in Part IXA of the said District Engineer's Account Rules for Eastern Bengal, *substitute* the following:—

4. Disbursements by the District Engineer and his subordinates shall, as a rule, be confined to payments not exceeding Rs. 50 and Rs. 20, respectively. All cash payments by the District Engineer and his subordinates shall be met from the imprest.

(3) *Cancel* rules 3A and 4A in Part IXA of the said District Engineer's Account Rules for Eastern Bengal.

(4) *After* rule 4 in Part IXA of the said District Engineer's Account Rules both for Eastern Bengal and Western Bengal, *insert* the following:—

4A. (1) Each officer or subordinate with whom an imprest account is to be kept will, when the account is first opened, receive from the District Board or the District Engineer a round sum as standing advance or imprest which must at once be entered in an account in District Engineer's Form No. 1.

The disbursements from this advance shall be entered daily as they are made, clearly and in full detail; and from time to time as the imprest-holder finds it necessary, the account shall be closed and balanced.

(2) The right hand half page of the said form shall be cut off and sent to the authority from whom the imprest is held, and the counterfoil retained by the disbursing officer. The said account must be supported by the necessary vouchers numbered and attached to it, so as to correspond with the order of the entries in column 2 "Voucher number of District Engineer's Form No. 1."

(3) The authority to whom the account is submitted, after carefully scrutinizing the account with the vouchers as regards the propriety of the payments, the clearness and accuracy of the entries and the sufficiency of the vouchers, shall reimburse the imprest-holder the exact sum expended, so as again to bring the imprest cash in hand up to the original amount.

- (4) The District Engineer shall, when reimbursing his subordinates, incorporate their accounts, item by item, in his own account. He shall also note the amount remitted to his subordinate in red ink in the counterfoil of his own account.
- 4B. (1) The District Engineer and his subordinates who have to pay money out of the imprest shall write the amount of each sub-voucher in words and figures over their initials, and shall stamp each of them immediately "Paid in cash."
- (2) Each entry in the imprest cash-book shall be checked with the sub-vouchers and initialled by the District Engineer or his subordinate, as the case may be, and he shall also sign a certificate in the imprest cash-book whenever the imprest is recouped, to the effect that the balance shown in the cash-book is correct and has been personally verified by him.
- (3) The District Engineer or his subordinate shall also check the book balance of his own imprest with the actual balance in his possession, and shall see that the sub-vouchers are duly receipted by the payees.
- 4C. (1) The totals and balances of all imprest and sub-imprest accounts submitted for recoupment shall be written in words and figures, and all corrections in sub-vouchers and imprest accounts shall be attested by the drawing officer, without which the bill must not be passed.
- (2) When signing his accounts for recoupment, the District Engineer shall compare each entry in the account with the sub-vouchers by stamping them "Cancelled," so that they cannot be used again, and shall total and initial the column "Amount of each payment" in the imprest cash-book and the column "Total" in the abstract of charges, the cross total of which should agree with the former.
- (3) The following further certificate shall be added by the District Engineer in the imprest cash-book:—
 "Received contents and certified that I have compared the entries in the imprest account with the sub-vouchers and have attached them in original to the recoupment bill."
- (4) Every cheque in favour of the District Engineer shall be made payable to "order," and shall be compared by him with the imprest bill in payment of which it is issued at the time of endorsing the cheque for encashment.
- The amount of each recoupment shall be separately remitted to the subordinate, and not with other dues, and shall be checked by the District Engineer once a month with money-order acknowledgment or separate receipt, which must be obtained at once, the entry in the imprest cash-book being initialled in token of check.
- (5) The District Engineer's imprest cash account shall be closed on the 27th of every month, to admit of the transactions up to that date being included in the month's account of the District Board, provided the expenditure does not fall below Rs. 10, which is the minimum amount for which cheques are issued on the treasury.
- 4D. The imprest cash must not be kept in the hand of the Accountant or clerk who writes the imprest cash-book. When any employee acts as cashier in respect of the District Engineer's imprest, he shall deposit a security of not less than Rs. 100, which, in the case of a clerk who is already employed by the Board, will be recovered in ten monthly instalments from his pay. In the case of a new appointment, the security shall be deposited immediately on the clerk joining the appointment.

THE SCHEDULE.—PERSONS WHO ARE ENTITLED TO HAVE THEIR NAMES ENTERED IN THE REGISTER OF MEDICAL PRACTITIONERS.

A BILL

to provide for the registration of Medical Practitioners in Bengal.

Preamble

WHEREAS it is expedient to provide for the registration of medical practitioners in Bengal :

And whereas the sanction of the Governor General has been obtained, under section 5 of the Indian Councils Act, 1892, 55 & 56 Vict., to the passing of this Act; c. 14.

It is hereby enacted as follows:—

Preliminary.

Short title, local extent and commencement.

1. (1) This Act may be called the Bengal Medical Act, 1913; [Cf. Bombay Act VI of 1912, s. 1 (1), (2).]
(2) It extends to the whole of Bengal; and

(3) It shall come into force on the day on which it is published in the *Calcutta Gazette* after having received the assent of the Governor General :

Provided that sections 26 and 27 shall not come into force until a date to be appointed in this behalf by the Local Government by notification in the *Calcutta Gazette*.

Definitions.

2. In this Act,—

[Cf. 59 & 60 Vict., c. 14, Sch. II, Bombay Act VI of 1912, ss. 1 (2), 2 (1).]

(a) the expression “the Medical Acts ” means the Medical Act and the Acts amending the same ; and 21 & 22 Vict., c. 90.

(b) the expression “the Council” means the Council established under section 3.

The Bengal Council of Medical Registration.

Establishment of the Bengal Council of Medical Registration.

3. A Council shall be established and called “the Bengal Council of Medical Registration”; and such Council shall be a body corporate and have perpetual succession and a common seal, and shall by the said name sue and be sued. [Cf. 21 & 22 Vict., c. 90, s. 3; Bombay Act VI of 1912, s. 2 (1); Ben. Act V of 1911, s. 3.]

Constitution of Council.

4. (1) The said Council shall consist of nine members, namely :— [Cf. 49 & 50 Vict., c. 48, s. 7; Bombay Act VI of 1912, s. 2 (2).]

- (a) the Inspector General of Civil Hospitals, Bengal;
- (b) the Principal of the Medical College, Calcutta;
- (c) the Superintendent of the Campbell Medical School and Hospital, Calcutta;
- (d) the Superintendent of the Dacca Medical School;
- (e) a member to be elected by the Syndicate of the University of Calcutta;
- (f) a member to be elected by the Council of the Medical College, Calcutta;
- (g) a member to be elected by the governing body of any Association which is approved by the Local Government as representing Medical Colleges and Schools in Bengal recognized but not maintained by the Government;
- (h) a member to be elected by medical practitioners registered under this Act and resident in Calcutta; and
- (i) a member to be elected by medical practitioners registered under this Act and resident in any part of Bengal outside Calcutta.

} *ex officio.*

(The Bengal Council of Medical Registration.—Clauses 5—9.)

Provided as follows—

- (i) until the Local Government approves an Association as representing Medical Colleges and Schools referred to in clause (y), the said Council shall consist of eight members; and
- (ii) pending the registration of medical practitioners under this Act, the two members referred to in clauses (A) and (i) shall be appointed by the Local Government.

(9) The Inspector General of Civil Hospitals, Bengal, shall be the President of the Council:

Provided that, in the event of his being unable to attend any meeting, the Principal of the Medical College, Calcutta, shall act as President of the Council in his place.

Appointment of members in default of election. 5. If any of the electoral bodies referred to in clauses (e) to (i) of sub-section (1) of section 4 does not, by such date as may be prescribed by rule made in that behalf under section 29, elect a person to be a member of the Council, the Local Government shall appoint a member in his place; and any person so appointed shall be deemed to be a member as if he had been duly elected by such body. [Cf. Bengal Act V of 1911, s. 5.]

Disqualifications for being elected or appointed a member. 6. A person shall be disqualified for being elected or appointed a member of the Council if he— [Cf. Bengal Act V of 1911, s. 9.]

- (a) is not entitled to be registered under this Act; or
- (b) has been sentenced by any Court for any non-bailable offence, such sentence not having been subsequently reversed or quashed, and such person's disqualification on account of such sentence not having been removed by an order which the Local Government is hereby empowered to make, if it thinks fit, in this behalf; or
- (c) is an undischarged insolvent.

Publication of names of members. 7. The name of every member elected or appointed under section 4 or section 5 shall be published by the Local Government in the *Calcutta Gazette*. [Cf. Bengal Act V of 1911, s. 5, 7(4), 8.]

Leave of absence to members. 8. The Council may permit any member, other than an *ex officio* member, to absent himself from meetings of the Council for any period not exceeding six months. [Cf. Bengal Act V of 1911, s. 14; Bombay Act VI of 1912 s. 8 (4) (a).]

Removal of members. 9. (1) The Local Government may, by notification in the *Calcutta Gazette*, declare that any member of the Council, other than an *ex officio* member, shall cease to be a member— [Cf. Bengal Act V of 1911, s. 15; Bombay Act VI of 1912, s. 8 (4) (b), (c).]

- (a) if he has been absent from, or is unable to attend, the meetings of the Council for any period exceeding six consecutive months, or
- (b) if he has, without the permission of the Council, been absent from the meetings of the Council for any period exceeding three consecutive months, or
- (c) if he is a salaried servant of the Government, and if his continuance in office as a member of the Council is, in the opinion of the Local Government, undesirable.

(2) The Local Government shall, by notification in the *Calcutta Gazette*, declare that a member of the Council, other than an *ex officio* member, shall cease to be a member—

- (i) if he has become disqualified for election or appointment as a member for any of the reasons mentioned in section 6; or
- (ii) if he was elected or appointed as being a member of any electoral body referred to in clauses (e) to (i) of sub-section (1) of section 4, and if he is, at the date of such notification, no longer a member of that body.

The Bengal Medical Bill, 1923.

(The Bengal Council of Medical Registration.—Chapters 10.—14.)

Filling of casual vacancies in certain

10. If any member be permitted by the Council to absent himself from meetings of the Council for any period exceeding three months,

[Cf. Bengal Act V of 1911, s. 16; 21 & 22 Vict., c. 90, s. 8; Bombay Act VI of 1912, s. 8 (S).]

or if any member dies, or resigns his membership, or ceases to be a member in pursuance of a notification published under section 9,

the vacancy shall be filled, within one month, by a fresh election or appointment under section 4 or section 5, as the case may be.

Term of office of members.

11. (1) The term of office of the first members elected or appointed under section 4 or section 5 shall commence on such day as may be appointed by the Local Government.

[Cf. Bengal Act V of 1911, s. 17; 21 & 22 Vict., c. 90, s. 8; Bombay Act VI of 1912, s. 8 (1) (S).]

(2) Subject to the provisions of section 9, the term of office of members (other than *ex officio* members) shall be as follows:—

(a) members appointed under proviso (ii) to sub-section (1) of section 4—the period intervening until the election of members under clause (A) or clause (i) of that sub-section, or the appointment of members under section 5 in default of such election;

(b) a member elected or appointed in pursuance of section 10 in the place of a member who has been permitted to absent himself from meetings of the Council—the period of the absence of the latter member;

(c) other members—three years.

(3) Any member shall, if not disqualified for any of the reasons mentioned in section 6, be eligible for re-election or re-appointment at the end of his term of office.

Meetings.

12. The Council shall make regulations to regulate—

- (a) the times and places at which their meetings shall be held,
- (b) the issue of notices convening such meetings, and
- (c) the conduct of business thereat:

[Cf. Bengal Act V of 1911, s. 18; 21 & 22 Vict., c. 90, s. 9; Bombay Act VI of 1912, s. 4.]

Provided that—

- (i) no business shall be transacted at any meeting unless a quorum of five members be present; and
- (ii) all questions arising at any meeting shall be decided by the votes of the majority of the members present and voting, or, in case of an equality of votes, by the casting vote of the President.

Payment of fees and travelling expenses to members.

13. There shall be paid to the members of the Council such fees for attendance at meetings of the Council, and such reasonable travelling expenses, as may from time to time be allowed by the Council and approved by the Local Government.

[Cf. Bombay Act VI of 1912, s. 12.]

Establishment for the Council.

14. (1) With the previous sanction of the Local Government, the Council—

- (a) shall appoint a Registrar,
- (b) may appoint such other officers and such clerks as they may consider necessary for the purposes of this Act, and
- (c) may grant leave to the Registrar and appoint a person to act in his place.

[Cf. 21 & 22 Vict., c. 90, s. 10; Bombay Act VI of 1912, s. 5.]

(2) The Council shall pay to the persons appointed under sub-section (1) such salary and such allowances (if any) as the Council may determine.

(3) The Registrar shall act as Secretary to the Council.

(4) Every person appointed under sub-section (1) shall be deemed to be a public servant within the meaning of section 21 of the Indian Penal Code.

(The Register of Medical Practitioners.—Clauses 15—18.)

The Register of Medical Practitioners.

Orders by Council
for maintenance of
register of medical
practitioners.

15. (1) The Council shall, as soon as conveniently may be after the commencement of this Act, and from time to time as occasion may require, make orders for regulating the maintenance of a register of medical practitioners. [Cy. 21 & 22
Vict., c. 90, s.
14; Bombay
Act VI of 1912,
s. 6.]

(2) The said register shall be kept in such form as may be prescribed by rule made under section 29.

Maintenance of
register by Registrar.

16. (1) The Registrar shall keep the register of medical practitioners in accordance with the provisions of this Act and of any orders made by the Council, and shall from time to time make all necessary alterations in the registered addresses or appointments and the registered qualifications or titles of practitioners, and erase the names of practitioners who have died. [Cy. 21 & 22
Vict., c. 90, s.
14; Bombay
Act VI of 1912,
s. 6.]

(2) To enable the Registrar to fulfil the duties imposed upon him by sub-section (1), he may send through the post a letter to any registered person, addressed to him according to his registered address or appointment, to inquire whether he has ceased to practise or whether his residence or appointment has been changed; and, if no answer to any such letter is received within a period of six months from its despatch, the Registrar may erase the name of such person from the register:

Provided that any name erased under this sub-section may be re-entered in the register under the direction of the Council.

Persons referred to
in Schedule entitled
to be registered.

17. Every person referred to in the Schedule shall, subject to the provisions hereinafter contained, and on payment of such fee as may be prescribed in this behalf by regulation made under section 29, be entitled to have his name entered in the register of medical practitioners: [Cy. 21 & 22
Vict., c. 90, s.
15; Bombay
Act VI of 1912,
s. 7.]

Provided that the Council may refuse to permit the registration of the name of any person—

- (a) who has been convicted of a cognisable offence, as defined in the Code of Criminal Procedure, 1898, or V of 1898.
- (b) whom they have, after due inquiry, found guilty of infamous conduct in any professional respect.

Amendment
Schedule.

18. If the Council are satisfied—

- (a) that any title granted or qualification certified by any University, Medical Corporation, examining body or other Institution is a sufficient guarantee that persons possessing such title or qualification possess the knowledge and skill requisite for the efficient practice of medicine, surgery and midwifery, or
- (c) that any title or qualification referred to in clause 2 or clause 3 of the Schedule is not a sufficient guarantee as aforesaid,

they may make a report to that effect to the Local Government, who may thereupon direct, by notification in the *Calcutta Gazette*,—

- (i) in case (a)—that the possession of such title or qualification shall, subject to the provisions hereinafter contained, and on payment of such fee as may be prescribed in this behalf by regulation made under section 29, entitle any person to have his name entered in the register of medical practitioners, or

[Cy. 49 & 50
Vict., c. 42, s.
3; Bombay
Act VI of 1912,
s. 20.]

(The Register of Medical Practitioners.—Clause 19—25.)

(ii) in case (b)—that the possession of such title or qualification shall not entitle any person to have his name entered in the said register;

and the Schedule shall thereupon be deemed to be altered accordingly.

Information to be furnished to Registrar with application for registration.

19. Every person who applies to have his name entered in the register of medical practitioners—

[Cf. Bombay Act VI of 1912, s. 7.]

(1) must satisfy the Registrar that he is registered under the Medical Acts, or is possessed of some title or qualification referred to in the Schedule, as altered by notifications (if any) issued under section 15; and

(2) if he is registered under the Medical Acts,—

(i) must correctly inform the Registrar of the date of such registration, and

(ii) must furnish the Registrar with a correct statement of the titles or qualifications in respect of which he is so registered, and of the dates on which he obtained them, or

(3) if he is not registered under the Medical Acts—must correctly inform the Registrar of the dates on which he obtained the titles or qualifications which entitle him to claim registration under this Act.

Entry of new titles and qualifications in register.

20. If any person whose name is entered in the register of medical practitioners obtains any title or qualification other than the title or qualification in respect of which he has been registered, he shall, on payment of such fee as may be prescribed in this behalf by regulation made under section 29, be entitled to have an entry stating such other title or qualification made against his name in the register, either in substitution for or in addition to any entry previously made.

[Cf. 21 & 22 Vict., s. 90, s. 30; Bombay Act VI of 1912, s. 6.]

Disposal of fees

21. All fees received by the Council under this Act shall be applied for the purposes of this Act, in accordance with such rules as may be made by the Local Government under section 29.

[Cf. 22, Bombay Act VI of 1912, s. 16.]

Appeal to Council from decision of Registrar.

22. If any person is dissatisfied with any decision of the Registrar, refusing to enter the name or any title or qualification of such person in the register of medical practitioners, he may appeal to the Council, whose decision shall be final.

[Cf. 21 & 22 Vict., s. 90, s. 26; Bombay Act VI of 1912, s. 8(2).]

Erasure of fraudulent and incorrect entries.

23. Any entry in the register of medical practitioners, which is proved to the satisfaction of the Council to have been fraudulently or incorrectly made, may be erased under an order in writing of the Council.

[Cf. 21 & 22 Vict., s. 90, s. 26; Bombay Act VI of 1912, s. 8(3).]

Removal of names from register, and re-entry of names therein.

24. The Council may direct—

(a) that the name of any medical practitioner who has been convicted of a cognizable offence, as defined in the Code of Criminal Procedure, 1898, or whom they have, after due inquiry, found guilty of infamous conduct in any professional respect, be removed from the register of medical practitioners, and

(b) that any name so removed be afterwards re-entered in the register.

[Cf. 21 & 22 Vict., s. 90, s. 29; Bombay Act VI of 1912, s. 9, s. 10.]

Notice of deaths, and removal of names from register.

25. (1) Every Registrar of Deaths who receives notice of the death of any person whose name he knows to be entered in the register of medical practitioners shall forthwith transmit by post to the Registrar of the Council a certificate of such death, signed by him and stating particulars of the time and place of death.

[Cf. 21 & 22 Vict., s. 90, s. 31; Bombay Act VI of 1912, s. 12.]

The Bengal Medical Bill, 1913.

(The Register of Medical Practitioners.—Annual Medical List.—

Rules and Regulations.—Clauses 26—29.)

(2) On receipt of any such certificate, the Registrar of the Council shall erase the name of the deceased person from the register.

Penalty on unregistered person representing that he is registered.

26. If any person whose name is not entered in the register of medical practitioners falsely pretends that it is so entered, or uses in connection with his name or title any words or letters representing that his name is so entered, he shall, whether any person is actually deceived by such representation or not, be punishable, on conviction by a Presidency Magistrate or a Magistrate of the first class, with fine which may extend to three hundred rupees. [Cf. 21 & 22 of 1912, s. 90, Act VI of 1912, s. 18.]

Construction of references in Acts to medical practitioners.

27. The expression "legally qualified medical practitioner," or "duly qualified medical practitioner," and all other expressions importing a person recognized by law as a medical practitioner or a member of the medical profession, as used in any Bengal Act or any Act of the Governor General of India in Council in force in Bengal, shall be deemed to mean a medical practitioner registered under the Medical Acts or this Act; and [Cf. Bombay Act VI of 1912, s. 10]

no certificate given by any medical practitioner or medical officer under any Bengal Act or any Act of the Governor General of India in Council in force in Bengal shall be valid unless such practitioner or officer is registered under the Medical Acts or this Act.

Annual Medical List.

Publication and use of annual Medical List.

28. (1) The Registrar shall, in every year, on or before a date to be fixed in this behalf by the Council, cause to be printed and published a correct list of the names for the time being entered in the register of medical practitioners, and setting forth— [Cf. 21 & 22 of 1912, s. 90, Act VI of 1912, s. 17.]

- (a) all names entered in the register, arranged in alphabetical order according to the surnames,
- (b) the registered address or appointment of each person whose name is entered in the register, and
- (c) the registered titles and qualifications of each such person, and the date on which each such title was granted or each such qualification was certified.

(2) Every Court shall presume that any person whose name is entered in the latest of such lists is duly registered under this Act, and that any person whose name is not so entered is not registered under this Act:

Provided that, in the case of any person whose name does not appear in such list, a certified copy, signed by the Registrar, of the entry of the name of such person in the register of medical practitioners shall be evidence that such person is registered under this Act.

Rules and Regulations.

Rules and regulations.

29. (1) The Local Government may make rules—

- (a) to regulate elections under clauses (e) to (i) of sub-section (1) of section 4; [Cf. Bengal Act V of 1911, s. 127 (1).]
- (b) to prescribe the form of the register of medical practitioners to be maintained under this Act; and [Cf. Bombay Act VI of 1912, s. 6.]
- (c) to regulate the application of fees under section 21. [Cf. Bombay Act VI of 1912, s. 18.]

(2) In addition to the power conferred by section 12, the Council may, with the previous sanction of the Local Government, from time to time make regulations to carry out the purposes of this Act. [Cf. Bombay Act VI of 1912, s. 16 (1).]

The Bengal Medical Bill, 1915.

(The Schedule.)

(3) In particular, and without prejudice to the generality of the foregoing power, the Council may make regulations—

(i) to prescribe the fees chargeable in respect of any registration under this Act ;

(ii) to regulate the keeping of accounts of such fees.

(4) All such rules and regulations shall be published in the *Calcutta Gazette*. [Of. Bengal Act VI of 1912, s. 19(3).]

(5) The Local Government may at any time, by notification in the *Calcutta Gazette*, cancel any regulation made by the Council under this section. [Of. Bengal Act V of 1911, s. 144 ; Bombay Act VI of 1912, s. 19(3).]

THE SCHEDULE.

Persons who are entitled to have their names entered in the Register of Medical Practitioners.

(See sections 17, 18 and 19.)

[Of. 21 & 22 Vict., s. 90, Sch. A.; 39 & 40 Vict., c. 40, s. 3 & 50 Vict., c. 48, ss. 3 (f) 20 ; Bombay Act VI of 1912, s. 7, Sch.]

1. Every person who is for the time being registered under the Medical Acts.

2. Every Doctor, Bachelor or Licentiate of Medicine, or Master, Bachelor or Licentiate of Surgery, of the University of Calcutta, Bombay, Madras, Allahabad or Lahore.

3. Every person who has been trained in a Government Medical College or School in India, or in a Medical School in India not maintained by the Government but recognized by the Local Government, for the purposes of this Schedule, by notification in the *Calcutta Gazette*, and holds a diploma or certificate, granted by the Government, or granted by a Medical School not maintained by the Government but recognized as aforesaid, declaring him to be qualified—

(a) to practice medicine, surgery and midwifery, or

(b) to perform the duties of a Military Assistant Surgeon, Hospital Assistant or Sub-Assistant Surgeon.

STATEMENT OF OBJECTS AND REASONS.

THE objects of this Bill are (1) to provide a means of protecting the public and the medical profession from irregularly qualified practitioners, whose training in medical science has been obtained at unrecognised institutions, and (2) to afford facilities for ascertaining whether any particular medical practitioner possesses recognised qualifications. These objects are met by directing the maintenance of a register of medical practitioners and their qualifications, and by conferring certain privileges upon practitioners who are registered.

II. The Bill is based on the Medical Acts in force in England (21 & 22 Vict., c. 90, and amending Acts), and on the Bombay Medical Act, 1912 (Bombay Act VI of 1912), passed by the Bombay Legislative Council on the 14th March, 1912. It does not prohibit in any way the recovery of charges by unregistered persons, and does not affect the practice of Indian *Kavirajes*, *Vaids* or *Hakims*. Its principal provisions are mentioned in the subjoined notes.

NOTES ON CLAUSES.

1. *Clause 4*—The only duty of the proposed Council of Medical Registration will be to supervise the registration of medical practitioners, and nine members will be sufficient. Four of the members will be principal medical officers of Bengal, three will be elected by public bodies, and two will be elected by medical practitioners themselves. One of the public bodies empowered to elect a member is an Association to be approved by the Local Government as representing Medical Colleges and Schools in Bengal recognized but not maintained by the Government. Pending the approval of such an Association, it is provided that the Council shall consist of eight members only.

2. *Clauses 5 to 12* contain provisions as to the appointment, election, leave, removal and term of office of members of the proposed Council, and as to meetings of the Council. They are based on provisions of the Calcutta Improvement Act, 1911 (Bengal Act V of 1911.)

3. *Clause 13* provides for the payment to members of the proposed Council of fees for attendance at meetings and of travelling expenses.

4. *Clause 14* provides for the appointment and payment of a Registrar and clerks for the maintenance of the register of medical practitioners.

5. *Clauses 15 and 16* provide for the maintenance of a register of medical practitioners, in a form to be prescribed by rule. It is intended that the register should show the name of each practitioner, his address or any appointment he holds, the date of his registration, and the titles or qualifications which entitle him to registration.

6. *Clause 17* declares that every person who is registered under the Medical Acts in force in England, and certain persons who hold diplomas or certificates granted in India, shall be entitled to registration, the proposed Council being however given power to exclude persons of either of these classes who have shown grave defects of character.

7. *Clause 18* empowers the Local Government, on the report of the proposed Council, to admit to registration persons other than those referred to in clause 17 (for example, holders of diplomas granted on the Continent of Europe or in the United States of America), and to withdraw from any class of persons holding diplomas or certificates granted in India the right to be registered.

8. *Clause 19* introduces a detailed procedure for obtaining information required for the compilation of the register.

9. *Clause 20* provides for the entry in the register of titles and qualifications acquired after registration.

10. *Clause 21* directs that the registration fees shall be applied in meeting the expenses of working the Act.

11. *Clause 22* allows an appeal to the proposed Council against orders of the Registrar refusing to enter names, titles or qualifications in the register.

12. *Clauses 23 to 25* provide for the erasure of incorrect entries and the removal of names from the register.

13. *Clause 26* provides a penalty upon an unregistered person representing that he is registered, and clause 27 contains provisions for encouraging registration by imposing certain disabilities upon medical practitioners who are unregistered. It is provided in clause 1 (3) that neither of these provisions shall come into force until specially notified by the Local Government, and they will not be brought into force until sufficient time has elapsed to admit of all practitioners being registered.

14. *Clause 28* provides for the publication of an annual medical list, from materials contained in the register of medical practitioners, and gives the list evidential value. A proviso is added to meet the case of a practitioner being registered between the publication of two annual lists. This list will supersede the list of medical practitioners which is now published annually by the Inspector-General of Civil Hospitals.

15. *Clause 29* gives the Local Government power to make rules, and the proposed Council power to make regulations, for the working of the Act.

QUESTIONS AND ANSWERS.

STARRED QUESTIONS.

The following questions which had been starred, were put and answered—

by the Hon'ble RAI RADHA CHARAN PAL BAHADUR :—

* 1. (a) Will the Government be pleased to state whether it is a fact that a large number of crimes (including murders) are yearly perpetrated over the possession of "char" lands in the districts of Dacca, Faridpur, Pabna, Mymensingh and Bakarganj? Criminal
putes over "C
lands.

(b) Will the Government be pleased to furnish a statement showing the number of criminal cases relating to disputes over "char" lands instituted in those districts within the last fifteen years?

(c) Will the Government also be pleased to show in this statement the number of cases of rioting leading to grievous hurt and murder?

(d) Will the Government be pleased to state whether it is a fact that, in consequence of riots over "char" land, a large number of small landholders are being gradually dispossessed of property, which is being seized by more powerful people?

(e) Will the Government be pleased to state what steps (if any) they have taken as preventive measures?

The Hon'ble Mr. CUMMING replied :—

(a) "Disputes over 'char' lands are common; but it does not appear, after an examination of the figures, that the number of crimes committed is disproportionately large.

(b) Figures are not available for all the districts; but in the districts of Dacca, Bakarganj and Pabna the number of offences committed as a result of disputes over 'char' lands is reported to be 142, 211 and 110, respectively. (In the first-named district the figures are for cognisable offences only.)

(c) The cases of rioting, leading to grievous hurt and murder, in the districts of Dacca, Bakarganj and Pabna are reported to be 16, 14 and 10, respectively. The figures for Mymensingh and Faridpur are not available.

(d) Definite information is not available for all the districts in question. In Bakarganj no cases of dispossession of small landholders from 'char' lands by powerful landholders have been reported for the last 15 years.

(e) In cases of disputes over 'char' lands preventive action is taken by the local officers under sections 144, 145 and 146 of the Criminal Procedure Code; and in the district of Bakarganj disputes have been settled by the timely action of the Revenue officers. The number of cases is not in any district so abnormally high as to call for any special preventive measures."

by the Hon'ble RAI RADHA CHARAN PAL BAHADUR :—

* 2. (a) Are the Government aware of the deplorable condition of the Old Benares Road along the line of the Howrah-Seakhala Railway? Condition of
Old Benares Road

(b) Are the Government aware that the portion of this most ancient and historic Trunk Road commencing from Baigachi to Seakhala is in such a condition that it is practically impossible for either vehicular or pedestrian traffic to use it?

(c) Is it a fact that a portion of this road near Kristorampore which was originally metalled has again lapsed into a *kutchra* road, and that the portion between Chanditala and Seakhala and beyond is absolutely *kutchra* and is now knee-deep in mud, slush and water in most places?

(d) Is it a fact that the District Board gets a considerable share of the earning of the Howrah-Seakhala line?

(e) What is the amount earned by the District Board from the establishment of the railway till now and what amount has been spent during that period for the repair, reconstruction and maintenance of the Old Benares Road over which the Howrah-Seakhala Railway passes?

(f) Will the Government be pleased to state what steps (if any) they intend to take to ensure proper repair and metalling of the unmetalled portion of the Old Benares Road?

The Hon'ble Mr. KERR replied :—

(a) (b) (c) "The Howrah-Seakhala Railway passes over the Old Benares Road for a distance of $10\frac{1}{2}$ miles between Baigachi and Seakhala, of which $2\frac{1}{2}$ miles from Baigachi to Chanditala are metalled and the rest unmetalled. Government are not aware that the condition of the road, which is under the control of the Howrah District Board, is deplorable or impossible for vehicular or pedestrian traffic. The metalling of $1\frac{1}{2}$ th miles of road near Kirtorampore was abandoned in 1897 by the District Board owing to the presence of the Railway and to want of funds. It is not a fact that the *kutchha* portion between Chanditala and Seakhala is knee-deep up in mud, slush and water in most places.

(d) The arrangement between the District Board and the Railway is that the former undertakes to pay to the latter any deficit of net profits below a 4 per cent. dividend while receiving in return $\frac{1}{3}$ rd of any excess over a 4-per-cent. dividend.

(e) The net receipts from the establishment of the Howrah-Seakhala Railway earned by the District Board between 1897 and 1913 amount to Rs. 22,977-14-3. It is impossible to say how much has been spent on that portion of the Old Benares Road over which the Railway passes. The total length of the Old Benares Road which runs through Hooghly district is 50 miles, $48\frac{1}{2}$ being under the District Board and $1\frac{1}{2}$ under the Arambagh Municipality.

(f) Government are not prepared to interfere with the discretion of the District Board with reference to the management of this road."

by the Hon'ble BABU SURENDRA NATH RAY :—

* 3. (a) Has the attention of the Government been drawn to the article "Insanitary Howrah" which appeared in the "Amrita Bazar Patrika" dated the 30th August, 1913, regarding the "Bharpara Swamp"? "Insanitary Howrah."

(b) Will the Government be pleased to state whether the question of improving the sanitary condition of the town is under consideration?

The Hon'ble Mr. SAMMAN replied :—

(a) "The answer is in the affirmative.

(b) No reference has been made to Government on the subject. The matter is primarily one for the consideration of the Municipality, and Government are not prepared to interfere with the discretion of the Commissioners."

by the Hon'ble BABU SURENDRA NATH RAY :—

* 4. (a) In view of the advance in education during the last twenty years, have the Government of Bengal considered the desirability of introducing the trial by Jury in the non-jury districts? Trial by jury in non-jury districts.

(b) Have the Government consulted the High Court on the subject?

The Hon'ble MR. CUMMING^{*} replied :—

(a) "Within the last twenty years the Government of Bengal have considered the desirability of introducing trial by Jury into the non-jury districts. In 1897, the system of trial by Jury was extended to the districts of Chittagong, Mymensingh, Rajshahi and Jessore; and in 1905 to the district of Khulna.

(b) Both in 1897 and in 1905, the Government of Bengal consulted the High Court."

by the Hon'ble BABU SURENDRA NATH RAY :—

* 5. (a) Will the Government be pleased to state whether the Port Commissioners of Calcutta have definitely decided on the construction of a new bridge at Howrah over the Hooghly river in place of the existing floating bridge?

New bridge at the Hooghly river

(b) If so, will the Government be pleased to state the kind of bridge that it has been decided to erect, and the site that the Port Commissioners have decided upon for the purpose?

(c) Will the Government be pleased to state whether the decision of the Port Commissioners in the matter has been submitted to the Government for approval, and whether the Howrah Municipality has been consulted in the matter?

(d) Will the Government be pleased to state what the total estimated cost of the said proposed bridge would be, and when the work is likely to be commenced?

The Hon'ble MR. GREEN replied :—

(a) "The decision as regards the construction of a new bridge over the Hooghly at Howrah does not rest with the Port Commissioners but with Government. The Port Commissioners have submitted certain proposals for consideration and these are now being dealt with by Government.

(b) The type of bridge to be adopted has not been finally decided upon.

The site which has been suggested is that of the existing bridge.

(c) The proposals of the Commissioners have, as stated in reply to question (a), been submitted to Government for approval. The Howrah Municipality has not yet been addressed, but it will be consulted in due course.

(d) The cost of the bridge cannot be estimated until the design has been finally determined. It is believed, however, that the new bridge will cost between 90 and 100 lakhs.

It cannot be stated at present when the work is likely to be commenced."

by the Hon'ble BABU SURENDRA NATH RAY :—

* 6. (a) Will the Government be pleased to state definitely the exact scope of the inquiry to be held by the Committee recently appointed to examine the conditions prevailing in the districts of Bengal, and to specify the particular "conditions" which will come within the purview of the said inquiry?

Objects and scope of the inquiry of the Committee appointed to examine the conditions prevailing in Bengal.

(b) Will the Government be pleased to state whether the Commission has been called upon to report whether the permanent settlement of Bengal can be modified in any way?

The Hon'ble MR. CUMMING replied :—

(a) "The scope of the inquiry to be held by the Committee is indicated in the Press *communiqué* issued on the 17th of October, and the Resolution published in the Calcutta Gazette of the 29th October last.

(b) The answer is in the negative."

by the Hon'ble BABU SURENDRA NATH RAY :—

* 7. (a) Will the Government be pleased to state what action (if any) has been taken on the various suggestions made in the report of the Royal Commission on Decentralisation for relieving the District Officers of a great part of their routine work, so as to leave them more time to mix with the people ?

Relief of District Officers of routine work.

(b) If effect has been given to these suggestions, will the Government be pleased to state what results have ensued from their adoption ?

The Hon'ble Mr. KERR replied :—

(a) "The Royal Commission made the following recommendations on the subject :—

- (1) Devolution to Subdivisional Officers of a large amount of revenue work done by Collectors.
- (2) Provision of separate Subdivisional Officers for the headquarters subdivisions of districts.
- (3) Division of large and heavy districts.
- (4) Lightening the work of the Collector by giving him a Personal Assistant.
- (5) Increase of the existing district staff.

The action taken was as follows :—

- (1) No action has yet been taken to delegate revenue functions to Subdivisional Officers. Certain proposals on the subject are under consideration, but it is unlikely that any final decision will be reached until after receipt of the report of the Committee which is now inquiring into the system of district administration in Bengal.
- (2) The Sadar Subdivisional system has been introduced in all the districts of the Presidency and Burdwan Divisions and in the Rangpur, Bogra, Tippera and Noakhali districts in Eastern Bengal. Proposals for appointing Sadar Subdivisional Officers at Dacca, Mymensingh and Bakarganj are now under consideration.
- (3) The question of the division of the districts of Mymensingh and Midnapore is now under the consideration of Government.
- (4) The late Government of Bengal deprecated the appointment of Personal Assistants for Collectors in view of the legal and administrative difficulties as to the position of the Personal Assistant in the district administration, and advocated the system prevailing in the province of appointing Joint Magistrates and Additional District Magistrates to afford relief to the district officer in times of exceptional pressure or in heavy districts. The late Government of Eastern Bengal and Assam favoured the appointment of additional Magistrates in the larger districts.

Additional Magistrates have been appointed in the districts of Dacca, Mymensingh, Bakarganj, Tippera and Midnapore.

- (5) It has been decided that no general action is necessary, but that the case of each district should be considered when proposals for the increase of staff come up.

(b) The arrangements described above have not been in force long enough to enable any definite pronouncement to be made as to their effects."

by the Hon'ble BABU SURENDRA NATH RAY :—

* 8. (a) Will the Government be pleased to state the result of the deputation of Messrs. C. H. Bompas and S. L. Maddox to study the system of administration in the Madras Presidency a few years ago ?

Result of deputation of Messrs Bompas and Maddox to Madras Presidency

(b) Did their reports suggest schemes for bringing the District Officers in contact with the people ?

(c) Will the Government be pleased to state what action (if any) was taken on the reports of these officers?

The Hon'ble Mr. CUMMING replied :—

(a) "In March, 1910, Mr. Oldham, and not Messrs. Bompas and Maddox, as stated by the Hon'ble Member, was placed on special duty for a period of six weeks for the purpose of studying the system of district administration in the Madras Presidency, with special reference to the recommendation of the Royal Commission upon Decentralization. Mr. Oldham embodied the result of his inquiries in a report.

(b) The report contained certain information and suggestions with regard to the accessibility of the District Magistrate to visitors, the knowledge of the vernaculars and the tours of officers.

(c) The subjects specially referred to in question (b), as having been dealt with by Mr. Oldham, have since been under the consideration of Government, and detailed orders have been passed in which certain of his proposals have been adopted. Many of his other proposals regarding district administration were on the same lines as those of the Decentralization Commission. Some of them have been adopted in the course of dealing with the report of that Commission, and others separately."

by the Hon'ble NAWAB SAIYID HOSSAM HAIDER CHAUDHURI,
KHAN BAHADUR :—

* 9. (a) Are the Government aware of the great inconvenience and difficulty which the public, especially women, are subjected to when they are required to attend courts of law, Sub-Registry offices and similar places, as parties or witnesses, for want of shelter from the rain and the sun?

Want of shelter from the rain and sun to those attending courts of law, Sub-Registry offices, etc.

(b) If so, will the Government be pleased to say whether they intend to take any steps to remove this want?

The Hon'ble Mr. CUMMING replied :—

"Government are aware of the inconvenience to which the question refers. It has been the policy of Government for some years past to set aside a sum of money every year for the construction of witness sheds. A statement is laid on the table showing the expenditure on this object in each Division during the last six years. The amount provided in the current year's budget is Rs. 6,000."

* 10(a). Has the attention of the Government been drawn to a paragraph which appeared in the "Mussulman" of the 19th September last to the effect that Mr. L. S. Bingenmann, Subdivisional Officer, Nator, did not close his court nor stop work in his treasury on the day of the last *Id-ul-Fitr* festival? Alleged disregard of the *Id-ul-Fitr* festival by the Subdivisional Officer, Nator.

(b) Will the Government be pleased to state whether they have made any inquiry into the matter and whether the statements made in the "Mussulman" are correct?

The Hon'ble Mr. CUMMING replied :—

(a) "The answer is in the affirmative.

(b) Government have made an inquiry in the matter. The suggestions that the Court was held and the Treasury opened in the usual way on the 3rd September are misleading. The facts are as follow :—

Cases were fixed both for the 2nd and 3rd September, as it was not known which of these dates would be a holiday. On the 2nd the Subdivisional Officer took up the hearing of a police case in which the witnesses were present and the accused in *kajat*. Being unable to complete the examination-in-chief of all the witnesses on that date, and as he would be absent from Nator on the 4th and 5th September, the Subdivisional Officer arranged to take the examination-in-chief of the three remaining prosecution witnesses on the 3rd. This was done in order to avoid the unnecessary detention of the witnesses and the prolonged confinement of the accused in *kajat*. In no other case were witnesses examined that day, though some cases were ready for hearing, but orders of adjournment or disposal were passed.

As regards the Treasury, the only transaction was the encashment of the Subdivisional Officer's pay bill, which had been presented on the previous day, but too late for encashment."

by the Hon'ble BABU SURENDRA NATH BANERJI :—

* 11. (a) Have the Government received a memorial from the Subdivisions of Tamruk, Contai and Ghatal in the Midnapore district signed by about seven thousand inhabitants, including many persons of position and distinction, praying for the suspension of the Settlement operations for two years in view of the devastation caused by the floods, the effacement of land-marks, the absence of the tenants from the localities and other causes?

Petition for suspension of Settlement operations in certain subdivisions in the Midnapore district.

(b) Will the Government be pleased to state what action (if any) they propose to take in the matter?

The Hon'ble Mr. KERR replied :—

(a) & (b) "Government have received various representations on this subject and have decided that no survey and settlement operations should be undertaken this season in those areas in the Midnapore district which have been affected by floods and which have been divided into circles for the purposes of relief."

by the Hon'ble MAHARAJA RANAJIT SINHA OF NASHIPUR :—

* 12. With reference to the answer given by the Hon'ble Mr. Kerr to the question asked by me at the Council meeting of the 5th March, 1913, will the Government be pleased to state whether they have come to any decision as regards reviving the public examination at the end of the middle school course?

Revival of the public examination at the end of the middle school course.

The Hon'ble Mr. SAMMAN replied :—

"No conclusion has yet been arrived at, but Government expect shortly to have before them full materials for a decision."

by the Hon'ble RAI RADHA CHARAN PAL BAHADUR:—

*13. (a) Will the Government be pleased to state the amount of damage done to property by the recent floods at Contai, thana by thana, under the following heads:—

Floods in
Contai Sub-division

- (i) to Standing crops,
- (ii) to Huts of the inhabitants,
- (iii) to Cattle?

(b) Will the Government be pleased to state what steps have been taken by them to alleviate the present distress of the people affected in that area?

(c) Will the Government be pleased to furnish a statement showing—

- (i) the amount of money sanctioned for agricultural purposes this year for the Contai subdivision and the amount already advanced;
- (ii) how many applications for agricultural loans have been received up to date from each of the flood-affected thanas;
- (iii) how many such applications have been granted and how many refused; and
- (iv) what is the average amount of loan granted?

(d) Will the Government be pleased to state whether it is a fact that some special officers on relief duty are demanding joint-application and joint-security from the inhabitants of a village before granting agricultural loans?

(e) Will the Government be pleased to state the amount of loan that is usually advanced per bigha and the maximum amount that can be advanced to a raiyat?

(f) Will the Government be pleased to state whether they are considering the desirability of relaxing the terms of repayment of loans by instalment, by deferring the payment of the first instalment for one year or by granting such other concession as the circumstances of the case may require?

(g) Will the Government be pleased to state —

- (i) the number of persons affected by the floods in Contai;
- (ii) what measures have been taken to relieve the distress of the people who do not own or possess any land;
- (iii) the amount of money (if any) distributed in gratuitous relief; and
- (iv) how much of this amount was paid from the public treasury and how much from the funds placed at the disposal of Government by private parties?

(h) Will the Government be pleased to state whether it is a fact that people are selling off their cattle at a nominal price for want of fodder?

(i) Will the Government be pleased to state the amount of money spent in purchasing fodder for distribution?

(j) Is it a fact that fodder was sold by Government to the distressed people?

(k) Is it a fact that the Bhagabanpur and Heria thanas and a part of Pataspur and Contai remained under water for over four months and that, in other years, the Bhagabanpur and Pataspur thanas remained under water till January at least?

(l) Was this due to defective drainage?

(m) Will the Government be pleased to state whether they have any scheme in hand for the proper drainage of the Bhagabanpur and Pataspur thanas? If any, will the Government be pleased to lay the papers on the table?

(n) Is it a fact that the Rasulpur river has silted up? If so, is this due to the canalisation of the Sarfai river?

(o) Will the Government be pleased to state whether they have any scheme in view for canalising the Rasulpur river, or throwing open the Sarfai river with a view to the proper scouring of the Rasulpur river?

(p) Have the Government any scheme in view for providing work to able-bodied labourers, and for the relief of the persons unable to work from physical disability or social reasons, till the advent of the next crops in the distressed areas?

(q) Do the Government propose to remit the Chaukidari taxes and to remit and suspend the rates and the land-revenue in the case of the people affected by the floods in question?

(r) Will the Government be pleased to state whether it is a fact that there is a scarcity of pure drinking water in the flooded areas, and if so, what steps are being taken to remedy this defect?

(s) Is it a fact, as reported in the papers, that the distress of the people in Argoal and Bhagabanpur thanas became very acute during the floods, and that cholera is now raging in Argoal? If so, will the Government be pleased to state what measures have been taken to afford medical relief?

(t) Will the Government be pleased to state what measures have been taken to purify the drinking water of the flood-affected areas?

(u) Will the Government be pleased to state whether any inquiries have been made into the causes of the floods in Contai? If so, will the Government be pleased to lay the papers relating to the subject on the table?

(v) Is it a fact that the floods did not subside quickly on account of the defective drainage system existing in the subdivision of Contai?

The Hon'ble Mr. KERR replied :—

(a) (i) "The approximate area in which damage more or less severe was caused to standing crops by the floods was 57,000 acres in Contai thana including Basudebpur, 24,000 acres in Ramnagar, 30,000 acres in Pataspur, 30,000 acres in Egra and 104,000 acres in Bhagabanpur, including Heria. Total 245,000 acres."

(ii) The number of huts destroyed is estimated at about 2,800 in Contai thana including Basudebpur, 250 in Ramnagar, 2,500 in Pataspur, 100 in Egra and 2,500 in Bhagabanpur including Heria. Total 8,150.

(iii) The number of cattle lost by drowning was estimated at 50 in Contai thana including Basudebpur, 20 in Ramnagar, 200 in Pataspur, 20 in Egra and 100 in Bhagabanpur including Heria. (Total 390) It is impossible to estimate the number which has since been lost owing to scarcity of fodder, but the Collector reports that it may be confidently said that there has been no very great or widespread loss on this account.

(b) Loans under the Agriculturists Loans Act have been freely issued. Government has made a special grant of Rs. 1,24,000, of which about, Rs. 70,000 has been already distributed. The affected area has been divided into circles and an officer has been appointed to take charge of each circle for the purpose of granting these loans and distributing gratuitous relief where necessary. The Loans Act has been interpreted on generous lines, and loans have been granted for the rebuilding of houses, the provision of fodder for cattle and also for subsistence, as well as for actual cultivation. Where no

security could be given for loans, gratuitous relief has been distributed to assist in the rebuilding of houses and in the maintenance of cattle as well as in doles for actual subsistence.

(c) (i) The amount sanctioned for agricultural loans is Rs. 1,24,000, of which about Rs. 70,000 has been distributed up to date.

(ii) The number of applications cannot be stated without further inquiry, but the approximate amount of loans granted up to 28rd November, 1913, is Rs. 8,265 in Contai thana, Rs. 6,515 in Basudebpur, Rs. 1,100 in Ramnagar, Rs. 12,504 in Pataspur, Rs. 8,175 in Egra, Rs. 13,169 in Bhagbanpur, Rs. 19,405 in Heria. Total Rs. 69,133.

(iii) Detailed figures are not available, but every application has been carefully inquired into and the Collector reports that it may safely be said that in no case have loans been refused, where the security was sufficient and the need real.

(iv) On the information at present available, the average amount granted to each person is estimated to be as follows :—

					Rs.	A.
Contai	...	...	...	...	13	12
Heria	...	...	...	...	13	14
Bhagbanpur	...	...	...	...	12	15
Pataspur	...	...	...	...	17	0
Egra	...	...	...	...	9	12
Basudebpur	...	...	...	...	22	13
Ramnagar	...	...	...	...	11	12

(d) Most of the loans have been issued on the joint security of several raiyats. This system, which is usually followed in times of scarcity, has been devised to meet the case of applicants who have not sufficient individual security to offer.

(e) The maximum has been fixed by the Commissioner at Rs. 5 per bigha and Rs. 50 to a single individual.

(f) It is proposed to collect the loans in three equal annual instalments, the first of which will be due one year after the issue of the loan. The rules empower the Collector to suspend the realization of any instalment, if he considers this course necessary, and no interest is charged in such cases for the period of suspension.

(g) (i) The population of the area affected by the floods in the Contai subdivision is about 350,000. The greater part of these people no doubt suffered severely in different ways from the floods, but it is estimated that only a small proportion will require relief of any kind from Government.

(ii) Steps have been taken to provide work in the effected areas for all able-bodied persons, who require it, and further action will be taken in this direction as soon as the subsidence of the flood allows earthwork to be pushed on. The Public Works Department and the District Board have been asked to concentrate their resources as far as necessary in this area on the repair of roads and embankments, the digging of tanks and the clearance of khals. The rates paid will be those for ordinary labour. Gratuitous relief has been and will be provided, so long as necessary, for those who are unable to work.

(iii) Rupees 19,920 have been spent on gratuitous relief.

(iv) No funds have been placed at the disposal of Government by private parties, but of the above sum of Rs. 19,920, Rs. 9,367 was disbursed from Government funds and Rs. 10,553 from various relief funds which have been raised. These relief funds are now becoming exhausted, and a further grant will be made by Government to enable gratuitous relief to be continued where necessary.

(h) No reports to this effect have been received by Government, and the Hon'ble Mr. Lyon, who made special inquiries into this matter during his recent visit to the affected area, found that, while cattle were in many places in poor condition, there was no foundation for the rumours that the people were disposing of their cattle to any appreciable extent owing to want of fodder. The Collector reports that there is no ground for believing that the scarcity has led to the sale of cattle on any considerable scale.

(i) The amount of money spent on purchasing fodder for distribution was Rs. 185-3-3. It was found impossible to import fodder into so large an area on a scale that would be effective.

(j) It is reported that one Charge Officer sold fodder to the value of Rs. 7-6-6 to people who were willing and able to purchase it.

(k) It is a fact that portions of the Bhagabanpur and Heria thanas and parts of the Pataspur and Contai thanas remained under water for over 4 months during the current year, and that portions of the Bhagabanpur and Pataspur thanas have remained under water in some previous years up to January.

(l) The answer is in the affirmative.

(m) An officer has been placed on special duty to investigate four separate schemes for the improvement of the drainage of the whole tract which suffered from the recent floods in the southern portion of the Midnapore district.

The schemes are—

- (i) the excavation and sluicing of the Dhunia Khal ;
- (ii) the canalization of the Rasulpur river and the excavation of efficient drainage channels in connection with this canalization ;
- (iii) the improvement of the Panipia khal near Contai ;
- (iv) the improvement of the Pichaboni khal ;

As the schemes have not been fully investigated, it would be premature to place any papers on the table at present.

(n) The Rasulpur river has partially silted up. The canalization of the Sarpai river has to some extent hastened the process of silting, but the silting is mainly due to natural causes. Among the more serious of these are the silting up of other rivers, such as the Bagda and Sadar khals, and the general reclamation of lands for the purposes of cultivation.

(o) A scheme for canalizing the Rasulpur river is under consideration and is one of the four schemes mentioned above. It is not considered that the opening of the Sarpai river again to tidal action would have any permanent effect on the Rasulpur river, and it is not proposed to carry out this suggestion.

(p) As stated above, arrangements have been made to provide work for all who require it. Ample work is at present available along the Hijili Tidal Canal and the Orissa Coast Canal on full wages, but the Public Works Department have difficulty in procuring labourers, as many have gone to the Sundarbans for employment in harvesting the crops there. Later on, there will be ample work for the able-bodied all over the distressed area. For those suffering from acute distress, who are unable to work, arrangements have been made to provide gratuitous relief.

(q) It has been decided to remit for the present quarter, and possibly for the next quarter also, all amounts due for chaukidari tax below a certain limit to be determined by the Commissioner, the pay of the chaukidars being met by Government. The details are at present being worked out by the local officers. Suspensions and remissions of land revenue and cesses will be given where necessary in the Government and temporarily-settled estates

under the ordinary rules, which lay down a definite scale for suspensions and remissions according to the degree of crop failure. The question whether the owners of permanently-settled estates should be allowed a suspension or remission of revenue, if they agree to give their tenants a suspension or remission of rent, is under consideration.

(r) There has been, and is, no scarcity of good drinking water in the flooded area.

(s) The floods have undoubtedly caused considerable distress, particularly to the poorer classes of the population in Argoal and in the Bhagabanpur thanas, but the distress has fortunately so far not deepened into famine. There have been some sporadic cases of cholera, but nothing in the nature of an epidemic outbreak. Five special Sub-Assistant Surgeons have been deputed to the flooded area, where they have been working since August. They have been supplied with injection apparatus for treating cholera patients, as well as with ordinary medicines, and are constantly touring over the affected area and administering medical relief free of cost.

(t) As there has never been any scarcity of good drinking water in the affected areas, no special measures have been required.

(u) A careful inquiry has been made into the causes of the floods in Contai and a detailed report has just been received from the Superintending Engineer, South-Western Circle, which is now under consideration.

(v) Attention is invited to the answer to Question (1) above.

by the Hon'ble RAI NALINAKSHA BASU BAHADUR :—

* 14. Will the Government be pleased to state what is the total amount of money granted by them for the redress of the flood-stricken persons of the Burdwan Division?

Amount of money granted for redress of flood-stricken persons in the Burdwan Division.

The Hon'ble Mr. KERR replied :—

"Government have sanctioned a special grant of Rs. 2,54,900 for agricultural loans and of Rs. 1,00,000 for gratuitous relief in the districts affected by the floods in the Burdwan Division."

by the Hon'ble MAULVI A. K. FAZ-UL-HAQ :—

* 15. (a) Has the attention of the Government been drawn to an article under the heading "Civilian Vagary" in the issue of the "Mussulman" newspaper, dated the 31st October, 1913, commenting on the conduct of Mr. Dunlop, the District Magistrate of the 24-Parganas?

Allegations against the District Magistrate of the 24-Parganas.

(b) Will the Government be pleased to state whether the facts stated in that article are true? If not, what is the correct version of the matter?

(c) Will the Government be pleased to state whether any inquiry has been made into the allegations and what is the result of that inquiry?

The Hon'ble Mr. CUMMING replied :—

(a) "The attention of Government has been drawn to the article in question.

(b) The facts ascertained after inquiry are as follow: Every quarter Magistrates are selected to preside at the distribution of pay to chaukidars at the various police-stations of the district. Maulvi Muhammad Ibrahim was selected to preside at the payment of chaukidars at Jaynagar on the 19th July and Maulvi Bazlur Rahman was selected for Maheshtola for the same date. The orders were communicated to these officers on the 7th and 5th July, respectively. On the 10th July Maulvi Bazlur Rahman asked that a Hindu officer might, if possible, be deputed in his stead, as the 19th was the date of a Muhammadan festival, the *Shab-i-barat*. It was found possible to comply with his request, but a similar request made by Maulvi Muhammad Ibrahim on the same day could not be granted as no other officer was available. The District Officer did not accept the suggestion

that the Sub-Registrar should preside and ordered the Deputy Magistrate to perform the duty.

(c) "No further inquiry has been made."

by the Hon'ble MAULVI A. K. FAZ-UL-HAQ :—

* 16. (a) Has the attention of the Government been drawn to an article in the "Muhammadi" newspaper, in its issue of the 14th November, commenting on the conduct of Mr. Lindsay, the Additional District Magistrate of Bakarganj, in compelling a Muhammadan Deputy Magistrate to come from Jamalpur to Barisal which resulted in his being on board a steamer the whole of the *Baker-Id* day?

Alegation against the Additional District Magistrate of Bakarganj.

(b) Is it true that the Deputy Magistrate had pointed out that he would be deprived of his *Id* prayers if compelled to attend court at Barisal on the 11th instant because he would be on board the steamer on the previous day, viz., the *Id* day?

(c) Is it a fact that the Additional District Magistrate refused to accommodate the Deputy Magistrate even when these objections were pointed out?

(d) Will the Government be pleased to state whether any inquiry has been made into the allegations and what is the result of that inquiry?

The Hon'ble Mr. CUMMING replied :—

(a) "The attention of Government has been drawn to the article in question.

(b), (c) & (d) Government have made an inquiry into the facts. The Deputy Magistrate wrote to the Additional Magistrate of Bakarganj requesting him to fix a date other than the 11th November for his appearance, as the *Iduz-zuha* fell on the 10th November. As the case had already been the subject of protracted inquiry, and eight witnesses were to appear on the 11th for cross-examination, before whose cross-examination it was desirable to examine the Deputy Magistrate, the Additional District Magistrate did not feel justified in postponing the case and informed the Deputy Magistrate that the date could not be changed. The Deputy Magistrate could have avoided travelling on the *Id* day, as the 7th and 8th November were also holidays, and the 9th a Sunday.

Government are of opinion that no intentional or unavoidable inconvenience was caused to the Deputy Magistrate."

The Hon'ble Maulvi A. K. Faz-ul-Haq asked the following supplementary question :—

"With regard to the answer just given to question No. 16, have the Government any information as to whether the case was really finished on that day?"

The Hon'ble Mr. Cumming said :—"I am not in a position to answer that."

by the Hon'ble BABU SURENDRA NATH BANERJI :—

* 17. (a) Has the attention of the Government been drawn to the decision of the Subdivisional Magistrate of Barrackpore in the case in which an Indian workman was assaulted by one Robert O'Brien, an engineer employed in the Alexandra Jute Mill, resulting in his death?

Fatal assault on an Indian workman by an engineer of the Alexandra Jute Mill.

(b) Will the Government be pleased to state what action (if any) they have taken in the matter?

(c) Will the Government be pleased to state whether the Public Prosecutor was engaged to conduct the case on behalf of the Crown?

(d) Will the Government be pleased to state whether they have considered the advisability of passing a standing order that in all trials for assault, in cases where the assaulted person has died, the Public Prosecutor should conduct the prosecution on behalf of the Crown?

(e) Has the attention of the Government been drawn to an article which appeared in the "Bengalee" of the 19th November commenting upon the case and also upon the case of Karoo Musafir?

(f) Will the Government be pleased to state what action (if any) they have taken in the case of Karoo Musafir?

The Hon'ble Mr. CUMMING replied :—

(a) "The attention of Government has been drawn to the case.

(b) Government have decided to move the High Court for the issue of a rule calling on the accused to show cause why the sentence passed on him should not be enhanced.

(c) The prosecution on behalf of the Crown was conducted by the Court Sub-Inspector of Barrackpore who, by virtue of Bengal Government, Notification No. 2507 P., dated the 6th July, 1907, published in the *Calcutta Gazette* of the 10th July, 1907, was a Public Prosecutor for the purposes of this case. Attention is invited to section 5 of Chapter II of the Bengal Practice and Procedure Manual, which lays down that where the charge is of a cognizable offence the prosecution will ordinarily be conducted by the police. If, in the opinion of the District Magistrate, the case is of a complicated and difficult nature rendering the employment of the Government Pleader or of some legal practitioner necessary for a proper prosecution, he may direct the Government Pleader to prosecute. The Government Pleader cannot, however, be deputed to the mufassal without the previous sanction of the Legal Remembrancer.

In this case it was not considered necessary to apply for the services of the Public Prosecutor.

(d) In view of the existing orders referred to above, Government do not consider it necessary to issue any such standing order.

(e) The attention of Government has been drawn to the article in question.

(f) Government have received a report of the case of Karoo Musafir and read the judgment of the Magistrate and are satisfied that, in the circumstances, no action is called for on the part of Government."

by the Hon'ble MAULVI A. K. FAZ-UL-HAQ :—

* 18. (a) Is it a fact that, on the occasion of the last visit of His Excellency the Governor to Barisal, one Maulvi Abdul Aziz, a Sub-Inspector of Police on duty to maintain order, was punished because a person, who considered he had a grievance, had personally handed in a petition to His Excellency?

Punishment
a Sub-Inspector
Police for
of duty.

(b) Has the attention of the Government been drawn to the statement relating to this incident which appeared in the issue of the "Barisal Hitaishi"? Is the account as there set out correct? If not, what are the facts?

The Hon'ble Mr. CUMMING replied :—

(a) "It is a fact that the Sub-Inspector was punished for disregard of orders in connection with the parking of carriages and also for his failure to prevent an unauthorised person from handing a memorial to His Excellency.

(b) The attention of Government has been drawn to the statement in question, which is substantially correct. The Sub-Inspector was awarded one black mark, which was cancelled, in the ordinary course, after six months' good conduct."

by the Hon'ble BABU PRASANNA KUMAR RAY asked :—

*19. With reference to the answer given by the Hon'ble Mr. Finnimore at a meeting of the Council, held on the 2nd April, 1918, to my question regarding the improvement of the pay and prospects of the clerks, draftsmen, etc., in the Public Works Department offices in Bengal, will the Government be pleased to state what progress, if any, has since been made in that direction?

Improvement
the pay and
pects of the
draftsmen, etc.
the Public W
Department of
in Bengal.

The Hon'ble Mr. GREEN replied :—

"The matter has not been lost sight of. The new scheme based on actual experience of the working of Public Works Department offices since the reconstitution of Bengal is now complete, and the orders of Government are about to issue."

by the Hon'ble BABU PRASANNA KUMAR RAY :—

*20. (a) Will the Government be pleased to state whether it is in contemplation to transfer permanently some of the headquarters offices from Calcutta to Dacca?

Transfer of
tain headquarter
offices
Calcutta to Dacca

(b) If so, will the Government be pleased to state which offices will be transferred and when the transfer is likely to take place?

The Hon'ble Mr. CUMMING replied :—

(a) & (b) "The question is still under consideration and Government are not in a position to make any statement."

by the Hon'ble BABU PRASANNA KUMAR RAY :—

*21. Will the Government be pleased to state whether there is any proposal to grant Presidency allowances to the ministerial staff of the Bengal Government offices located in Calcutta?

Grant of Pre

serving in the
offices subordinate
to the Board of
Revenue to the
grades of Sub-
Deputy Collectors

(b) If so, will the Government be pleased to state how many of such appointments have been filled up from the time of enforcement of the rules referred to?

(c) Will the Government also be pleased to state whether similar privileges are enjoyed by the same kind of officers serving under the various other departments?

The Hon'ble Mr. CUMMING replied :—

(a) "The rules now in force are contained in the Notification No. 1650 A.—D., dated the 31st July, 1913, published in the Calcutta Gazette of the 6th August, 1913. Under rule 4 of the Rules for the recruitment of the Subordinate Civil Service, the Board of Revenue makes nominations from among officers serving under it. The Board of Revenue is at liberty to nominate ministerial officers, if it thinks fit."

(b) Since July last no ministerial officer has been appointed to the Subordinate Civil Service on the nomination of the Board of Revenue.

(c) Under rule 4 of the rules to which reference has been made, nominations are also made by the Financial and Revenue Departments."

Supply of
quinine in the
Manikganj and
Tangail Subdivi-
sions.

The Hon'ble Mr. SAMMAN replied :—

"All postmasters and dispensaries in Manikganj subdivision have an adequate supply of quinine. The District Board is also distributing treatments through the panchayats.

In the Tangail subdivision the Municipality are distributing quinine free. All the dispensaries have been supplied with treatments for free distribution and, in addition to this, supply is provided for free distribution in the mufassal post offices."

* 24.(a) Are the Government aware of the general overcrowding of patients, for the last three years, in the Lunatic Asylum in Dacca?

Alleged
crowding
patients
Dacca
Asylum.

(b) If so, will the Government be pleased to state what steps are being taken in the matter?

The Hon'ble Mr. STEPHENSON replied :—

"Government are aware that the Dacca Lunatic Asylum has been overcrowded during the last three years.

Additional accommodation has been provided for 40 patients this year, and the admission of patients from Assam has been stopped. The Central Indian Lunatic Asylum at Ranchi, when it is built, will relieve the pressure on Dacca, and the measures already taken will probably suffice till then."

*25. Will the Government be pleased to state what steps (if any), they have taken, or intend to take, on the representation of the villagers living on both sides of the Eden Canal, as to the silted-up condition of the canal, and praying for the removal of weeds therefrom and the keeping-up of a perennial flow of drinking water therein?

Silted-up condi-
tion of the Eden
Canal.

The Hon'ble Mr. GREEN replied :—

"The Hon'ble Member is referred to the answers given to Question XI (a), (b) and (c) put by the Hon'ble Babu Surendra Nath Banerji at the Council Meeting of the 30th June last.

It is believed that the Hon'ble Member, in making reference to the Eden Canal, includes also such rivers as the Kana Nadi, the Kana Damodar, the Saraswati, etc., which form part of the Eden Canal system. During the last two or three years great difficulty has been experienced in obtaining a sufficient supply of water for the Eden Canal through the Jujuti sluice, owing to the formation of a big 'char' in the river in front of this sluice. A proposal is now under consideration for the construction of a second supply sluice, about 2 miles lower down the river. The Superintending Engineer, South-Western Circle, has been asked to furnish certain information regarding the site of the proposed sluice. By the construction of this new sluice, a great improvement in the supply of water to the Eden Canal is expected, and it will then be possible to send a larger discharge down to flush the Kana Nadi, the Saraswati and the other rivers included in this system. There is also a project for a new canal from the Damodar with permanent head-works at Fakirbaria which is now being revised according to the instructions of the Inspector-General of Irrigation, who inspected the site selected for the proposed head-works last cold weather. The completion of the revised project will take some time, as in view of the recent high floods in the river, some further reconsideration of the project is required.

During the extraordinary flood of August last, a large quantity of the Damodar water which escaped through the several breaches on the left embankment in the neighbourhood of Jamalpur and Tarkeshwar entered into and passed through the Kana Damodar and cleared out the weeds in that channel to a great extent. The Kana Nadi and Saraswati were also flushed by the flood water from the Selimabad breach; but the discharge

was not sufficient to remove the weeds in these channels. Last year weed-clearing was done by hand on 3 miles of the Kana Nadi above the Gopalnagar weir, and on the Saraswati from Sankrail to Kalipur. It is also proposed to take up weed-clearing work on these two channels during next dry season."

by the Hon'ble RAI NALINAKSHA BASU BAHADUR :—

*26. Will the Government be pleased to state whether they have taken, or intend to take, any steps with a view to suggesting to the zamindars, as well as to the taluqdars, of the flood-affected areas the desirability of either granting an abatement of rent for the current year to their raiyats, or taking it from them by convenient instalments, and whether Government intend to grant any concession to the zamindars and taluqdars in case they and the taluqdars express their willingness to act in accordance with the above suggestion?

Abatement of rent for the current year to raiyats in the flood-affected areas

The Hon'ble Mr. KERR replied :—

"Suspensions or remissions of land-revenue will be given where necessary in the Government and temporarily-settled estates, under the ordinary rules, which provide for suspensions and remissions being given on a definite scale proportionate to the degree of crop failure. The question whether the owners of permanently-settled estates should be granted suspensions or remissions of revenue, on undertaking to give their tenants suspensions or remissions of rent, is under consideration."

by the Hon'ble RAI NALINAKSHA BASU BAHADUR :—

* 27. (a) Are the Government aware that the record-room of the Judge's Court, Burdwan, has been disorganised as a result of the inundation of the Court during the recent floods, and that the public are experiencing great difficulty in procuring information and copies of documents in proper time?

Disorganised condition of the record-room of the Judge's Court, Burdwan.

(b) Will the Government be pleased to state what steps (if any) they are taking to remedy this state of affairs?

The Hon'ble Mr. CUMMING replied :—

(a) "Government are aware of the disorganization of the record-room.

(b) Government have sanctioned a grant of Rs. 1,500 for the repair of books, registers, etc., and the entertainment of an extra staff to assist in the reorganization of the record-room."

by the Hon'ble MAULVI MAZHARUL ANWAR CHAUDHURI :—

* 28 (a). Are the Government aware that, ever since the establishment of the Hooghly College and the Hooghly Collegiate School, Hooghly has been a centre of Muhammadan education and that it attracts every year a large number of Muhammadan students, especially of the poorer class, from all parts of Bengal?

Tuition fees of Muhammadan students in the Hooghly College, the Hooghly Collegiate School and the Hooghly Branch School.

(b) Are the Government aware that, owing to the insufficiency of the yearly allotments from the Mohsin Fund towards the payment of the tuition fees of Muhammadan students in the Hooghly College, Hooghly Collegiate School and the Hooghly Branch School, the Muhammadan students in these institutions have, for the last three or four years, had to pay full fees for three or four months in the year, i.e., from December or January to March; and, further, that this year the Muhammadan students of the Hooghly College and the Hooghly Collegiate School are being charged full fees from the month of September, as the whole grant from the Mohsin Fund for the year was exhausted by the month of August, i.e., in five months only?

(c) Is it a fact that the Principal of the Hooghly College made more than one representation for an increased grant from the Mohsin Fund to the Hooghly College and Collegiate School but without success?

(d) Will the Government be pleased to state whether anything can be done adequately to increase the annual grants from the Mohsin Fund to the educational institutions in Hooghly, the native town of Hajee Muhammad Mohsin, from the next financial year?

(e) If there are no other means of suitably increasing the grants from the Mohsin Fund to the Hooghly College, Hooghly Collegiate School and Hooghly Branch School, will the Government be pleased to state whether it is not possible to withdraw the grant from the Mohsin Fund, at present given to Bihar and Orissa, and which was granted to those provinces at a time when they were under the same administration as Bengal, and when the demand for English education among the Muhammadans of Bengal was not so great as it is now, and apply the money thus set free for the benefit of the Schools and College at Hooghly, and, after them, for the benefit of educational institutions in other parts of Bengal?

The Hon'ble Mr. SAMMAN replied :—

(a) "The answer is in the affirmative.

(b) Government are aware of the facts, which are correctly stated in the question.

(c) The answer is in the affirmative.

(d) The distribution of the grants from the Mohsin Fund among the various educational institutions in the Province is made after careful consideration of the claims of each and the funds available. But, in view of the fact brought to notice by the Hon'ble Member, Government will consider the possibility of increasing the grant by retrenchment in other directions.

(e) The subsidy given to Bihar and Orissa from the Mohsin Fund for 'short fee' payments of Muhammadan students is only Rs. 3,200. The Patna College appears to have enjoyed a share of this fund from the year 1874 and certain other institutions in Bihar and Orissa from 1888. The benefit which the withdrawal of this grant would confer on the Bengal Presidency is so slight that Government are unwilling to raise the question at present."

* 29. (a) Will the Government be pleased to state whether it is a fact that out of about 400 Middle English schools in the Burdwan Division only 4 are under Muhammadan management, i.e., one at Kolora in Howrah, one at Uchahar, one at Mahar in Midnapore, and one at Lodna in Burdwan?

Middle English
schools in
Burdwan Divt

(b) Will the Government be pleased to state whether it is true that the Middle English School at Kolora has not succeeded in getting any grant from the Howrah District Board because of want of funds, and that the Middle English Schools at Uchahar and Mahar receive only Rs. 12 and Rs. 10, respectively, a month, and that all attempts to have the grants to these schools increased have failed because of the Midnapore District Board's lack of funds, with the result that the authorities of these three schools are thinking of closing them?

(c) Will the Government be pleased to state whether anything can be done to give a suitable grant to the Middle English School at Kolora and adequately to increase the grants to those at Uchahar and Mahar?

The Hon'ble Mr. SAMMAN replied :—

(a) "The number of Middle English schools in the Burdwan Division on the 31st March, 1913, was only 324, of which 3 were girls' schools. In addition to the four schools mentioned in the Hon'ble Member's question

the following Middle English schools in the Burdwan Division are mainly under Muhammadan management :—

Name of school.	District.
Kusumgram Middle English School	... Burdwan.
Korajgram Middle English School	... } Birbhum.
Margram Middle English School	... }
Sokeddar Middle English School	... }
Joraghat Middle English School	... } Hooghly.
Darila Kundu Middle English School	... }
Talpukur Middle English School ...	... Howrah.

(b) The District Board, Howrah, was unable to sanction a grant to the Kolara Middle English School for want of funds.

The District Board grants to Uchahar and Mahar have been raised to Rs. 16 a month.

Government are not aware that the authorities of the schools contemplate closing them.

(c) Orders are about to be issued sanctioning a monthly grant of Rs. 50 to the Kolara School. It is proposed to give an additional grant of Rs. 24 to the Uchahar School. The case of the Mahar School will be inquired into."

* 30. (a) Are the Government aware that the notification in the "Calcutta Gazette" of the 1st October abolishing the posts of special Inspecting Officers for Muhammadan Education in the Presidency and Burdwan Divisions has created a sense of alarm among the Muhammadans as to the future prospects of the education of their community?

Special Inspecting Officers for Muhammadan Education.

(b) Will the Government be pleased to state whether it is not possible to appoint a special Inspecting Officer for Muhammadan Education in each of the five divisions of Bengal, to report direct to the Assistant Director for Muhammadan Education on the special educational needs and requirements of the Muhammadans in each of these divisions?

(c) If the Government do not propose to appoint special Inspecting Officers for Muhammadan Education in each division, will they please state what special agency or agencies it is intended to employ to keep the Assistant Director of Public Instruction for Muhammadan Education fully informed of the special educational needs and requirements of the Muhammadan community?

The Hon'ble Mr. SAMMAN replied :—

(a) "Government are not aware that the notification referred to has created a sense of alarm among the Muhammadans.

(b) & (c) These questions are engaging the attention of Government."

by the Hon'ble MAHARAJA RANAJIT SINHA of Nashipur :—

* 31. (a) Will the Government be pleased to state whether it is a fact, that the Commissioners of the Murshidabad Municipality, at a special meeting, in pursuance of their resolution, dated the 15th September, 1913, appointed a sub-committee to inquire into the allegations against the Assistant Surgeon Maulvi Dabaruddin Ahmed, of the Murshidabad Charitable Hospital, for not attending a cholera patient who was lying in front of the cholera ward of the said Hospital?

Allegations against the Assistant Surgeon of the Murshidabad Charitable Hospital.

(b) Is it a fact that the said sub-committee, after examining some respectable persons of the locality, submitted a report to the Chairman of the Murshidabad Municipality, who is also the President of the Dispensary Committee, against the conduct of the said Assistant Surgeon?

(c) Is it a fact that, in pursuance of the said report, the Commissioners of the Murshidabad Municipality, at a special meeting held on the 30th September, 1913, asked the Local Government for the transfer of the said Assistant Surgeon?

(d) If so, will the Government be pleased to lay on the table all the papers relating to the case and state what steps (if any) they propose to take in the matter?

The Hon'ble Mr. SAMMAN replied :—

(a), (b) & (c) "The answer is in the affirmative."

(d) Government are not prepared to lay the papers on the table. Full inquiry has been made into the allegations, which have been found by the Inspector-General of Civil Hospitals to be groundless and merely the outcome of private jealousy. Government do not intend to take any further action in the matter."

(b) Have the Government under consideration any scheme for the improvement of the Sanskrit Tols?

(c) If not, will the Government be pleased to state whether they contemplate taking up this matter?

The Hon'ble Mr. SAMMAN replied :—

(a) "A statement giving the information required so far as 1912-13 is concerned is laid on the table. The amount of the grants varies each year as it depends on the examination results, the number of stipends and other considerations."

(b) & (c) "The answer is in the affirmative."

(b) If so, will the Government be pleased to state whether there is any intention to take up the question of co-ordinating the curricula of East Bengal and West Bengal?

The Hon'ble Mr. SAMMAN replied :—

(a) "The answer is in the affirmative.

(b) The question of co-ordinating the curricula of primary and secondary schools in East and West Bengal has been carefully considered, and it has been decided to maintain the two curricula side by side until sufficient experience of their relative merits has been acquired."

36. With regard to the answer given to my Question 18 (b) at the meeting of Council held on the 1st September last, will the Government be pleased to state what would be the probable cost of the erection of additional laboratories and buildings in the Calcutta Medical College to enable the student who are refused admission at present to get themselves admitted into the said College ?

Erection of additional laboratories and buildings in the Calcutta Medical College.

Answer by the Hon'ble MR. STEPHENSON :—

"No proposal has been made to increase the laboratory accommodation at the Medical College, and Government are not in a position to give any estimate of the cost. An increase of accommodation by nearly 400 per cent. would involve entire remodelling of the present buildings and the cost would be enormous."

by the Hon'ble MAULVI MAZHARUL ANWAR CHAUDHURI :—

38. (a) Are the Government aware that the subway leading from the town of Hooghly to Bandel junction station, on the East Indian Railway, remains under water, every year, to a depth of three to four feet, right through the rainy season, with the result that railway passengers to and from Hooghly are put to great hardship and inconvenience, and that even the passage of vehicles through the subway is a difficult and risky matter, as at most times they have to go through with their foot-boards under water ?

Inundation of the subway leading to Bandel junction station.

(b) Is it a fact that complaints as to the inconvenience caused by the inundation of the subway during the rains were made by the people of Hooghly to the Railway authorities as far back as the year 1908 ?

(c) Is it a fact that in June and August of the present year, numerous signed petitions were submitted by the residents of Hooghly to the Commissioner of the Burdwan Division, requesting him to ask the Railway authorities to take effective steps to remedy the inconvenience, and that the Commissioner wrote to the Railway authorities in that behalf ?

(d) Is it a fact that the people of Hooghly again submitted a petition in September last to the Agent of the East Indian Railway reiterating their complaints and grievances ?

(e) Has any scheme been prepared by the Railway authorities permanently and effectively to remove the inconveniences and hardships of the travelling public caused by the present state of the subway leading to the Bandel junction station?

(f) If not, will the Government be pleased to state what action (if any) they intend to take in the matter?

Answer by the Hon'ble Mr. GREEN :—

(a) "The answer is in the negative.

(b) Government are informed by the Agent, East Indian Railway, that complaints as to the inconvenience caused by the inundation of the subway during the rains were made to him from time to time.

(c) The answer is in the affirmative.

(d) The Hon'ble Member's attention is drawn to the reply to Question 38 (b).

(e) & (f) Correspondence is proceeding between this Government and the Railway Company on the subject, and it is hoped that the Railway Company will be able to devise some effective means of removing the inconvenience referred to."

by the Hon'ble MAULVI MUSHARRAF HUSAIN :—

39. Will the Government be pleased to state—

(i) the number of villages comprised in the Presidency of Bengal, and in how many of them cholera broke out during the year 1912-13 ; Cholera in the villages in the Presidency.

(ii) the number of seizures in that year, and how many of them proved fatal ; and

(iii) what amount of expenditure was incurred for the relief of the sufferers during that period ?

Answer by the Hon'ble Mr. SAMMAN :—

(i) "The number of villages comprised in the Presidency of Bengal, exclusive of Municipalities, is 123,258. No information is available as to the number of villages in which there were outbreaks of cholera in the year 1912-13.

(ii) No record is kept of the number of seizures from cholera, and the figures for deaths are compiled by the calendar year. Ninety-five thousand four hundred and sixty-seven deaths from cholera occurred in 15,124 villages during the calendar year 1912.

(iii) It is impossible to say what amount of expenditure was incurred for the relief of the sufferers. A sum of money is set aside in the medical budget each year for expenditure in epidemics, but the main business of the relief of cholera patients is carried out by the ordinary staff at hospitals and dispensaries, and by special medical officers whose services are paid for by the District Boards."

by the Hon'ble RAI RADHA CHARAN PAL BAHADUR asked :—

40. (a) Will the Government be pleased to state whether the engineer in charge of the survey for the proposed railway from Nabharan to Satkhira has submitted his report covering the question of alignment of the line ? Survey of the railway line from Nabharan to Satkhira.

(b) If so, will the Government be pleased to lay the same on the table ?

(c) Will the Government be pleased to state whether the engineer has proposed, in his report, any alignment other than that actually surveyed ?

(d) If so, through what villages would the alternative alignment pass ?

(e) Have the Government considered the question of alignments ?

(f) If so, will the Government be pleased to state whether any particular alignment has been approved of?

(g) If the answer to question (f) is in the affirmative, will the Government be pleased to state through what villages the alignment would pass?

(h) If the question of alignment is still under the consideration of the Government, will the Government be pleased to state whether the local authorities (Collector, Local Boards, District Boards and other local representative and influential bodies) will be consulted before any final decision is arrived at?

Answer by the Hon'ble Mr. GREEN :—

(a) to (d) "The answer is in the negative.

(e), (f) & (g) The question of the alignment has not yet been settled. The matter will be duly considered on receipt of the survey report and the estimates for the construction of the line from the Agent, Eastern Bengal State Railway.

(h) The question of consulting local public opinion further on the subject of the alignment will be considered when the report is received. The investigation made by the Railway authorities is being carried out in consultation with the local civil authorities, and the representations on the subject of alignment which have been made to those authorities by persons interested in the scheme are receiving full consideration."

HIS EXCELLENCY'S ADDRESS.

"GENTLEMEN,—I welcome you here once more. I hope that, during this cold-weather season now beginning, we shall get a good deal of legislative business done. Last January I told you of eight Bills which my colleagues in Executive Council and I hoped, with your assistance, to pass into law. I don't complain of the slowness of our progress; but we have not got on quite so fast as I then hoped we would. We still have to deal with half of these Bills. Two of them—the Bengal Laws Bill and the Bengal Municipal (Sanitary Officers) Bill—have engaged the attention of Council a good deal, and I trust we may very shortly pass them. I merely remind you of the Chittagong Port Bill which still remains to be dealt with. The Calcutta Municipal Loans Bill has not been taken up in Council since last April, because, as you will remember, certain important proposals were made for its modification, which my colleagues and I felt ought to be discussed fully, both with the Corporation and with the Government of India, before dealing with them in this House. The discussions have nearly come to an end and next month we hope to proceed with the Bill.

Two other measures not referred to in January—The Doveton Trust Bill explained at our meeting of the 1st September, and the Bengal Medical Bill to be introduced to-day—may also I hope become law before long.

And there are two others which we should wish, if possible, to deal with during this session—though I don't wish to speak too sanguinely—a Bill to amend the Cess Act of 1880 in view of the recent decision of the Secretary of State to transfer to Rural Boards the proceeds of the Public Works cess hitherto credited to Government, and a Bill to amend the Excise Act.

Several other measures are engaging the attention of the Legislative Department, but it would be vain to pretend that we have any immediate chance of passing them; so I do not refer to any of them beyond saying that every effort will be made to push to completion an amending and consolidating Bill to take the place of the existing Calcutta Municipal Act of 1899. I know that much interest is taken in this matter both inside this House and out of it; but it is one of great complexity involving a good deal of work, and one on which other bodies besides the Bengal Government must have their say. So far as I can judge I see small chance of the Bill

being introduced into Council before the rains session of 1915. Some men of longer and wider experience tell me there will be little chance even then.

Gentlemen, I feel sure you will agree with me that it is the interest of all concerned that the Council should not be burdened with other than budget work while the Financial Statement is under discussion, and I therefore confidently look to you all to help in securing that our present legislative work may be completed by the early part of next March.

It may be interesting to you to know that our Secretary, Mr. Watson—of whose accident we were sorry to hear, and who we all hope will soon be better—is working hard at getting together a library which will be of more use than the library hitherto available to you. Government gave a grant and will continue to give further grants for this purpose and in the course of the next two or three years I hope we shall have a library really worthy of the Council. Want of room here forces us for a time at least to house most of the books in Writers' Buildings, but Government will do its best for you ; our Vice-President, Sir William Duke, and Mr. Watson are taking a great deal of trouble in this matter and Hon'ble Members doubtless will give them their assistance.

You may recollect that last January I told you that I would consider how the accommodation at our disposal could be improved. Many of you take interest in this. I know that among the non-official Members—and they are of course the majority of this House—opinion is practically unanimous that the Bengal Legislative Council ought to be housed in an entirely new building designed specially for the purpose of the Council—as, for instance, is the case in Madras. The objections to this Council room and to our accommodation as a whole, especially in the hot weather, are patent to all. I don't suppose it can be very long before either we must erect a completely new building on some other site or entirely rebuild on a larger scale this wing of Government House. Either alternative will be very costly. Cost must not deter us from anything which is for the good of Bengal, but there are many reasons for not undertaking large expenditure on building at present and, moreover, I dare say many of you look forward to possible changes in the constitution of the Council itself before very many years are over—when Councils have proved themselves to be all or almost all that their admirers in India claim for them, and to possess none or very few of the evil qualities which those more enamoured of another system of Government feared they might develop ; it seems to me therefore that we should probably be wise not to commit ourselves just yet to any definite scheme involving new buildings or large changes in existing buildings.

I have, however, done as I promised—I have gone fully into the consideration of this wing of Government House and have had plans prepared showing how, as I believe, it can be made—at considerable but not unreasonable expense—to give more practical comfort than we have at present with better conditions in which to transact our business. I had hoped to have shown you the plans ere now ; I have not managed that, but you will see them before many days are over. When you do, I hope you will give me the advantage of your advice.

And now I would like to say a few words which I feel prompted to say when I look back on what has happened since last January. You have helped considerably, that is, what as a Council you exist to do. Not only have you helped by criticism and advice to make legislation better than it would have been without your criticism but by your questions and by your resolutions you have called the attention of my colleagues and myself to questions or aspects of questions which we might perhaps have missed. For that I am grateful to you. This Council is not like those assemblies in other countries with which till I came to India I was familiar, which secure good government to their country by keeping in power or removing the individuals who form the executive. The members of such bodies often best perform their functions by purely partisan criticism—but here it is different. Here you have an executive whose duty it is to do all it can for

your country, but which is not dependent for its existence on you. I know speaking for myself at any rate, how often and in how many ways I am ignorant of facts which have a bearing on the problems which an executive Government must face, and how hard one who belongs to another race and has different traditions, often finds it to understand the point of view from which you look at things ; sometimes, often it may well be, I fail even to see things which must appear to you obvious, and equally it cannot always be easy for you to grasp my point of view. Without accurate knowledge there cannot be efficiency either in legislation or in administration, for without accurate knowledge there cannot be the sympathy which is the best guarantee of efficiency. I and my colleagues therefore in the Executive Government cannot be too grateful to you when you enable us to appreciate the ideas of the people for whose good government we are responsible, and when you point out to us any deficiencies which we might overlook ; but we want you to give us even more help. I don't know that you, non-official Members, always quite realize how much help you can give us : perhaps you do not quite realize how much you Indian non-official members can do for Bengal and for your own fellow countrymen by help of this sort ; I believe if you do fully realize it, you will be even more anxious than you are to give us help. I will try to explain to you what I mean. Sometimes questions come to us, or ideas are put before us, which take a good deal of time on the part of our officers to investigate and which turn out to be based on mere rumours or incomplete statements of facts, questions of a sort which would not be admitted knowingly in, for instance, the House of Commons, where every member is expected to hold himself responsible for the accuracy of facts on which he relies ; and here in India it seems to me to be even more important than it is in England to make certain of any facts. Our officers here are not too numerous in proportion to the population : they do a great deal if they keep abreast of such part of their work as is helpful to the people for whom they are paid to work ; they have quite enough at any rate to do with routine work, which has to be done whether it be useful or not, and the use of which is often not apparent on the surface. I fear that when such men have, as they sometimes have, to investigate a matter, which would be serious if true, only to find it of no importance because it is not true, they naturally become sceptical and disinclined to look into other things into which it would be well if they did look thoroughly. I think you may be able to help a great deal in that matter. And I hope you will be thinking of this, for I am inclined to expect that, in the interest of good administration, we may have somewhat to modify our rules about questions perhaps in the directions indicated by the House of Commons Rules, and if so I shall want your help. Then, again, I feel sure that nothing will do more to secure good Government for Bengal than if the members of this Council show themselves to be thoroughly practical, as well as full of independence ; you cannot be too full of independence in your views, provided only those views are firmly based on knowledge and your aims have been well thought out. My Government will always, I hope, listen to the views expressed here and will try to find a common point where our aims and your aims can unite ; but this will only be brought about in proportion as we show each other what our real aims are. I don't say we don't do this, but I think there must be a risk—slight perhaps but still a risk—of your sometimes not doing it, and of our sometimes not doing it, if officials and non-officials get too much into the habit of treating each other as necessarily opposed. Government and opposition cannot exist in our assembly in the same sense as they exist in England, at any rate if those who are not members of Government are to work effectively for their country. You non-official members beat us—the Executive Government—once, not long ago. I was not sorry when you did it, for it showed you what you could do. You may beat us again ; and it may be well that this happens sometimes ; but power carries with it responsibility, and I trust you will resist all temptation to beat us merely for the sake of beating us. I hope this not because I wish to avoid trouble for myself or for Government, but because I am anxious for the reputation of Council Government in India and especially in Bengal. When the non-official members beat the Government nothing particular need necessarily

happen. Government can go on just the same as if it had not been beaten ; Government will always, I hope, examine carefully any question on which it has been beaten, and if it honourably can, will meet the views of the non-official majority ; but it seems to me that, if once the beating of Government were to become common at the hands of men voting with a light heart against Government without any clear and well-thought-out idea of what the result would be if what they support is or is not carried out, a blow will be struck not to the prestige of Government but to the prestige of the Council, and that will be a great set-back to Indian progress. For the honour of Bengal it behoves the politicians of Bengal to recognise their responsibilities, to shape their political conduct deliberately, and to think out results. It specially behoves us all to be circumspect just now. Things have happened in Bengal which we all deplore : such things may happen again. I don't believe things such as I refer to will be common ; I feel sure they are not generally approved ; but they have happened. I quite sympathise with your reluctance to believe in such things, and with your hope that officials may perhaps at times have been unduly suspicious. Nothing hurts one more than to find that any one whom one loves or whom one admires ~~has~~ done things which one must hate or despise. You love and admire your country and I sympathise with you in your jealousy for the honour and reputation of Bengal. But Government, too, is jealous for the honour of Bengal, for it is by the state of Bengal that our Government must be judged. We must, if Bengal is to hold its proper place, all work together ; there is much wanted, much in the way of education, much in the way of development of the capacities of the Bengalee, which wants careful working out, and which can only come to a successful issue if both officials and non-officials unite in giving each other a fair chance. I am not going to elaborate this idea. I think you understand me well enough. I would merely say once more that as Governor I thank all of you, officials and non-officials, in this Council for the help you have given to my colleagues and myself in our work and I look confidently to you to continue giving us that help."

LEGISLATIVE BUSINESS.

THE BENGAL LAWS BILL, 1913.

"The Hon'ble Sir William Duke moved that the Bengal Laws Bill, 1913, as further amended by the Select Committee, be passed.

He said :—"It will be observed that the report of the Select Committee, which, with the exception of myself, consisted entirely of legal members of the Council, is unanimous. I need therefore say very little to recommend the Bill to the Council.

Its object is to assimilate the law in the two portions of the Province which were united into this Presidency on the 1st of April, 1912. The procedure followed has been, when the law in the two parts of the Presidency was diherent, to select that which was most up to date or otherwise most desirable, and to repeal the other.

The only exception to this course is that the Select Committee have approved of two small substantive amendments of Bengal Act III of 1885. This Act had been amended in Western Bengal by the Bengal Local Self-Government Amendment Act of 1908 which the Bill extends to Eastern Bengal ; but it was felt that it was desirable that these two new amendments—the one subjecting the action of Divisional Commissioners in making appointments to District and Local Boards to the administrative control of the Local Government and the other empowering District Boards to establish scholarships for the furtherance of technical education, should also be passed into law. It is not likely that there will be a general amendment of the Local Self-Government Act for some time to come, and it did not seem worth while to make these petty amendments into a separate legislative measure. Accordingly, the opportunity was taken to embody them in the

Laws Bill, although it may be admitted that they hardly come within the legitimate scope of such a measure. Had they been matters of much intrinsic importance, or of a controversial character, it would not have been proper. But it is merely a case of the extension of minor desirable improvements regarding which there seems to be no difference of opinion, and I do not think it will form a precedent for turning a laws Bill into an omnibus measure. I therefore move that the Bill be now passed into law."

The motion was put and agreed to.

THE BENGAL LEGISLATIVE RULES, 1912.

The Hon'ble MR. CHAKRAVARTI said :—

"May I, before the Hon'ble Sir William Duke moves the amendments to the Bengal Legislative Rules, make a suggestion? In this part of the House we have felt that there is a necessity for the extension of time in order to enable your Lordship's Council to consider matters of amendment and other matters, and therefore more time ought to be given. But with regard to some of the matters we feel that a sufficient amount of time has not been accorded to us, and I am only making a suggestion, and I hope it will find favour with your Lordship as well as with the Hon'ble Sir William Duke, that this matter ought first to be considered by a small Committee, and then it will come before your Lordship's Council in a shipshape form. The ordinary method, as has been pointed out, was not followed because it was thought that it would be for administrative convenience and expedition that this matter should be considered by the Council, as a whole, at once, but we find that, especially with reference to one matter, the time for consideration of the amendments to the report has been cut down from one week to less, and our desire is to have a little more time. As the object of the amendments is for the purpose of considering the convenience of both sides, I sincerely hope that the Hon'ble Sir William Duke will see his way to accept my suggestion."

The Hon'ble SIR WILLIAM DUKE said :—

"I am somewhat surprised that this suggestion is made; because I believe I am correct in saying that the papers were circulated on the 14th November, and no amendments or suggestions have been received since then. I believe that, previous to that, Mr. Watson consulted the non-official members of Council, or at any rate warned them of what was coming. The proposals in their present form were, I think, circulated on the 14th November,—that is the date the circular bears—and we have heard nothing of it since."

The Hon'ble MR. CHAKRAVARTI said :—

"I am afraid there is some misapprehension; it was not circulated as early as the date the Bill bears, at least so far as I am concerned I did not get it then. Further, there was a considerable amount of misapprehension as to the method in this particular instance, being an informal one, whether the amendments should be sent in beforehand. It was not in the nature of a report of the Select Committee, for which amendments, according to rule, have to be sent in within a particular time."

The Hon'ble SIR WILLIAM DUKE said :—

"There may have been misapprehension, but the Bill itself contained an explanatory note as to the procedure to be followed, from which, I think, it might have been inferred that whatever was to be done was to be done in Council. The Hon'ble Member is also under a misapprehension that the time has been curtailed. The time has not been curtailed by any means. In every case the time allowed for considering reports and making amendments has been increased, and it is desirable, I think, that we should have the benefit of these rules before we proceed to any heavier legislation, and it would be regrettable, and a misfortune, I think, if they were not passed

before any Bill of any considerable magnitude comes into force. It has also not been the practice in this Presidency, at any rate for two years, to employ the procedure of Select Committee with regard to the amendment of our Business Rules, and I do not know whether it would be convenient to employ it on this occasion. At the same time I have no wish to rush the Council. If it is understood that it is the desire among non-official members that they should have more time, I have no particular objection to postponing the matter to the next meeting of the Council. Perhaps your Excellency will obtain the opinion of the other side of the House. There is nothing in the Rules that I cannot explain now."

The Hon'ble BABU SURENDRA NATH BANERJI said :—

"I just want to say this : There does not seem to me to be any special case for urgency, because there are no heavy Bills which are likely to come before us within any measureable distance of time. Judging from the statement which your Excellency has just read out to us, and it seems to me that there is no special case for hurry in this matter. That being so, I think it would meet the wishes of both sides of the House, if there was a little time allowed and a small Committee appointed to go into the matter and submit their recommendations to the Council. I think that would be a procedure which would commend itself to the views of both sides of the House, and I therefore gladly recommend it."

The Hon'ble MR. APCAR said :—

"May I intervene and say that there is no necessity for any protracted delay? The matter may be considered within a week and everything settled. I am sure that our aims are the same, and the only thing is whether we have arrived at a common point of view. I think, if we are allowed to meet and discuss this measure, we could easily come to an understanding at a simple meeting. The only objection taken now is that there may be delay; that can easily be got over by your Lordship's Government by convening a small Committee, selected on your own initiative, and putting a limit as to the time. I do not know why the whole matter should not be settled within a week or ten days, and that would be well within time before any big measure could be brought forward. I earnestly ask that there should be this reference, because there are matters which require consideration from our point of view."

The Hon'ble RAI RADHA CHARAN PAL BAHADUR said :—

"I do not know whether the Hon'ble Babu Surendra Nath Banerji has moved for reference to a Committee, and I don't know whether under the rules he can move that, but I think he has expressed the sense of this part of the House if he made the suggestion; because there are certain important points on which we should like to submit our views to Government, and if there was a mixed Committee made up of official and non-official members, our suggestions would be given due consideration by that Committee instead of a protracted debate in this Council."

His Excellency the PRESIDENT said :—

"I do not think we should waste any more time, but postpone the matter. There is no motion."

The consideration of the following motions was accordingly postponed to the next meeting of the Council.

1. The Hon'ble Sir William Duke to move that in rule 21 of the Bengal Legislative Rules, 1912, for the word "five", the word "ten" be substituted.

2. Also to move that in rule 22 (1) of the same rules, for the word "five", the word "fifteen" be substituted.

3. Also to move that in rule 22 (2) of the same rules, for the word "six", the word "sixteen" be substituted, and for the word "five", the word "fifteen" be substituted.

4. Also to move that in rule 22 (3) of the same rules, for the word "fifteen", the word "thirty" be substituted.

5. Also to move that in line 1 of rule 22 (5) of the same rules, after the word "shall", the brackets and words "(if possible)" be inserted.

6. Also to move that in rule 41 (2) of the same rules, for the words "when he has not been furnished for a week with a copy of the Report", the following be substituted, namely,—

"unless such Report was forwarded to him at least five days before the final date fixed for the receipt of notice of amendments";

7. Also to move that for the first three lines of rule 51 of the same rules, the following be substituted, namely,—

"A list of the business to be brought forward at a meeting of Council shall, if time permits, be despatched by the Secretary to each Member at least four days before such meeting."

8. Also to move that in the proviso to rule 51 of the same rules, for the words "sent to each Member at least one day before the meeting," the following be substituted, namely,—

"sent so as to reach each Member at least two days before the meeting."

9. Also to move that for rule 54 (1) of the same rules, the following be substituted, namely,—

"(1) to draft all Bills originated by the Government of Bengal and the Reports of Select Committees to which such Bills are referred; to settle the Statement of Objects and Reasons appended to such Bills and to prepare the Notes on Clauses (if any).

THE BENGAL MUNICIPAL (SANITARY OFFICERS) BILL, 1913.

The Hon'ble Nawab Syed Shams-ul-Huda presented the report of the Select Committee on the Bengal Municipal (Sanitary Officers) Bill, 1913, and moved that the said report be taken into consideration.

The motion was put and agreed to.

His Excellency then called upon the Hon'ble Rai Nalinaksha Basu Bahadur to move amendment No. I standing in his name in the Appendix to the List of Business.

The Hon'ble RAI NALINAKSHA BASU BAHADUR said :—

“My Lord, in view of the agreement that we have now come to with the Hon'ble Member in charge of the Bill, with regard to the provisions of the Bill, we do not press the amendments.”

The Hon'ble BABU SURENDRA NATH BANERJI said :—

“I think it would be satisfactory to all parties, and help the discussion, if the extent of the acceptance of these amendments was announced to us by the Hon'ble Member in charge of the Bill. Then we shall know in what position we stand, and what amendments are approved and what are rejected by the Government.”

The Hon'ble NAWAB SYED SHAMS-UL-HUDA said :—

“I am quite glad at the outset to indicate the amendments which we are prepared to accept as that may have the effect of cutting short the discussion. There have been three amendments of considerable importance. One was that the provisions of the Bill should not be put into force in Municipalities with an income of less than ten thousand rupees. Another amendment was that the promise of Government to contribute half the pay of the Health Officers should be incorporated in the Act itself, instead of being confined to the Resolution. The third important amendment proposed was that Government should only prescribe for the appointment of one Sanitary Officer, and, as to the rest, the matter should be left to the Municipalities themselves. There are two other minor amendments, which it is not necessary to deal with just now.

With reference to the first amendment, namely, that Municipalities with an income of less than rupees ten thousand should be excepted, we have considered the matter and, in order to meet the wishes of Hon'ble Members, we have decided to accept that amendment. The acceptance of this amendment will have the following result :—Out of 111 Municipalities in the whole of Bengal, about 36 Municipalities will not be affected by the Bill at all. This is a most substantial concession that we have made, and I think it goes a long way to meet the wishes of Hon'ble Members.

As regards the second, we had no objection to put the obligation of Government on a statutory basis, but we have been informed that there is not one single instance where an obligation to make a contribution by Government has been put on a statutory basis. I may assure my Hon'ble friends that we have made a promise and we mean to keep it; as a matter of fact, I do not think Government have ever broken a promise. We have stated in our Resolution that we mean to pay half the salary of the Health Officers. The Government of India in their resolution also stated the same thing, and we have also stated that, even in the case of Sanitary Inspectors, where there is a question of real hardship, Government would be willing to help. I hope that my Hon'ble friends will accept this assurance as sufficient and will not press us to adopt a course that is unprecedented.

As regards the third amendment, we have been advised that it would not be right for us to accept it. The result is that we are going to accept only one amendment. As regards the second, above referred to, although i

is not formally accepted, we can give Hon'ble Members the assurance that our Resolution will be as binding as a statute, and I would ask my Hon'ble friends to consider their amendments in view of the statement I have made, and withdraw such of them as they think fit."

The Hon'ble BABU SURENDRA NATH BANERJI said :—

"I think, my Lord, that as a consequence of the announcement that all amendments which tend to limit the application of the Act to certain Municipalities will be, in substance, accepted, and of the further announcement that Government is precluded by precedent from making any financial compact in a statute, all amendments will be abandoned by us, but, of course, the other amendments relating to the other matters, on which my friend is not making a statement, they will be. I take it, the subject of discussion in this Council. That will simplify matters considerably."

The PRESIDENT :—

"I cannot pretend to judge which amendments should be withdrawn and which should not : so that we had better take them in order."

The following motions were then, by leave of the President, withdrawn :—

Clause 1.

I.—The Hon'ble Rai Nalinaksha Basu Bahadur to move that at the end of clause 1, the following words be added, namely,—

"and shall be deemed to be part of the Bengal Municipal Act, 1884." Ben. Act 111 of 1884.

Clause 2.

Proposed new Section 349 C.

II.—The Hon'ble Rai Nalinaksha Basu Bahadur to move that for sub-section (1) of the proposed new section 349C the following be substituted, namely,—

- (1) If the Magistrate of the District is of opinion that the provisions of this Part should be extended to any municipality within his jurisdiction, he may call upon the Commissioners of that municipality to apply to the Local Government, through him, for the extension of the said provisions to that municipality; and if, within four months of the receipt of such requisition, the said Commissioners fail to comply therewith, the Magistrate of the district may himself apply to the Local Government to extend the said provisions to such municipality.

- (1a) On receipt of any application under sub-section (1), the Local Government may, by notification published in the *Calcutta Gazette*, announce its intention to declare this Part to be in force in the municipality referred to therein :

Provided that the provisions of this Part shall not be extended to any municipality the income of which falls below Rs. 10,000 a year.

III.—The Hon'ble Babu Surendra Nath Ray to move that in the last line of the proposed new section 349 (1) (2), after the words "so sent", the following be added, namely,—

"together with any report submitted by the District Magistrate along with such objections."

IV.—If motion No. III be carried, the Hon'ble Babu Surendra Nath Ray to move that in line 2 of the proposed new section 349C(3), after the words "or if it considers", the following be added, namely,—

after giving due weight to the report of the District Magistrate."

Proposed new Section 349D.

V.—The Hon'ble Rai Nalinaksha Basu Bahadur to move that the proposed new section 349D be re-numbered as sub-section (1) and that for its last four lines the following be substituted, namely,—

"as may be deemed necessary by them: such Health Officer to be of such class, and such Sanitary Inspectors to possess such qualifications as the Local Government may, by notification in the *Calcutta Gazette*, direct."

(2) Notwithstanding anything contained in sub-section (1), the Local Government may, for reasons to be recorded in writing, direct the appointment of a Health Officer and of such number of Sanitary Inspectors as it may deem necessary in any particular municipality.

VI.—The Hon'ble Babu Mahendra Nath Ray to move that in lines 12 and 13 of the proposed new section 349D the words "and such Sanitary Inspectors to possess such qualifications" be omitted.

VII.—The Hon'ble Babu Mahendra Nath Ray to move that the following proviso be added to the proposed new section 349D, namely,—

Provided that the number of Sanitary Inspectors to be appointed for any municipality shall be fixed by the Commissioners of the municipality concerned at a meeting."

VIII.—The Hon'ble Babu Surendra Nath Ray to move that the words "such Health Officer to be of such class, and such Sanitary Inspectors to possess such qualifications, as may be so directed", in the second and subsequent lines of clause (b) of the proposed new section 349D, be omitted, and that the following provisos be added after the words "as the Local Government may, by notification in the *Calcutta Gazette*, direct", namely,— [Cf. Nos. II and VI.]

"Provided that—

(i) the Local Government shall not have the power to compel any municipality to appoint more than one such officer and

(ii) the provisions of this section shall not be put in operation in any municipality, the income of which is less than Rs. 10,000, unless two-thirds of the Commissioners agree to the proposal."

IX.—The Hon'ble Raja Hrishikesh Laha to move that the following proviso be added at the end of the proposed new section, 349D, namely,—

"Provided that, with the approval of the Local Government, two or more municipalities may jointly retain the services of a Health Officer or a Sanitary Inspector appointed under this section, and make such proportionate contribution towards the pay of such officer as the Local Government may determine."

Proposed new Section 349E.

X.—The Hon'ble Rai Nalinaksha Basu Bahadur to move that for the proposed new section 349 E the following be substituted, namely,—

"349E. The Local Government shall, from time to time, fix the salaries to be paid to Health Officers and Sanitary Inspectors and the allowances to be granted to them during absence on leave, one half of such salaries and allowances being paid out of the Municipal Fund and the other half by the Local Government."

XI.—The Hon'ble BABU MAHENDRA NATH RAY moved that, in line 3 of the proposed new section 349E, the words "and Sanitary Inspectors" be omitted.

He said :—

"My Lord,—The object of the amendment is to leave it to the Municipal authorities concerned to fix the salaries to be paid to their Sanitary Inspectors. The wording of the clause, as it stands, is that 'the Local Government shall from time to time fix the salaries to be paid to Health Officers and Sanitary Inspectors out of the Municipal Funds, and the allowances to be granted to them during absences on leave.' No far, my Lord, as the Local Government desire to have the power of imposing upon the Municipalities the duty of appointing Sanitary Inspectors, we do not object, but when the question is as to the salary to be paid to these people, I humbly submit that to take away from the Municipal Commissioners the power of fixing their salaries is really to go too far, and to interfere with the well-understood policy of Local Self-Government. I would have been, therefore, very glad, my Lord, if the proposal which is embodied in this amendment had been accepted by Government; but as it has not been accepted, I am compelled to press it to a division. Under the Local Self-Government Act, which controls the action of District Boards, the latter enjoy the power of not only appointing their own Sanitary Inspectors but of fixing their pay. It is difficult to see why Municipal Corporations in Bengal, which are more advanced in many places than the rural authorities, should not have this power of fixing the pay of their own Sanitary Inspectors. It is suggested that the practical difficulty in the way is that Government propose to train two classes of Sanitary Inspectors, and that, as we read in the Resolutions, the Sanitary Inspectors should be of two classes, classes 1 and 2; Sanitary Inspectors belonging to the second class to get a pay of Rs. 50 rising to Rs. 100, and Sanitary Inspectors of the first class to get a pay of Rs. 100 rising to Rs. 150, and that, if the question of pay and allowances of Sanitary Inspectors were left to the Municipalities concerned, they might not choose to pay Sanitary Inspectors enough, and the Sanitary Inspectors trained by Government under the system which has been in operation might not find it possible to accept service under some municipalities which might

engaged on a proper pay. Whether a Sanitary Inspector to be entertained under a Municipality should be of second class or first class is a matter of detail which, I submit, should be left to the Municipalities concerned, and I do not see any sufficient reason for withdrawing that power from them. It is a very small matter, but a matter in which there will perhaps be a good deal of hardship, as the Municipalities will consider that even in these small matters of detail their hands are being unnecessarily fettered. I therefore am compelled to press this motion to a division."

The Hon'ble BABU SURENDRA NATH BANARJI said :—

"May I be permitted to make a suggestion, for the consideration of the Hon'ble Member in charge of the Bill, whether we can arrive at a sort of compromise in this matter—namely, that the pay be fixed by the Municipalities subject to the approval of the Local Government? There are two partners to the transaction—one is the Municipality and the other is the Local Government. Both make a contribution towards the pay, and I think both ought to have a substantial voice in the matter; and, therefore, I think we ought to put it in that form, namely, that the pay should be fixed by the Municipality subject to the approval of the Local Government, so that both partners to the transaction may have a voice in regard to it. This is a compromise which I trust my Hon'ble friend will see his way to accept."

The Hon'ble BABU SURENDRA NATH RAY said :—

"I have only one word to say. In the opinions that were circulated on the Bengal Municipal (Sanitary Officers) Bill, I find that Mr. Patterson, the District Officer of Howrah, a member of the Indian Civil Service, says on page 6 to this effect :—

'As the proposed section 349 F will empower Government to make rules prescribing the qualifications, etc., of sanitary officers, and as the proposed section 349 D will make the appointment of such officers obligatory, their salaries should be left to be determined by the Commissioners in accordance with the ordinary laws of supply and demand.'

After this opinion from one who is a trusted servant of Government and who has got experience of Municipalities, I think Government ought to accept the suggestion which is made by the Hon'ble Babu Mahendra Nath Ray."

The Hon'ble NAWAB SYED SHAMS-UL-HUDA said :—

"This question has been carefully considered. It was discussed at some length in Select Committee and it was rejected, and the reasons are these, my Lord : we have taken a number of men to give them a training. They want certain prospects, in order to be induced to go through this course of training, and it would be desirable that Sanitary Officers serving in different Municipalities should have about the same pay. If we left it to individual Municipalities, there may be in some Municipalities a great spirit of parsimony and they may refuse to pay the Sanitary Inspectors an adequate sum : and, unless a man is well paid, his work is never well done. There will be a large number of Municipalities that will employ Sanitary Inspectors. It has been considered desirable that the qualifications and pay should be fixed by Government to ensure uniformity. I am not convinced that the Hon'ble Babu Mahendra Nath Ray's argument completely answers this objection."

Reference has been made to the practice in the District Boards, but my Hon'ble friend will remember that the number of Municipalities is much larger than the number of District Boards, and, so far as the few District Boards are concerned, they may make their own terms. I think it will raise discontent and will interfere with the efficiency of the work to be done by sanitary officers if it is left to the Municipalities to fix their salaries. For these reasons, my Lord, Government are not prepared to accept the amendment."

A division was then taken with the following result :—

The following Members were absent :—

The Hon'ble Nawab Sir Khwaja Salimullah Bahadur, G.C.I.E.,
K.C.S.I.

The Hon'ble Maulvi Musharraf Hussain.

The Hon'ble Raja Mahendra Ranjan Ray Chaudhuri.

The Hon'ble Dr. Deba Prasad Sarbadhikari.

The Hon'ble Babu Ananda Chandra Ray.

The Hon'ble Maulvi A. K. Faz-ul-Haq.

The Hon'ble Nawab Saiyid Hossam Haider Chaudhuri, Khan
Bahadur.

The result of the division being ayes 17, noes 28, the motion was lost.

The following motions were, by leave of the President, withdrawn:—

XII.—The Hon'ble Babu Surendra Nath Ray to move that in lines 3 and 4 of the proposed new section 349 E the words "and Sanitary Inspectors out of the Municipal Fund" be omitted.

XIII.—The Hon'ble Babu Mahendra Nath Ray to move that the following proviso be added to the proposed new section 349 E, namely,—

"Provided that one half of such salaries and allowances shall be paid by the Local Government and not out of the Municipal Fund."

XIV. - The Hon'ble Maharaja Ranajit Sinha of Nashipur to move that the following proviso be added to the proposed new section 349 E, namely,—

"Provided that the Government shall ordinarily contribute half the amount required to meet the salaries of such Health Officers."

Proposed new Section 349 F.

XV.—The Hon'ble Rai Nalinaksha Basu Bahadur moved that for the first two lines of the proposed new section 349 F the following be substituted, namely,—

"The Municipal Commissioners may from time to time make rules subject to the approval of the Local Government prescribing . . ."

He, said: "My Lord, the Bill as it stands says that the Local Government may from time to time make rules regarding the qualifications of Health Officers and Sanitary Inspectors, as well as their classes and grades. My amendment is that the Municipal Commissioners be allowed the privilege of framing the rules. It is alleged that if power be conferred upon the municipalities, the rules are not likely to be uniform, and the rules for one municipality may clash with those framed by others. But with a view to avoid this sort of apprehended anomaly, I have proposed that the rules framed by the Municipal Commissioners shall be subject to the approval of Government or in other words, the rules made by them shall not have any effect unless sanctioned by Government. As the Government are the final authority with regard to the sanctioning of the rules, there cannot be any reasonable objection to the amendment proposed by me. The rules, no doubt, under the amendment proposed by me, will emanate from the Municipal Commissioners, but they cannot be final unless approved of by the Government and, consequently, my amendment is one which ought in my humble opinion to be accepted by the Hon'ble Member in charge of the Bill."

The Hon'ble Nawab Syed Sham-sul-Huda said: "My Lord, for the reasons which I gave in answer to the Hon'ble Babu Mahendra Nath Ray's amendment, I am sorry I cannot accept this amendment. We want uniformity in the rules, and that cannot be ensured if every municipality is allowed to make its own rules."

The motion was then, by leave of the President, withdrawn.—

The following motions were also, by leave of the President, withdrawn:—

XVI. The Hon'ble Babu Mahendra Nath Ray to move that in line 2 of clause (a) of the proposed new section 349 F the words "and Sanitary Inspectors respectively" be omitted.

- XVII. The Hon'ble Babu Surendra Nath Ray to move that in line 2 of clause (a) of the proposed new section 349 F the words "and Sanitary Inspectors respectively" be omitted.
- XVIII. The Hon'ble Babu Mahendra Nath Ray to move that in line 1 of clause (b) of the proposed new section 349 F the words "and Sanitary Inspectors" be omitted.
- XIX. The Hon'ble Babu Surendra Nath Ray to move that in line 1 of clause (b) of the proposed new section 349 F the words "and Sanitary Inspectors" be omitted.
- XX. The Hon'ble Babu Surendra Nath Ray to move that the following proviso be added at the end of the proposed new section 349 F, namely,—

"Provided that the Local Government shall be bound to contribute at least half the salary of every Health Officer or Sanitary Inspector appointed under this Chapter."

Proposed new Section 349 G.

- XXI. The Hon'ble Rai Nalinaksha Basu Bahadur moved that at the end of the proposed new section 349 G the following words be added, namely,—

"to whom the Health Officer shall be subordinate."

He said :—"This amendment is very simple. There are two Health Officers, and my proposal is that one should be made subordinate to the other, so that there may be no conflicting orders passed by them. That is what I have to submit for the consideration of the Hon'ble Member in charge of the Bill."

The Hon'ble NAWAB SYED SHAMS-UL-HUDA said :—

"My lord, I have not been able to accept this amendment. As a rule there will be one Health Officer, and there is no question of subordinating one Health Officer to another. I do not understand what the Hon'ble Member means. We propose to have more than one Sanitary Inspector, but we do not propose to have more than one Health Officer, and from that point of view, I think my Hon'ble friend's amendment is unnecessary."

The motion was then, by leave of the President, withdrawn.

The Hon'ble NAWAB SYED SHAMS-UL-HUDA said :—

"In order to give effect to the concession which Government has announced in this matter, I beg to move—

that section 349 D be numbered as sub-section (1) of that section, and that the following be added as sub-section (2), viz.,—

the provisions of sub-section (1) shall not apply to any Municipality the income of which falls below Rs. 10,000 a year."

The motion was put and agreed to.

The Hon'ble Nawab Syed Shams-ul-Huda moved that the Secretary be directed to renumber the clauses and sub-clauses of the Bill in consecutive order, and to make corresponding alterations in all cross-references thereto.

The motion was put and agreed to.

The Hon'ble Nawab Syed Shams-ul-Huda also moved that the Bill, as settled in Council, be passed.

He said :—My Lord, I am glad that although we have had a somewhat stormy discussion some time ago about this Bill, that it has now been given a smooth passage through the Council. I appreciate the assistance which has been given by the Hon'ble the non-official members, and I have already referred to the three important amendments of which we had notice from the Hon'ble Rai Nalinaksha Basu Bahadur, the Hon'ble Babu Mahendra Nath Ray, and the Hon'ble Babu Surendra Nath Ray. We have found it difficult to accept them all, but I think we have met them half way, and I am glad that the concessions made by Government have been accepted in the spirit in which they have been given, and a large number of amendments have in consequence been withdrawn. We were all anxious that a Bill of this nature should go out of this Council with the approval of the representatives of the local bodies, and although some of the amendments moved by them have been lost, I take it that on the whole they are satisfied. I move that the Bill, as amended, be passed.

The motion was put and agreed to.

THE DOVETON TRUST BILL, 1913.

The Hon'ble Mr. Hornell moved that the Doveton Trust Bill, 1913, be referred to a Select Committee consisting of the Hon'ble Mr. Samman, the Hon'ble Mr. Newbould, the Hon'ble Mr. Shorrocks, the Hon'ble Mr. Grice, the Hon'ble Babu Mahendra Nath Ray and the mover, with instructions to circulate their report in time for its consideration in Council at the meeting to be held on the 13th January, 1914.

THE Hon'ble BABU SURENDRA NATH BANERJI said :—

“My Lord, now that the Bill is to be referred to a Select Committee I think I may take this opportunity of calling attention to a statement which has appeared in the newspapers and which I believe has been circulated among the members of this Council, bearing upon this Bill. The statement is signed by the responsible members of the Committee of Management of the Doveton Institution, and it traverses some of the statements which were made in this Council by the Hon'ble Member in charge of the Bill. One of the statements is this. I think it was stated in this Council, that the Committee of Management which now exists was a Committee which had been appointed by the High Court. These gentlemen say as a matter of fact that that Committee had long ceased to exist, and that the present Committee is a Committee which has been appointed by the shareholders or by the guardians of the pupils attending the Institution. Then charges of mismanagement had been brought against the Committee of the Institution. They deny these charges, and they bring forward some facts and figures which to my mind seem to lend colour to their assertion. The financial test is the crucial test in all institutions and organizations. In this statement which has been circulated I find facts given as to the revenue of the Institution in 1910, and the revenue of the Institution in 1912. In 1910 the revenue of the institution was Rs. 19,000, in 1912, it was Rs. 26,000, almost double, and the number of pupils has increased. Therefore, it seems to me, if these allegations as circulated in the statement have any basis, truth or substance, it is necessary to reconsider the proposals which have been laid before this Government. I do not pin my faith to this statement. I absolutely know nothing at all about it, but here are these allegations spread broadcast, for they have been printed in the newspapers, circulated among the members of this Council, and they are the talk of everybody connected with this Institution, and who wish the welfare of this Institution. Having regard of these facts, I appeal to my Hon'ble friend, the member in charge of the Bill, to throw some light upon the statement and to justify the measure which he has placed for the consideration of the Council.”

The Hon'ble Mr. HORNELL said :—

“Your Excellency, the letter to which the Hon'ble Mr. Banerji refers has been placed in my hands by Mr. Houghton and Mr. Claridge. The signatories to the letter, who claim to be the members of the Committee of Management of the Parental Academic Institution and Doveton College, complain that the notification has caused them considerable surprise, and that they feel seriously aggrieved that such a momentous step should have been initiated without the slightest reference to the Governing Body of the Institution. They complain that they received no preparatory official notice of the intentions of Government in this matter, and they claim to be completely ignorant of the grounds on which this tyrannical measure of spoliation is sought to be justified.”

The Hon'ble SURENDRA NATH BANERJI—I did not use such strong language.

The Hon'ble Mr. HORNELL, continuing, said :—

“In the speech in which I moved for leave to introduce the Bill, I attempted to set forth in outline the connection between the Government of Bengal and the Society. I need not repeat this melancholy story. I will merely point out that this connection began in 1896 and that in 1906 a Committee which had been appointed by the High Court to manage the institution appealed to Government to have an inquiry, made into the affairs of the institution and that as the result of this appeal Government appointed a Committee, which recommended legislation for the purpose of effecting the same purpose as that which the Bill, now before the Council, is designed to accomplish. A Bill was actually drafted, but as the result of the High Court order of the 8th April, 1907, it was dropped to give the Society a chance of working out its own destiny under the scheme settled by the decree. No further action was taken by Government until 1909, when, as explained at the last meeting of the Council, Mr. W. C. Madge, himself a member of the Committee of Management, wrote and asked Government to intervene. In the name of the Anglo-Indian community to which he belongs, Mr. Madge adjured Government to preserve the endowment ‘from obviously incompetent control and to divert it to other means which might afford the best prospect of giving the domicilled community the relief and help of which they stand in great and pressing need.’ Thus in a period of some 4 years Government was twice called upon by those intimately connected with, or interested in the society, to take the step which it is now contemplating.

In the speech with which I introduced the Bill, I referred to a report from the Director of Public Instruction, which was called for and received in September 1909. It must be remembered that this report was written when the new scheme of management had been in operation for over two years. I said that the report showed that the Committee had proved itself totally incompetent to manage the affairs of the College. This statement has in effect been challenged. I have referred above to Mr. Madge as a member of the Committee. He certainly had been such, and he claimed still to be at the time of writing, though the Committee contended that he had resigned, a contention which Mr. Madge declared to be false. At any rate Mr. Madge's indictment was couched in no uncertain terms. ‘The institution’ he wrote, ‘is now in the hands of a Committee whose competence for their charge may be estimated from the fact of their having recently illegally removed their Chairman from their number, on the false pretext of his having resigned, because he had objected to improper proceedings on their part, which may possibly be held to be illegal if tested in a Court; and from the fact of their also having lately expelled, with violence from the room in which they met, the Assistant Director of Public Instruction who had attended by invitation. These are not the only circumstances which call for prompt and searching investigation on the part of the Government. The endowment, or remaining portion of it, on which the institution subsists, was for the benefit of the community variously styled ‘East Indian’ and ‘Eurasian,’ whereas it is stated that a very few of this class are boarders in it, while the majority are Asiatics, the diversion of specially endowed funds to whose benefit may amount to a serious breach of trust.’ It is also perhaps interesting to note

that when this letter of Mr. Madge was received by the Director of Public Instruction from Government, the then Honorary Secretary of the Committee of Management was given an opportunity of reporting on the facts. He refused to do so, and questioned the Director's authority to call for such a report at all. He was informed on the 6th July that failing a reply by the 21st July the report would have to go to Government with such information as could be obtained from other sources. The report of the Director of Public Instruction did not actually go to Government till the 9th September. If the Committee let this opportunity slip of stating their version of these transactions, they can scarcely blame my predecessor or Government.

To the report submitted by the Director of Public Instruction there was attached a statement from the gentleman, who was so effectively prevented from taking part in the deliberations of the Committee of Management, together with a statement from another member of the Committee who accompanied the former gentleman and was a witness to the rough and tumble which by the way took place in the public street. It is not necessary to dwell upon this incident. The account of it which runs into many pages suggests comic-opera, an admirable thing in its place,—but perhaps a little inappropriate in the management of the affairs of a society constituted to establish and control schools 'in order to procure the means of affording the youths the best education of which the circumstances admit.'

The term of the schedule attached to the decree of the High Court of the 8th April 1907, provided that in the event of the Society failing to hold its annual meetings in terms of the said rules or otherwise failing to appoint a Committee in any year, the members of the Committee other than those who in terms of the scheme should retire—the scheme provided that a certain proportion of members should retire at each annual election—should be at liberty with the approval of the Director of Public Instruction for the time being to appoint such members of the domiciled community for the purposes of completing the necessary number of the Committee. The signatories of the letter of protest declare that they are not a Committee appointed under the terms of the decree of the High Court above referred to, but that since October 1910, the affairs and management of the Society have been conducted by a series of Committees elected annually under the rules of the Society. In the Director's report to Government it is stated that the Committee had placed it on record that they believed that there were no members of the Society, and that there was not in any case a quorum sufficient to hold a general meeting. It appears that in 1909 there were only 4 members. Under rule 36 of the Rules of the Society no business can be transacted at any meeting of the Society, unless a quorum of 20 members be present. The Director's report of the 9th September gave the history of the Committee since the date of the High Court decree. Of the 8 members named by the High Court, 3 declined to act. Four new members were appointed before the close of 1907, and, on 2 of these members retiring by rotation in the terms of the scheme, a Committee of 10 members was reconstituted by the Director of Public Instruction. By July 1908, this Committee had dwindled down to 6, this number having been further reduced by 2 before the end of 1908. On the 31st March 1909 there were 4 members of whom 2 were to retire by rotation, while under Rule 13 of the Society 5 members are necessary to form a quorum. This remnant proceeded to elect a full Committee of Management, and in April 1909, the Honorary Secretary submitted the list of names to the Director of Public Instruction for his formal approval. This the Director of Public Instruction refused to give, but called for some explanation. The Honorary Secretary declined to give this information declaring that the powers of the Director of Public Instruction were confined to the bare approval or disapproval of the nominations of the Committee. A correspondence ensued between the Society's Solicitors and the Director of Public Instruction. The result of which was that the latter, not considering the information which was made available either sufficient or satisfactory refused to exercise the powers of approval conferred on him by the High Court. In reporting this to Government, the Director of Public Instruction stated that he inclined to the view that in the absence of a quorum of duly

appointed members of the Committee, the then existing management was unauthorised and could only be regularised by an order of the Court. So far as I can make out, there are no further records either in my office or in the Secretariat with regard to any subsequent relations with the Committee.

The order of the High Court required that the Committee should have its accounts audited by Chartered Accountants every year, and that a copy of the balance sheet should be submitted to the Director of Public Instruction. No such balance sheets were submitted and consequently on the 25th May 1909, the Director of Public Instruction wrote and asked the Committee to let him have the audited balance sheets for the financial years 1908-09 and 1907-08. In response to this the Committee submitted a copy not of a balance sheet but of a cash abstract giving outstandings and liabilities on the 31st December 1908 by a firm not of Chartered but of Incorporated Accountants. This document the Director of Public Instruction found to be quite useless as a guide to the financial administration and the Committee refused to supply a copy of a similar document for the preceding year which might have enabled the Director of Public Instruction to have checked the abstract submitted. The Committee now state that their accounts are audited annually by Messrs. Lovelock and Lewes, whom they quote as stating in 1910 that the account books were '*as usual*' well kept and free from errors. It is a little difficult to fix the precise significance of '*as usual*.' If Messrs. Lovelock and Lewes had knowledge of the Doveton College Account Books before 1910, why did the Committee in 1909 decline to provide the Director of Public Instruction with any statement other than a statement of outstandings and liabilities vouched for by a firm of Incorporated Accountants?

In the speech with which I introduced the Bill, I was bold enough to state that the conduct of the affairs of the Society had involved the misdirection of funds left in trust to purposes for which they were never intended. The Committee of which I was a member represented in 1906 that it was not obligatory on the Doveton College Committee to educate non-Christians. We further reported that of the 103 boys then on the rolls of the College only 8 were reported to be Christians, and that they all belonged to the DeSouza foundation. When in 1909 the Director of Public Instruction attempted to find out the denominations and nationality of the pupils then in the school, he was refused the information. I have recently ascertained that the 113 pupils now on the rolls of the college are drawn from the following communities :—

Europeans	...	...	...	Nil
Anglo-Indians	...	...	...	40
Hindus	...	...	...	29
Muhammadans	...	...	...	11
Burmese	...	...	...	21
Chinese	...	...	...	7
Parsees	...	...	...	2
Native Christians	...	...	...	3
				113

The school was undoubtedly founded and endowed for that section of the community which is now known as Anglo-Indian. The school was once one of the most famous institutions for the education of the domiciled European and Anglo-Indian community. Now it is entirely cut off from the European school system. It has only been recognized by the University since 1910, and the report attached to the letter of protest is merely the usual report called for by the University as a result of the application for recognition. The University is not of course concerned with anything other than the fitness of the school to prepare pupils for its Matriculation Examination."

The motion was then put and agreed to.

THE CHITTAGONG PORT BILL, 1913.

The Hon'ble Mr. Lyon moved for leave to introduce a Bill to consolidate and amend the law relating to the port of Chittagong.

He said—"My Lord, I have the honour to move for leave to introduce a Bill to consolidate and amend the law relating to the port of Chittagong.

As noted in the Statement of Objects and Reasons attached to this Bill, it is required by the considerable developments which have taken place since the original Act for the regulation of the port of Chittagong was passed in the year 1887. At that time there was no railway connection with Chittagong, nor were there any jetties in existence for ocean-going ships. In view also of the limited extent of the port, and the inexperience of the Commissioners who were called upon to conduct its affairs, the provisions of the Act were extremely restrictive. The Commissioners are unable to undertake works of any importance without the previous sanction of the Governor-General in Council, and the same approval is required from time to time to all changes in the electorate of bodies or firms engaged in commerce in the port. The by-laws passed by the Commissioners also require confirmation in certain cases, and the Local Government are given powers which restrict the employment of servants by the Commissioners, and their purchase, sale or leasing of movable as well as immovable property.

These restrictions have naturally been found very inconvenient in practice, especially since the large extension of the operations of the port due to the advent of the Assam Bengal Railway and the institution of regular steamer services of ocean-going vessels. I may add that the restrictive nature of the present Chittagong Port Act attracted the attention of the Royal Commission on Decentralisation during their sitting at Dacca.

The present Bill follows the lines of the Calcutta Port Act and the Act for the Port of Rangoon of 1905, which is the most recent of the various Port Acts in India. It was originally drafted by the late Mr. Lusson as Chairman of the Port Commissioners, in communication with the Agent of the Assam Bengal Railway and the Chairman of the Chittagong Chamber of Commerce, and I may take this opportunity of acknowledging the noticeable services which have been rendered to the port and to Government in the preparation of this Bill by the late Mr. Lusson and his successor, Mr. Fischer, as Chairman of the Commissioners. It is proposed by means of the present Bill to amplify the powers of the Commissioners of the port and to relieve them from unnecessary restrictions in the exercise of their functions, and it is hoped that the new provisions will greatly facilitate the conduct of business in connection with the port. The Bill was originally prepared in the year 1908, and has since then been exhaustively examined by the commercial community of Chittagong, the Port Commissioners, the Government of India and Railway authorities of all grades. Its provisions were practically settled shortly before the recent territorial changes, when its consideration was postponed until the present Government should be constituted. In the course of its examination by our Government it appeared that various minor amendments were necessary, and opportunity was taken to include in the Bill some additional provisions suggested by the Port Commissioners.

While the general principles of the Bill and its main provisions will, I believe, meet with general acceptance, as providing the machinery necessary for the conduct of the affairs of the port, there are certain sections dealing with the compulsory use of the jetties provided by the railway company which have met with opposition from some of the local branches of firms engaged in shipping and agency business. These provisions of the Bill follow in the main the similar provisions which have been incorporated in the Acts applying to other ports in India, but the position in Chittagong differs somewhat from that which exists in other ports, in that the Assam Bengal Railway Company is the owner of the jetties instead of the Port Commissioners. The disadvantages of this position are somewhat mitigated, however, by the fact that the Assam Bengal Railway Company is not in all respects a private company, and that the jetties were built by public funds provided through the Secretary of State, who has what may be termed

a reversionary interest in them. And apart from the interest thus possessed by the Government in the working of the railway company, a definite safeguard has been provided in the Act in the provision that the tolls and charges to be imposed at the jetties shall not be modified without the express approval of the Railway Board, who will consult the Local Government before making any changes in the rates at which such charges are to be levied. The compulsory clauses have been accepted by the Port Commissioners, among whom the commercial interests of Chittagong are strongly represented, and they will be later on subjected to careful consideration in Select Committee. And I may note here that the chief reason why I am only asking leave on the present occasion for the introduction of this Bill, and do not propose to move that it shall also be referred to a Select Committee, is that we wish to give ample time for the consideration by members of the whole Bill, and that we wish to secure also the services of a member of the European commercial community of Chittagong as an expert member of the Select Committee to assist us in the detailed consideration of its provisions.

I believe that the Bill will command the approval of this Council, and I now beg to move for leave to introduce it."

The motion was put and agreed to.

THE BENGAL MEDICAL BILL, 1913.

The Hon'ble Mr. STEPHENSON moved for leave to introduce a Bill to provide for the registration of medical practitioners in Bengal.

He said—"My Lord, I ask for leave to introduce a Bill to provide for the registration of medical practitioners in Bengal. The question of a Medical Registration Act in India was first raised by the Government of Bombay in 1882, but the Bengal Government at that time considered that the question raised was really one of prevention of the unauthorised practice of medicine, and as this was not within the range of practical politics, they were not prepared to proceed with the legislation then proposed. Since then the situation has been completely changed by the growth of unrecognized medical schools and colleges which have conferred degrees purporting to guarantee the possession of an efficient knowledge and training in the practice of the western schools of medicine. The demand for a Medical Registration Act grew stronger and stronger and culminated in 1908, when the Faculty of Medicine of the Calcutta University, the Council of the Medical College, the Medical Section of the Asiatic Society and the Medical Graduates of the University all approached Government insisting on the urgent need of legislation. The grounds for this demand were threefold: *firstly*, the system of western medicine is only starting to spread in India, and it is essential at the outset that it shall not fall into disrepute owing to the want of training or qualifications on the part of those who purport to be its exponents; *secondly*, as the authorised degrees and licenses connote a definite training and knowledge of a fixed standard, the public have a right to a reasonable opportunity of readily distinguishing those medical men who have received this training and teaching; and *thirdly*, the holders of authorised degrees have a right to be protected from a competition which is unfair in so far as it relies upon the inability of the public to distinguish between authorised and unauthorised degrees. Since 1908 the question has been under discussion, and the delay has been so far advantageous that we are able to make use of the experience of Bombay where a Medical Registration Act, on which the present Bill is largely based, has been passed and has been working for some time. If we may judge from the speeches at the farewell of the late Surgeon-General of Bombay, we need have no doubt about the utility of the Bill or apprehensions as to its working.

The main object of the Bill then is to distinguish those practitioners who have received the teaching and training that are accepted as being adequate. The central feature is the register of such practitioners, and a Medical Council with a Registrar is set up to compile this register and to keep it efficiently up to date. The Council consists of 9 members, 4 of whom are *ex-officio* and 5 elected; though, as one of the electing bodies is the Medical College Council, there will probably always be an official majority. The

powers of the Council are confined to matters affecting the compiling of the register, but it is hoped that if the Bill is successful, the Council will in time form a most powerful instrument for the advancement of the medical profession. In order to encourage those who are entitled to it to claim registration, it is provided that where an Act in force in Bengal requires a certificate by a medical practitioner, the privilege of giving such certificate shall be confined to registered practitioners. There is only one penalty clause in the Bill, and that is the necessary provision for punishment for falsely pretending to be a registered practitioner.

In view of the misconceptions as to the scope of the Act disclosed in the proceedings when the Bombay Act was discussed in Council, I wish to make it quite clear that this Act does not interfere with the practice of medicine by any person whatever. Its only effect is to create a register of the names of medical practitioners who are in possession of degrees which in the opinion of Government are a sufficient guarantee of training and qualifications. It does not prevent the public from utilising the services of any practitioner they please, but it does give them an opportunity of knowing which practitioners hold authorised degrees."

The motion was put and agreed to.

RESOLUTIONS

(under the rules for the discussion of matters of general public interest).

The Hon'ble BABU SURENDRA NATH BANERJI to move the following resolution :—

This Council recommends to the Governor in Council that—

(i) the collection of Government revenue in the areas affected by the recent flood be suspended until the end of March 1914, and that the said revenue be subsequently realized in five yearly instalments, on the understanding that the same concession is extended by all zamindars to intermediate land-holders and actual cultivators ; and

(ii) the same principle be applied to the collection of rents in the Government *khas mahals*.

The Hon'ble BABU SURENDRA NATH BANERJI said :—

"My Lord, with reference to the resolution which stands against my name, I desire to congratulate the Government on the action which has already been taken. The Hon'ble Mr. Lyon was recently on a visit to Contai and the flooded area, and from the official *communiqué*, which has appeared in to-day's morning papers, I understand that the orders which he has passed are such as will commend themselves to the strong approbation of public opinion. In the first place, he has directed the suspension and remission, where necessary, of rents in the *khas mahals* and temporarily-settled estates according to the rules of Government. Practically, therefore, he has gone beyond the resolution which I had ventured to suggest to this Council, and, as regards the first part of the resolution, I understand from the same official *communiqué* that the matter is under consideration. That being so, I desire to congratulate Your Excellency's Government and beg leave to withdraw my resolution."

The motion was then, by leave of the President, withdrawn.

The Hon'ble Babu Surendra Nath Banerji moved the following resolution :—

This Council recommends to the Governor in Council the appointment of a mixed commission of official and non-official members of the Council to

inquire into, and report upon, the prevalence of dacoity in the Presidency, and to recommend such preventive and remedial measures as may be thought necessary.

He said—"My Lord, this question, of the prevalence of dacoity in this Presidency has been the subject of keen and animated discussion both in the newspapers in this country as well as in England. Hon'ble Members are aware that Government have recently appointed a Commission to enquire into the existing machinery of district administration. The Commission is exclusively official in its composition, and what is more, of the five of the members of this Committee, three are gentlemen who belong to the Indian Civil Service outside this province. The resolution definitely states the object of this Committee, and suggests what the Committee has to do. The Committee has to concert measures so as to bring the executive officers of Government into closer contact with the people. The belief prevailing in some quarters is that by reason of the permanent settlement the Bengal officials are not so familiar with the people as are the officials in other parts of India. The Committee is not left without guidance as to some of the measures which they might consider for the attainment of the object which they have in view. Amongst them are the partition of districts and the multiplication of subordinate official agencies. The discretion of the Committee, however, is not fettered; the Committee is at liberty to consider any other proposals which may be laid before it. I hope and trust that among the proposals which the Committee will take into consideration is one which has been pressed upon public attention in this province with some little emphasis, namely, the creation of Advisory Boards, consisting of representative men, to advise and counsel the District Magistrate in regard to the discharge of his executive duties. My Lord, this is a proposal which, I believe, was for the first time broached by Sir Herbert Roberts from his place in the House of Commons in 1906 in the amendment to the address to the Throne which he moved. This was pressed before the Supreme Legislative Council by the Hon'ble Mr. Gokhale, and this principle has been accepted by the Decentralization Commission which has recommended the wider acceptance by District officers of the practice (which has been followed by some) of consulting District Boards as their Advisory Councils.

My Lord, my Committee is much less comprehensive in its scope; it refers in a special degree to a matter which will only incidentally engage the attention of the larger Committee, and it consists of officials and non-officials. My Lord, I am anxious, through the medium of my resolution, to concentrate attention upon an evil which has attracted a large measure of public interest, and which, I am sorry to have to say, has cast a slur upon the fair fame of our province. The Hon'ble Sir William Duke, than whom there is no greater authority in a matter of this kind, in the course of the speech that he delivered in April last in this Council, gave us some facts with reference to the prevalence of dacoities which are useful and interesting. He said that in 1910 the number of dacoities in the eastern districts of Bengal was 179, in 1911 the number rose to 181, and in 1912 there was a drop and the number fell to 130. My Lord, in the light of these facts we are driven to the conclusion that there is a considerable element of exaggeration in the ideas prevalent on the subject in England and in this country. The Hon'ble Sir William Duke's authority is indisputable, but the exaggerations continue, and they have been accentuated by the recent anarchical crimes. My Lord, we deeply deplore them. We hold them in horror and detestation, as involving a stigma on the law-abiding character of our people and also as doing grave injury to our public interests. My Lord, it is said that we do not aid the police and authorities to the extent that we ought to. I think that the Hon'ble Sir William Duke has given us the answer, and I quote his words. In the speech, to which I have already adverted, he said: 'I am very willing to believe that in the large majority of cases the dacoits, not being known to the people, they can give very little help.' That, My Lord, states it a nut-shell the whole situation. These men, these dacoits, these anarchists, do not take the people into their confidence; they do not take even those near and dear to them into their confidence. In one case, the

father was entirely ignorant of his son's doings ; in several others, the relatives were profoundly in the dark as to the proceedings of the conspirators. Point out to us—this is my appeal to our critics—what we have to do to suppress or prevent these dacoities, these anarchical crimes, and we shall do it with alacrity and enthusiasm. Show us the way and let it only be practical and reasonable, and we shall follow it. How can you expect us, helpless, defenceless and unarmed people, to assist the police in combating marauders armed with deadly weapons ? I am reminded of a statement which appeared the other day in a newspaper and which was suggestive and instructive alike. There were some cases of dacoity in the Midnapore district where some of our young men were at work in connection with the relief operations. The Magistrate asked them to help the police and the authorities. What was the reply given by the young men ? 'Give us arms and we will fight the dacoits ; unarmed we cannot fight men provided with deadly weapons.' The difficulty of the situation is this, and it has to be realized by those who find fault with us, namely, that the people are unarmed and defenceless, but that the dacoits can get any amount of arms they like. The Government are prepared, very properly as I think, to give out arms to suitable persons ; but as the Hon'ble Sir William Duke has pointed out in the speech, from which, I am afraid, I am making very large quotations, these arms are a dangerous possession and an incentive to the dacoits to attack those who possess them and deprive them of their weapons at any time. Is it not possible—and this is the suggestion which I venture to make to the Government—to train, say, half a dozen men in every considerable village or every group of villages in the use of fire-arms ? They will afford protection to their co-villagers, and what is more important the fact will be known to all the country people, and when it is known the dacoits will be more careful. Add to the police if you will, but let me ask you, are the police likely to be efficient without popular co-operation. My Lord, I may, for a moment, be permitted to advert to an instance of popular co-operation, which, judging by the results, was admirably successful. Hon'ble Members will remember that in the height of the excitement in the years 1907 and 1908 the passenger trains running from Sealdah were exposed to serious danger ; bombs used to be thrown at them. There were several cases. I am a resident of Barrackpore, and I am proud to be one. What did we do ? We formed ourselves into a vigilance committee. The mill industries and several Europeans joined it. We formed ourselves into sub-committees, and we kept watch and ward on every movement that took place in every village ; we kept watch and ward over every stranger who went to a village and every stranger who left a village. We raised subscriptions and we went further and offered the Government of the late Sir Edward Baker to police the line from Barrackpore to Naihati with our men, but the offer was declined. But what happened ? Our activities were followed by the immediate cessation of these outrages. My Lord, I do not know whether I am entitled to link them as cause and effect ; but the fact is indisputable that, as soon as our organizations were placed upon a satisfactory working order, these outrages ceased. My Lord, our critics tell us, the *Times* being one of them—that we are wanting in civic spirit. We have only to quote an instance like the above. We have only to cast our eyes across the waters and see what is taking place in South Africa in evidence of the fact that we possess, in an abundant degree, the civic spirit which we are told we do not possess. If, by civic spirit, we mean the dignity, the self-respecting spirit of the citizen, the consciousness of his obligations to his fellow-citizens and to the state to which he belongs, then I say this, that my countrymen possess it in an abundant degree. Has the history of the world presented a nobler spectacle of the civic spirit, of courage, of endurance, of absolute submission to the law and its penalties, in order to amend the law, than we are witnessing in South Africa ? The display of the civic spirit, has extorted the admiration of the highest personages in the realm, including His Excellency the Viceroy, to whom we are all very grateful for his outspoken praise of the Indians in South Africa, and, I venture to add, that His Excellency has done a service to India and the Empire, the magnitude of which it would be difficult to exaggerate.

My Lord, we hear a great deal about political dacoities ; but dacoities are dacoities, whether they be political or otherwise. The conscience and the judgment of mankind make no difference between them. I venture to think that political dacoities occupy a lower moral plane, because they are committed by men who ought to know better, who add to their criminality by seeking to sanctify their guilt by an appeal to higher considerations. I believe that is only an insignificant fraction of the dacoities that are political in their character. I am sure my Hon'ble friend in charge of the department will be able to enlighten us on the point, and dissipate the mischievous delusion that political dacoits are abroad in the eastern districts scouring the country in their countless gangs and spreading desolation and horror all around.

We are anxious to co-operate with your Excellency's Government in solving the great question which awaits you. It is in this spirit that I have ventured to submit this resolution for the acceptance of this Council and your Excellency's Government. We are anxious to help Government in the arduous task that lies before them. We want to proclaim to the world that we do not wish to stand aloof, but that we are eager to share with the Government their anxieties for the protection of the public peace which is menaced by these dacoities, and therefore the recommendation which I have made is a recommendation for the appointment of a mixed commission of officials and non-officials to report on the situation and to suggest remedial measures. Such a commission would command public confidence, and its recommendations would carry great weight ; it would be a striking example of co-operation between the people and the Government, and above all it would be the sign and symbol of the new régime and the new policy, and it is for these reasons that I have ventured to recommend this resolution for the acceptance of this Council."

The Hon'ble SIR WILLIAM DUKE said :—

" My Lord, the Hon'ble Mover of the resolution spoke on some subjects of considerable public importance but perhaps of not very strict relevance to the actual subject of his resolution. I do not propose to follow him afield, and I shall confine myself strictly to the main point, the question of the prevalence of dacoity in Bengal and the measures which he proposes with regard to it.

No one can have a keener interest in the subject of this resolution than the Government, for not only are they interested in preventing loss and damage of every kind to the people and in the maintenance of law and order, but every Government must feel that its reputation and that of all its members and its officers charged with the administration of justice and police depends upon the degree of success which it attains in this respect. I have already stated in this Council, and I repeat it, that it would be a blot on the civilization of any country that organized gang robbery should occur in it with impunity and so far as this is the case the Government of Bengal has cause for dissatisfaction and indeed for shame.

The Council may therefore take it that we are not likely to reject lightly any suggestion which might help to its extirpation. We are indeed open to consider every reasonable proposal to that end, whatever its source, and if we do not accept the Hon'ble Member's resolution, he must take it that it is because we are sincerely convinced that his proposals do not afford the promise of any effective progress towards the diminution of such offences.

I looked forward, with considerable interest, to the Hon'ble Member's speech in order to ascertain whether his views as to the prevalence of dacoity in Bengal were in any way affected by the constant discussions which have occurred in the press on the subject of political dacoity.

I should like to point out, at the outset, that political dacoity, important subject as it is can hardly be said to have anything to do with the prevalence of dacoity in Bengal. In the five years from 1908

to 1912, 1,511 cases were reported in Bengal. Of these 54 were political. Reporting is believed to be now much better than it was a few years ago, but even so, it is possible that some dacoities went unreported. There is, however, I think, little chance that any political dacoity was unreported or was not identified as such. These cases are so peculiar in their character, and have so many incidents never found in ordinary professional crime that there is very little chance of their being mistaken. We may take it, therefore that the proportion of political to ordinary cases is certainly no higher than I have stated, i.e., not more than $3\frac{1}{2}$ per cent. What are known as political dacoities, that is to say, dacoities committed by young men of the *bhadralok* class working apparently under a very widespread organization are important for very different reasons than their numbers. They are important, because of the spirit of violent opposition to all settled Government which they display, of the widespread and carefully prepared organization of which they give evidence and of the enterprise and success with which they are carried out. Ordinary dacoits frequently make bad shots and risk long terms of imprisonment for the sake of a handful of rupees, but the political variety have been wonderfully successful in spotting likely subjects and have frequently netted very large sums indeed. Still, important as the subject is, it has little to do with the prevalence of dacoity to which the Hon'ble Member's resolution is directed. So far as the subject is concerned with the relations between the Government and the people, it will no doubt come under the notice of the District Administration Committee, although, that Committee is no more concerned with dacoity than with any other important question of administration in the Presidency, and we cannot well trench at present on the ground which will be covered by that Committee, but in any case, I think I have shown that the subject is hardly relevant to the resolution in the form in which it has been proposed.

Turning now to ordinary or professional dacoity, the matter is sufficiently serious. In Bengal, during the last five years, the average annual number of cases has been about 00. In 1912, it was very much less; in the current year, there will apparently be more than in 1912 but fewer than in the previous years. It is a curious circumstance that, bad as this condition may seem, intrinsically it is nothing like so bad as the state of things in other great provinces of India such as Madras and the United Provinces. In 1911, 417 dacoities were reported in Madras and 554 in the United Provinces; in 1912, 464 dacoities in Madras and 511 in the United Provinces. As the population of these provinces is smaller than that of Bengal, dacoities were more frequent in them in proportion to population to the extent of $2\frac{1}{2}$ or 3 times. Yet we hear very little about this serious state of things, probably because these provinces, fortunately for them, are free from the political variety, so that public opinion is not aroused. The fact that the condition in other provinces is much worse, would, however, be no excuse for neglecting the matter in Bengal. But I am in a position to assure the Council that it has not been neglected and is not being neglected.

In past years, our police has undoubtedly been weak in certain parts of the province, notably in East Bengal. Under the Eastern Bengal Reorganization scheme which has been sanctioned by the Secretary of State, we are establishing more than 50 new investigating centres in that part of the Province.

The completion of the new river police and of the arrangements for station and patrol boats in the river districts proceeds steadily and appears already to have had a great effect in checking river dacoity. A number of river posts has also been established as part of the jute protection scheme. Similarly, with police patrols on land these have been established in portions of the Dacca, Faridpur, 24-Parganas, Midnapur, Howrah, Hooghly, Bankura and Birbhum districts, and are being further extended. In certain parts of the country, defence parties have been organized. The intention of these arrangements is that on an alarm being given, villagers should rally to a fixed point and then oppose a united front to the dacoits. The Council are aware that in East Bengal some hundreds of Government guns had been

distributed to selected villagers. The result, however, has been disappointing, for instance, when a dacoity occurred at Kidarpur in the Tangail subdivision of Mymensingh, there were three Government guns in the village, but no attempt was made to use them, and it is to be feared that however freely weapons were licensed, there would be little disposition on the part of the ordinary villagers to use them against dacoits. Government has therefore especially encouraged wealthy persons likely to be the object of attack to keep durwans of a class trained and habituated to the use of arms and has promised that licenses would be freely granted for these.

I may mention, in this connection, a further encouragement to show a bold front to dacoits. Considerable rewards have been offered for the capture of dacoits in the act and much larger rewards when they are armed. Although it is a difficult crime to detect, because the dacoits are seldom identified at the time and because even when property is recovered it does not follow that any one else except the person who is found in possession of it will be convicted, yet the measure of success attained is by no means negligible, and in some cases clever and courageous captures have been effected, as for instance when a gang of North-West Frontier men who had committed a dacoity in Satkhira were captured *en masse* in Basirhat, a result which was only attained by prompt, concerted and courageous action on the part of all concerned from the Subdivisional Officer and the police to the panchayats and chaukidars.

The Criminal Investigation Department contains a number of men who are experts on dacoity, and the standing orders are that each case with its salient features should be reported by telegraph to that department in order that from their expert knowledge they may advise as to the most probable direction to look for the criminals. Dacoity is emphatically a matter for experts. The criminals of different districts and of different gangs vary in their methods of procedure, their disguises, their cries and the expressions they use, and the expert is not infrequently able from such indications to suggest the actual gang to which the criminals belong.

As I said a little while ago, dacoity is an extremely difficult offence for which to obtain convictions, because persons can so seldom be identified on the spot, but a gang can hardly pursue the trade for any length of time without becoming known to an expert police engaged in hunting it, and the most successful means of keeping the crime in check has been found to be by proceeding against such gangs as they become known. At present, the bad livelihood sections of the Criminal Procedure Code are being worked with great energy and considerable success. No less than 19 gangs have been attacked under them during the current year.

Another resource for the discomfiture of professional dacoits is the Criminal Tribes' Act. Under it one notorious tribe and another gang of hereditary professional dacoits have been notified during the current year, and 12 other tribes or gangs are at present under inquiry.

I think I have shown that the activity of Government and the police for the prevention of this form of crime is being pushed not in one but in many directions. I have enumerated only some of the principal. I confess that I have some degree of doubt as to the amount of assistance which in matters so technical is likely to be obtained from persons who have not a first-hand acquaintance with the facts. The subject is often enough ventilated in the public press, including the powerful organ which the Hon'ble Mover of the resolution controls; but the only suggestion which is generally pressed is that licenses under the Arms Act should be granted more freely. As the weapons which already exist in thousands in the different districts are practically never used against dacoits, and as the latter, who are probably a good deal more courageous than the general run of the population, have been successful in many cases in stealing arms and so improving their equipment, it is probable that if the number of weapons in the country were increased, they would still be rarely used for defence, while the dacoits would have still greater opportunities and become still better armed than before. For the rest

the Hon'ble gentleman's main suggestion is that the public have no assistance to give, and that they look to Government for a lead. When suggestions of value are made, and there are ample opportunities for making them, Government will be only too ready to consider them, and, if in doubt as to their applicability, to consult the opinion of qualified members of the public or of the Council upon them. In the meantime, I think the Hon'ble Mover and the Council would be well advised to leave Government to pursue the various lines which it has in hand, which have already had no small measure of success and which promise, if pursued steadily, to impose a very real and effective check upon an extremely exasperating and scandalous form of crime."

The Hon'ble MR. CHAKRAVARTI said :—

"I had no intention of taking part in this debate, but I feel that, after the explanation given by the Hon'ble Sir William Duke, my friend, the Hon'ble Babu Surendra Nath Banerji, will see his way to withdraw this resolution. We were, I frankly confess, under a certain amount of misapprehension with regard to what we noticed by way of criticism in the papers as to what our conduct ought to be in connection with crime, and specially political crimes—and when I use the expression 'political crimes,' I refer to political dacoities. But it appears from the information that has been given that the percentage of political dacoities is only 3 to 3½. On the other hand, about 96½ per cent. are ordinary dacoities, which have existed in the country as long as I have lived, and probably longer. In these circumstances I think it would be of no use at all to have a commission of official and non-official Members of this Council to inquire into and report upon the dacoities which have existed, and with which the Government in previous years have coped, and with which the Government are now coping and for the prevention of which the Government are taking various measures; and if there is no breach of confidence, I might say that with regard to the amount of expenditure which is being provided for the equipment of the police, whether it is river police or land police, and the amount of money which is being spent for their residences and so on, probably the action which is being taken by the Government will be successful in future; and at all events I do not fancy, however clever we may be, that we shall be anywhere near the expert police officers who have been advising, and who will be able to advise the Government, with regard to the detection of dacoity. Therefore in those circumstances, I sincerely hope that my friend will see his way not to press this resolution upon the attention of the Council, but will perceive that, in point of fact, it is really a resolution which he has moved under a misapprehension, because I frankly confess that it was thought in this part of the house that we were being blamed for not taking any action for the purpose of co-operating with Government in connection with political dacoity."

The Hon'ble BABU SURENDRA NATH BANERJI said :—

"My Lord, I cannot, say that I have been quite convinced by the facts and figures, and the arguments, which have been brought forward by the Hon'ble Member in charge of the Department. In the course of his observations he said that the Government would be pleased to receive any suggestions that might be made by individuals with regard to the prevalence of dacoities, and that those suggestions would be very carefully considered. I have not the slightest doubt that they would be, but it seems to me that if we had a committee inquiring specially into this matter there would be more numerous suggestions, and more responsible suggestions, coming from authoritative quarters, and the Government would be in a better position to consider them and form their decision upon better and ampler materials. I think that that argument seems to me to point to a conclusion very reverse of what the Hon'ble Member would like to suggest, but having regard to the fact that you do not want this committee, the object of which was to help the Government, there is no reason why we should press it upon you. We were anxious to help the Government in a matter in which we thought Government might require help. Government

have said :—‘ We don’t want your help.’ We have no desire to thrust ourselves upon the Government if the Government do not want any aid or co-operation from us, and that is our situation ; and in these circumstances, we have no desire to press the resolution upon you. But let it go forth to the world, let it be reiterated, that we were, from this side of the house at any rate, anxious to help the Government, that we made a suggestion which we thought a good suggestion in the circumstances, and if that suggestion is not accepted the responsibility is no longer ours. Let it not be said that we stood aloof from the Government, that we did not want to share with the Government their anxieties for the maintenance of the public tranquillity. We offered help, and if the Government will not accept that offer the fault is no longer ours. With those observations, My Lord, I beg to withdraw this resolution.”

The resolution was accordingly, by leave of the President, withdrawn.

The Hon’ble BABU MAHENDRA RAY said :—

“ My Lord, the Resolution which stands in my name runs thus :—

‘ This Council recommends to the Governor in Council that every Rural Board in the Presidency be directed to set apart a minimum percentage, to be fixed by Government of the Public Works Cess surrendered to them, with effect from April 1913, for expenditure on sanitation and water-supply.’ ”

Some time ago, Your Excellency’s Government impressed upon the Rural Boards the necessity of improving sanitation and water-supply. The complaint was made, and, I believe, rightly made, that the funds placed at their disposal were not adequate. Since that time Your Excellency’s Government have, with the sanction of the Imperial Government, placed several lakhs of rupees at the disposal of these Rural Boards. The time, I therefore venture to think, has come when Government should take the power of reserving a portion of this large sum of money for expenditure on improved sanitation and water-supply. I must admit—or I must confess—and people with experience of District Boards will perhaps agree with me,—that a majority of District Boards represented by their Chairmen are not yet fully alive to the necessity of improved sanitation and water-supply in the areas under their jurisdiction. This apathy no doubt arises from the fact that there is a want—a conspicuous want—of district schemes for the improvement of sanitation and water-supply—schemes which have been found in practice very difficult to devise and frame. They find it easier to spend money upon communications and other purposes, very useful in themselves, than to devise comprehensive schemes for the improvement of water-supply and sanitation. I venture, therefore, to suggest in these circumstances, that Your Excellency’s Government will approve of the principle involved in this Resolution. There is, however, one matter which has not escaped my notice. Before Government can take the power of reserving a portion of the Public Works Cess surrendered to the rural authorities, the Cess Act may have to be amended. Your Excellency has just informed us that it is in contemplation to introduce a bill to amend the present Cess Act, and, that being so, perhaps at this stage, I should not press this Resolution, and I would accordingly with Your Excellency’s leave, beg to withdraw it.”

The Resolution was then by leave of the President withdrawn.

The Hon’ble NAWAB SYED SHAMS-UL-HUDA, said :—

“ My Lord, I would beg, with Your Excellency’s permission, to make a statement which will probably cut short the discussion on the next item of business—that is, the resolution to be moved by the Hon’ble Rai Hari Mohan Chandra Bahadur. It is likely to be within the recollection of this Council that on the 1st September, which is rather a memorable day, when the Hon’ble Babu Surendra Nath Ray had the credit of defeating the Government over a resolution which he had on that day moved, while opposing that resolution in the form in which it was made, I stated on behalf of Government that the best way of obtaining the object which my Hon’ble friend had in view would be to reconstitute the Sanitary

Board in such a way as to include in it a certain number of non-official members. This offer was not at that time accepted, and the resolution for the constitution of an Advisory Board consisting of official and non-official members was carried. After this resolution was carried we considered the matter, and we thought that a case had been made out for some opportunity being given to non-official members to advise Government, and the question received a certain amount of impetus from a resolution of which we got notice from the Hon'ble Rai Hari Mohan Chandra Bahadur.

We have, my Lord, reconstituted the Sanitary Board. We have added three non-official members to that Board, two of whom are Indians, and one a mill representative, and we have also revised the rules relating to conduct of business by the Sanitary Board, and, I believe, having regard to what we have already done, that my Hon'ble friend Rai Hari Mohan Chandra Bahadur will not think it necessary to press his motion."

The Hon'ble RAI HARI MOHAN CHANDRA BAHADUR, said :—

"My Lord, as the Government orders have already been published enlarging the constitution of the Sanitary Board practically on the lines suggested by me in my resolution, with Your Lordship's permission, I beg to withdraw the resolution."

The Resolution, below, was accordingly by leave of the President withdrawn.

The Hon'ble Rai Hari Mohan Chandra Bahadur to move the following resolution :—

This Council recommends to the Governor in Council that the existing Sanitary Board of this Presidency be enlarged by the addition of non-official Indians, to whom should be specially assigned the duty of—

- (i) advising the District Boards and Municipalities as to the drawing up of schemes for the sanitary improvement and medical relief of, and for the provision of an improved water-supply for, the areas comprised within their jurisdiction, and
- (ii) subsequently assisting the said bodies to give effect to any of the schemes aforesaid to which Government sanction may be accorded.

HIS EXCELLENCY—

Under rule 10 of the Resolution Rules, I postpone the moving of the resolution below to the next meeting of Council.

The Hon'ble Maulvi A. K. Faz-ul-Haq to move the following resolution :—

The Council recommends to the Governor in Council that—

- (i) steps be taken to place specially selected Muhammadan Inspectors in charge of Muhammadan education in all the Divisions of the Presidency, and
- (ii) the orders recalling the special Inspectors in charge of Muhammadan education to general duty be withdrawn.

ADJOURNMENT.

The Council was then adjourned to Tuesday, the 13th January, 1914, at 11 A.M.

3. Government reserves to itself the right to alter the quantity and class of opium to be offered for sale in each month. No reduction in the quantities to be sold, however, will be made without three months' previous notice.

4. The following are the conditions of sale. Government reserves to itself the right of altering all or any of these conditions after giving three months' previous notice, and power is reserved to vary the upset price referred to in condition (ii) at any time without such previous notice:—

(i) The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

(ii) The opium will be ordinarily offered for sale at an upset price of Rs. 1,200 per chest of uncertified opium and will be sold to the highest bidder above that price, except under the circumstances for which provision is made by clause (xiii) of these conditions of sale. The bids must advance by Rs. 5 at a time.

(iii) The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M., but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of Government, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or if the whole quantity advertised shall not be sold on the day appointed, the Government may dispose of the lots which remain on hand at a future sale.

(iv) Each lot shall contain five chests, excepting one lot at the December sale, which will consist of four chests of Patna opium and one chest of Benares opium.

(v) A promissory note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit

DEPOSIT.

When the amount bid is less than Rs. 1,200 per chest, Rs. 300 per chest.

On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest.

On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.

And so on, Rs. 100 being added to the deposit for every bid additional to the extent of Rs. 400.

on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such promissory notes shall be redeemed on the part of the purchasers at this office by Bank of Bengal receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday,

the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as Government shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

(vi) The said promissory notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

(vii) The promissory notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

(viii) No tender of money, Bank of Bengal receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause (v) on the fifth day following the day of sale, will be afterwards accepted: Provided always that money so subsequently tendered may be taken in payment of the said promissory note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. (v) and No. (vi).

(ix) The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall

on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and, in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as Government shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

(x) Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

(xi) No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

(xii) The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India notes, Bank of Bengal receipts, or Government securities, a sum equal to the amount for which a promissory note would otherwise be taken under the fifth of these conditions.

(xiii) With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bona fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 1,200 specified in the second of these conditions.

(xiv) The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether fifteen lots, provided always that there remain a sufficient number of lots of the opium to complete the said fifteen.

(xv) In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

(5) The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Government of Bengal:—

No. 1—Certificate of the opium advertised for sale.

No. 2—Report of the examination of such opium.

(6) The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug, when packed at

the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the office of the Government of Bengal.

(7) Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Government of Bengal. But, in accordance with established usage, under no circumstances will the Government entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

By order of the Governor in Council,

H. L. STEPHENSON,

Secretary.

HISTORY.

History of India.

The following books on Indian History are recommended to indicate the standard of knowledge required:—

Adharchandra Mookerjee	A Short History of the Indian People (revised edition, 1910).
Haraprasad Sastri	... History of India (revised edition, 1907 or later).
Sir William Hunter	... Brief History of the Indian Peoples.

A. F. Rudolf Hoernle and H. A. Stark.	History of India (Hindu Period only).
C. R. Wilson	... History of India, revised edition (British Period only).
Karim and Ghosh	... Students' History of India (revised edition, 1910).
Vincent A. Smith	... The Students' History of India.
M. Prothero and Vidya-bhusan.	Primer of the History of India.
Kaliprasanna Bandyopadhyay.	Bharatbarser Itihas (History of India in Bengali).
Nrisinhachandra Mukhopadhyay	Matriculation History of India in Bengali.

Administration and Progress of India under British Rule.

N. N. Ghose	... England's Work in India.
-------------	------------------------------

GEOGRAPHY.

The following books are recommended as indicating the methods of study as well as the standard of knowledge required:—

A. J. Herbertson	... The Oxford Geographies, Vol. II.
------------------	--------------------------------------

The World with fuller treatment of India (Longman's Geographical Series for India, Book II).

J. F. Unstead	... The Practical Geography, Parts I and II.
---------------	--

The following books are recommended for the use of teachers:—

Blanford	... The Rudiments of Physical Geography for the use of Indian Schools.
Patterson	... Geography of India, Parts I and II.

The following book is recommended for the use of teachers in connection with the teaching of "Sand Modelling" in the lower classes of schools:—

A. E. Frye	... The Child and Nature.
------------	---------------------------

Every school that intends to undertake instruction in Geography for the Matriculation Examination is required to possess the apparatus mentioned in the following list:—

1.—The total cost need not exceed Rs. 65—

1. A measuring tape.
2. A magnetic compass.
3. Squared paper and tracing paper.
4. Clay, dry sand, paper pulp for modelling.
5. A globe, not less than 14 inches in diameter, with writing surface, and with lines of latitude and longitude, and outlines only of the landmasses, marked upon it.
6. A map of the school locality on a scale of 4" or 6"=1 mile.
7. A map of the district in which the school is situated on the scale 1"=1 mile.

8. A coloured map of the Province.
9. A coloured political map of India.
10. A physical map of India.
11. A relief map of India.
12. A map of the world on Mollweide's equal area projection and a map of Asia.

It is essential that the students should be provided with atlases, or with the necessary hand-maps. Maps for school work should not contain too much detail, or be crowded with names.

II.—The following additional equipment is recommended when it can be provided, but that lack of it is not to be considered as a bar to the recognition of the school in Geography :—

1. A thermometer.
2. A mercury barometer.
3. A rain-gauge.
4. A small collection of typical rocks, in particular those of the Province and of India.
5. A small museum of typical products.
6. A good standard atlas.
7. Geographical pictures.

The attention of teachers is requested to the raised maps of Bengal and Eastern Bengal and Assam made of paper pulp prepared by Babu Kailas Chandra Datta, Head Pandit, Habiganj Government Girls' School, Sylhet, and sold for Rs. 7 and Rs. 5, respectively.

(2) Globes of all kinds are made by George Philip and Son, London, W. and A. K. Johnston, London, and Messrs. Ruddiman Johnston, London.

Small hand Globes of German make can be obtained through the Calcutta School Book Society for about a rupee each.

(3) The "Comparative" series of large wall maps of the continents published by George Philip and Son is good and up to date; so also are the Orographical wall maps published by Edward Stanford. Messrs. Ruddiman Johnston publish a series of smaller wall maps which includes maps of India illustrating various distributions.

Messrs. Nelson's wall atlases are good. Mr. S. B. Chatterjee publishes District Maps; also ordinary and relief maps of the Province.

Babu L. M. Basu, the drawing master of the Dacca Collegiate School, has published good relief maps of Eastern Bengal and Assam and of India.

The Vidal-Lablache French wall maps on strong card board, named on one side, and the same map without names on the reverse, published by Armand Colin, Paris, are good and cheap. They measure 46 inches by 39 inches and can be delivered in Calcutta for Rs. 4-14 each.

(4) The hand maps, coloured to indicate relief, published by the Diagram Company, West Barnes Lane, New Malden Surrey, at one penny each, are the best of their kind.

The uncoloured half-penny maps, showing river systems and a few towns, published by the same Company, are excellent for class use.

The Autograph hand maps, with hill shading in brown, published by Edward Stanford, London, at one penny each, are very good, and are larger than the Diagram Company's hand maps. The 15 inches map of the world on Mollweide's equal area projection is specially to be commended.

(5) Wall pictures of considerable artistic merit are published by Messrs. Edward Arnold of Leeds, Messrs. Hachette of Paris, and Messrs. Hölzel of Vienna and Messrs. Longmans, Green & Co. They cost, delivered in India, from two to three rupees each.

Map lantern slides, and view slides especially prepared for geography teaching, are sold by the Diagram Company for two or three shillings each. Mr. Bartington Smith of Darjeeling also sell good picture slides of the Himalayas at Rs. 15 per dozen.

ELEMENTARY MECHANICS.

The following book is recommended:—

Sir Philip Magnus ... Elementary Mechanics (Longmans, 1903).

The following list of apparatus is prescribed as indicating the approximate requirements of a recognised High School seeking to teach Elementary Mechanics for the Matriculation Examination:—

Plumb-line and level.
Simple Lever (including brass slotted weights).
Roman Steelyard.
Lecture apparatus for experiments on moments.
George's New Atwood's Machine.
Stop-watch.
Glazebrooke's apparatus (to demonstrate movement of a body).
Hick's Ballistic Balance.
Compound Wheel and Axle.
4 Single brass Pulleys.
2 " " "
2 Triple " "
Weston Differential Pulley Blocks ($\frac{1}{4}$ ton).
16 feet of chain at 6d. per foot.
Inclined Plane.
Parallelogram of Forces apparatus.
Wall Crane.
Becker's New Physical Balance.
Set of Gramme Weights (200 grams to 1 mgr.).
2 Composition-Ivory Balls.

NOTE.—The above list is not exhaustive, and much of it might be replaced by simpler forms that could probably be made far more cheaply by any clever *mistry* under proper supervision. In most cases, however, it will probably be found advantageous to buy such a set as indicated in the list specially for demonstration purposes, and subsequently to develop simplified duplicates, illustrating the same principles, which the boys should be given opportunity actually to experiment with on their own individual accounts or working in pairs.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

B.Sc. EXAMINATION, 1916.

MATHEMATICS.

Pass Course.

The following books are recommended :—

1. Higher Plane Trigonometry—
 Todhunter ... Plane Trigonometry, edited by Hogg.
2. Plane Analytical Geometry—
 C. Smith ... Elementary Treatise on Conic Sections.
 Loney ... Elements of Co-ordinate Geometry.
3. Differential Calculus—
 Edwards ... Differential Calculus for Beginners.
 Ganesh Prasad ... Differential Calculus.
4. Integral Calculus and Differential Equations—
 Edwards ... Integral Calculus for Beginners.
 Taylor The Differential and Integral Calculus
 and Differential Equations.
 Ganesh Prasad ... Integral Calculus.
5. Hydrostatics—
 Besant Elementary Hydrostatics.
 Loney Elements of Hydrostatics.
6. Astronomy—
 Parker Elements of Astronomy.

Students are recommended to use " Stars in the Northern Tropics " by T. Bhattacharyya.

Honours Course.

1. Higher Algebra—
 Hall and Knight ... Higher Algebra.
 C. Smith ... A Treatise on Algebra.
2. Elementary Theory of Equations—
 Cajori Introduction to Theory of Equations,
 Chapters I—VII.
3. Higher Plane Trigonometry—
 Todhunter ... Plane Trigonometry. edited by Hogg.
4. Plane Analytical Geometry—
 Loney Elements of Co-ordinate Geometry.
 C. Smith ... Elementary Treatise on Conic Sections.
 Salmon Conic Sections.
 Askwith... ... Plane Co-ordinate Geometry.
5. Elementary Solid Geometry—
 C. Smith ... Elementary Treatise on Solid Geometry.
 Bell Analytical Geometry of Three Dimen-
 sions.
6. Elementary Principles of Vectors—
 Kelland and Tait ... Introduction to Quaternions, 3rd Edi-
 tion, edited by Knott.
 Henrici and Turner Vectors and Rotors.

7. Differential Calculus—

Williamson ... Differential Calculus.

8. Integral Calculus and Differential Equations—

Williamson ... Integral Calculus.

Murray ... Introductory Course in Differential Equations.

9. Statics—

Minchin ... Statics, Volume 1.

Jeans ... Theoretical Mechanics.

10. Dynamics of a Particle—

Loney ... Dynamics of a Particle.

Jeans ... Theoretical Mechanics.

Cox ... Mechanics.

11. Hydrostatics—

Besant ... Elementary Hydrostatics.

Loney ... Elements of Hydrostatics.

Greaves ... Elementary Hydrostatics.

12. Astronomy—

Parker ... Elements of Astronomy.

Young ... Manual of Astronomy.

Candidates are recommended to use "Stars in the Northern Tropics" by T. Bhattacharyya.

A.B.—Candidates who take up Mathematics at the B.A. or B.Sc. Examination are recommended to refer to Saxeby's Practical Mathematics. Candidates who take up Honours in Mathematics at the B.A. or B.Sc. Examination are recommended to refer to Cox's Mechanics.

PHYSICS.

Pass Course.

Deschanel and Evoutt ... Treatise on Natural Philosophy, Parts I, II and IV.

Hadley ... Magnetism and Electricity for Students.

Watson ... Text-book of Physics.

Pass Practical.

Schüster and Lees ... Advanced Exercises in Practical Physics.

Harrison ... A Course of Practical Physics.

Glazebrook and Shaw ... Practical Physics.

Honours Course.

(In addition to the books prescribed for the Pass Course.)

Poynting and Thomson ... Sound.

Edser ... Heat for Advanced Students.

Maxwell ... Theory of Heat.

Edser ... Light for Students.

Foster and Porter ... Elementary Treatise on Electricity and Magnetism.

Wagstaff ... Properties of Matter.

Honours Practical.

Watson ... Text-book on Practical Physics.

Henderson ... Practical Physics.

A.B.—Candidates who take up the Honours Course in Physics at the B.A. or B.Sc. Examination are recommended to refer to Saxeby's Practical Mathematics.

CHEMISTRY.*Pass Course.*

Newth	...	...	Inorganic Chemistry.
Holleman	...	...	Organic Chemistry.
Francis Jones	...	...	Practical Chemistry.
Alexander Smith	...	...	General Inorganic Chemistry.
F. Mollwo Perkin	...	...	Qualitative Chemical Analysis— Organic and Inorganic.
Clowes and Coleman	...	...	Quantitative Analysis.
J. B. Cohen	...	...	Theoretical Organic Chemistry.

Honours Course.

(In addition to the books recommended for the Pass Course.)

H. C. Jones	...	...	Elements of Physical Chemistry.
Ostwald	...	...	Foundations of Analytical Chemistry.
J. Wade	...	...	Introduction to the Study of Organic Chemistry.
Valentine and Hodgkin- son	...	...	Practical Chemistry.
Cohen	...	...	Practical Organic Chemistry.
Caven and Landor	...	...	Systematic Inorganic Chemistry.
Ostwald	...	...	Outlines of General Chemistry.
J. Walker	...	...	Introduction to Physical Chemistry.
F. Mollwo Perkin	...	...	Practical Methods of Inorganic Chemis- try.

N.B.—Candidates who take up Chemistry at the B.A. or B.Sc. Examination are recommended to refer to Saxelby's Practical Mathematics.

BOTANY.*Pass Course.*

Vines, S. H.	...	...	An Elementary Text-book of Botany (London, 1905).
Scott, D. H.	...	...	Structural Botany, 2 Vols. (London, 1904-06.)

{ Roxburgh	...	...	Flora Indica, edited by C. B. Clarke (Calcutta, 1874).
Strasburger and Hill- house	...	...	Practical Botany (latest edition).

Honours Course.

(In addition to the text-books for the Pass Course.)

Strasburger, E.	...	...	Text-book of Botany, translated by Porter, revised by Lang (Third Edition, London).
Reynolds Green, J.	...	...	Vegetable Physiology (London, 1900).
Schimper, A. F. W.	...	...	Geography of Plants (Oxford, 1903).
Stape	...	...	Fossil Botany.
Bower	...	...	Practical Botany, 1902.

ZOOLOGY.*Pass Course.*

Boas	...	Text-book of Zoology.
Shipley and MacBride	...	Zoology.
Oskar Hertwig	...	} The Cell.
and		
H. J. Campbell	...	
R. E. Lloyd	...	An Introduction to Biology for Students in India.
P. J. Parker and W. N. Parker	...	An Elementary Course of Practical Zoology.
Foster and Balfour	...	The Elements of Embryology (edited by Sedgwick and W. Heape).
Wallace	...	Darwinism.
A. D. Imms	...	A Laboratory Sketch-book of Zoology for Indian Students.

Honours Course.

(In addition to the books prescribed for the Pass Course.)

Miall and Hammond	...	The Structure and Life-History of the Harlequin Fly.
Miall and Denny	...	The Cockroach.

PHYSIOLOGY.*Pass Course.*

Halliburton	...	Hand-book of Physiology.
-------------	-----	--------------------------

Practical.

Schafer	...	Essentials of Histology

Practical.

The same as for the pass course.

SYLLABUS IN EXPERIMENTAL PHYSIOLOGY.*Pass Course.*

- The induction coil ; single shocks ; short circuiting key ; effect of single shocks on the tongue ; break-shock is stronger than the make-shock. Helmholtz's Modification ; Neef's Hammer.
- Pithing a frog ; nerve-muscle preparation. Mechanical, chemical, thermal and electrical stimulation of muscle and nerve.
- The Graphic method : Simple lever ; crank lever (myograph) ; moist chamber, minimal and maximal excitation with single induction shocks (make and break). Stimulation by constant current : contraction of muscle only at make and break.

The muscle curve:—Single contraction of a frog's muscle: the latent period, the period of contraction and the period of relaxation. Time-tracing by tuning-fork. Method of after-loading. The influence of temperature and of load on muscular contraction. The work performed by a muscle during a twitch.

Elasticity and extensibility of muscle.

Summation of muscular contraction: tetanus.

Fatigue of muscle.

Thickening of a muscle on contraction.

Bernard's curare experiment.

Stimulation of a motor nerve; unequal excitability (greater nearer the centre of a motor nerve); excitability of flexor and extensor nerves.

Velocity of nerve-impulse (myographic method).

Electro-Physiology:—Galvani's experiment of contraction with metals; Galvani's experiment of contraction without metals.

The Frog's heart:—Beating of the heart; effect of heat and cold (heart *in situ*); section of the heart; effect of heat and cold on excised heart.

Stannius' experiment.

Graphic record of the beat of the heart (suspension method and also direct registration with heart-lever).

Pulse—Sphygmographic tracing.

Blood-pressure in man: Sphygmometer and Sphygmomanometer.

Reflex action (simple experiments on a pithed frog).

Vision:—Accommodation; Scheiner's experiment; near and far point.

Purkinje-Sanson's images: Phakoscope; Blind spot; yellow spot; Colour vision; Complementary colours.

HONOURS COURSE.

Additional Experiments—

The Induction Coil—Break extra-current of Faraday.

The Rheonome: Effect of sudden variation of current.

Isotonic and Isometric contraction.

Influence of veratrine on muscular contraction.

Indefatigability of nerve.

Excitation of muscle by constant current: Polar excitation of a muscle.

Electrotonus. Electrotonic changes in excitability and conductivity of a nerve.

Kuhne's experiment of contraction without metals.

Examination of currents in muscle, nerve and heart by means of the reflecting galvanometer.

Frog's heart—Minimal stimulus causes maximal contraction.

"Staircase effect." Single contraction of the ventricle.

Tetaniisation. Refractory period. Stimulation of the vagus.

Action of drugs (Muscarin and Atropin) on the heart.

Voice and Speech: Laryngoscope.

Vision: Ophthalmoscope; Perimeter.

GEOLOGY.

No text-books are prescribed or recommended. The subject is to be studied with the help of the Syllabus prescribed in the Regulations.

EXPERIMENTAL PSYCHOLOGY.

The subject is to be studied as defined by the Syllabus. Students are recommended to use one or more of the following books or select portions thereof, with special reference to the course laid down in the Syllabus:—

Pass Course.

I.—General Psychology—

Hoffding	...	Outlines of Psychology.
Wundt	...	Human and Animal Psychology.
William James	...	Text-book of Psychology.
J. Dunlop Leckley	...	The Nervous System (Longman & Co.).

Preparatory Reading—Students are advised to read Oroom Robertson's Elements of Psychology before joining the regular class.

II.—Experimental Psychology—

Titchener ...	...	Text-book of Psychology.
Külpe ...	...	Outlines of Psychology.
Scripture ...	...	New Psychology.

Laboratory Course—Titchener's Experimental Psychology, Vol. I, Part I. and Vol. II, Part I.

Honours Course.

I.—General Psychology—Same as in the Pass Course.

II.—Physiological and Comparative Psychology.

Wundt ...	...	Outlines of Physiological Psychology (Vol. I).
Ladd ...	...	Elements of Physiological Psychology.
Romanes ...	...	Mental Evolution in Man.
Romanes ...	...	Mental Evolution in Animals.
Lloyd Morgan	...	Comparative Psychology.
Herbert Spencer	...	Principles of Psychology.
M. Greenwood (Jr.)	...	Physiology of the Sense Organs.

III.—Experimental Psychology—

In addition to the books recommended for the Pass Course, the following:—

Ziehen	...	Introduction to Physiological Psychology.
Ladd	...	Outlines of Physiological Psychology. (Latest edition.)

N.B.—No text-books are recommended for the guidance of teachers.

M.A. EXAMINATION, 1916.

ENGLISH.

COMMON PAPERS FOR GROUPS A AND B.

Paper I.—General History of English Literature.

No text-books.

Paper II.—Shakespeare and post-Elizabethan Drama.

Shakespeare	...	Hamlet ; Antony and Cleopatra.
Dryden	...	All for Love.
Sheridan	...	The Rivals.
Matthew Arnold	...	Merope.

Paper III.—Poetry.

Spenser	...	Faerie Queene, Books I and II.
Palgrave	...	Golden Treasury of Songs and Lyrics, Book III.
Milton	...	Minor Poems.
Wordsworth	...	Sonnets (as in Matthew Arnold's Selections from Wordsworth).
Tennyson	...	Idylls of the King (except Gareth and Lynette and Merlin and Vivien).

Paper IV.—Prose.

Bacon	...	The Advancement of Learning.
Burke	...	Reflections on the French Revolution.
Morley	...	Studies in Literature.
Carlyle	...	Sartor Resartus.

GROUP A.

Paper V.—(a) Text-book.

Chaucer and outlines of Historical English Grammar.

Chaucer	...	The Prologue ; Legend of Good Women ; the Book of the Duchess ; Knight's Tale.
---------	-----	--

(b) Books recommended for study.

Morris	...	Historical English Accidence
Kellner	...	Historical English Syntax.

Paper VI.

Shakespeare and the Elizabethan Drama

Paper VII.—Selected Period of Prose.

Chief Prose writings from 1850—1870.

Paper VIII.—Essay or Essays on subjects connected with the course.

No text-books.

GROUP B.

Paper V.—English Language and Literature prior to 1100 A.D.

Sweet ... Anglo-Saxon Reader, Part I.

Paper VI.—English Language and Literature from 1100 A.D. to 1500 A.D. including Chaucer.

Morris and Skeat ... Specimens of Early English, Parts I and II.

Skeat ... Specimens of English Literature.

Paper VII.—Historical English Grammar, including the Elements of Teutonic Philology.

BOOKS RECOMMENDED FOR STUDY.

Morris ... Historical English Accidence.

Kellner ... Historical English Syntax.

Skeat ... Principles of English Etymology, 1st and 2nd Series.

Tucker ... Natural History of Languages.

Paper VIII.—Essay or Essays on subjects connected with the Course.

No text-books.

GREEK.

(To be notified hereafter.)

LATIN.

(To be notified hereafter.)

SANSKRIT.

The course shall include the following:—

(The books prescribed for the first four papers are common to all the groups.)

Paper I.—(a) Ashtaka II of the Rigveda with Sayana's commentary thereon.

(b) Sayana's Introduction to his commentary on the Rigveda.

Paper II.—Siddhanta-Kaumudi (whole).

Paper III.—(a) Comparative Philology distinguished from Historical

General principles and method of Comparative Philology. Grammar and the Science of language; comparison of languages on the basis of their historical kinship; criteria of kinship and of degrees of kinship among languages; reconstruction of missing parent-tongues on the basis of their historical descendants; classification of languages on the genetic principle as opposed to the principle of morphological development; establishment of the Indo-Germanic speech-family; sound-shifting (vocalic and consonantal) in Sanskrit, Zend, Greek, Latin and Gothic, illustrated by a few apt examples; Grimm's law explained by a few apt examples; Verner's law explained by a few apt examples; ablaut and umlaut explained by a few apt examples; the theory of velar gutturals explained by a few apt examples; the theory of sonant nasals explained by a few apt examples; accentuation in Vedic Sanskrit and in Greek contrasted with accentuation in Early Latin and in Gothic; important roots and radicals common to Sanskrit, Zend, Greek, Latin and Gothic; important organic flexions common to Sanskrit, Zend, Greek, Latin and Gothic; important prefixes and suffixes common to Sanskrit, Zend, Greek, Latin and Gothic; important idioms and constructions common to Sanskrit, Zend, Greek, Latin and Gothic; criteria of an Indo-Germanic tongue; the Indo-Germanic speech-family distinguished from the Semitic speech-family; Sanskrit compared and

contrasted with Finnish, Turkish, Sumerian, Hebrew, Chinese, Aztek, Bantu and Basque; methods of scientific Etymology. **Phonetics distinguished from Acoustics; anatomy and physiology of the larynx and the pharynx; breath, whisper, voice and speech; formation and localisation of different vowels and consonants; value of the laryngoscope; value of the linguaphone; pronunciation of the letters of the Sanskrit, Zend, Greek, Latin and Gothic alphabets; phonetic transcription of nomic alphabets; Bell's system of visible speech; Sweet's narrow Roman alphabet; Prince Bonaparte's alphabet; bearing of the Pratisakhya on Phonetics.**

(b) History (including description of geographical areas and chronological periods) of (1) the Indo-Iranic speech-group, (2) Armenian, (3) the Hellenic speech-group, (4) Albanian, (5) the Slavo-Lettic speech-group, (6) the Italic speech-group, (7) the Celtic speech-group, and (8) the Germanic speech-group. A short account of the phonology and grammar of (1) Vedic Sanskrit, the Ancient Apabhramsa, and the Paisachi Bhasha, (2) Classical Sanskrit, Magadhi (Pali), and Sauroseni-Maharashtri (Prakrit), (3) the popular Prakritic dialects, and (4) the seven Gaudian languages and their collaterals.

Subdasaktiprakasika and its bearing on the Science of language.

Paper IV.—Two essays, (a) dealing with some subject connected with the history of Sanskrit literature generally; (b) dealing with some subject connected with the history of the special department covered by the group taken up.

Papers V, VI, VII and VIII.—One of the following groups to be selected by the candidate:—

A. (Literature.)

Paper V.—(a) Poetry texts:—

Naishadha Charita	...	Cantos 15, 16 and 17, with Mallinatha's commentary.
Kamandakiya Nitisāra	...	(Jibananda's edition) Chapters 8, 9, 10 and 11 (pages 37—62).
Sukra Nitisāra	...	(Jibananda's edition) Chapter 4 (pages 507—670).
Mahabharata	...	Rājdharmā, Santiparva, Chapters 56—60, 68, 69 and 86—88, Pratap Ray's edition.
Magh	...	Cantos 14 and 15, with Mallinatha's commentary.

(b) Translation from English into Sanskrit.

Paper VI.—(a) Drama texts:—

Vikramorvasi, Malati Madhava, Mrichhakatika, Venisanhara Mahaviracharita.

Vararuchi's Prakrit Prakasa as is necessary for the appreciation of the Prakrit passages.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Prose texts:—

Kadamvari	...	Part II.
Harshacharita	...	Chapters 5, 6 and 7.

(b) Unseen passages in Sanskrit Prose for translation into English.

Paper VIII.—(a) Rhetoric and Prosody, namely, Kavyaprakasa, Ekavali, arasvati-Kanthavarana, Sahitya-darpana and Pingala's Chhandasutras with Lalayudha's Vritti.

(b) Unseen passages in Sanskrit Poetry for translation into English.

B. (Vedas.)

Paper V.—(a) Yaska's Nirukta and Pingala's Ohhandasutras with Halayudha's Vritti Pratisakhya of the Rig-Veda, with the commentary of Uvata.

Paper VI.—(a) Aitareya Brahmana with Sayana's commentary.

(b) Simple unseen passages in Vedic Sanskrit for translation into Classical Sanskrit.

[The interpretations of any recognized Indian School will be accepted.]

Paper VII.—(a) Vrihadaranyaka ... Chapters III and IV.

Ohhandogya ... V, VI, VII and VIII.

(b) Simple unseen Sanskrit passages from any Upanishad for translation into English.

Paper VIII.—(a) Grihya Sutra—Gobhila with commentary.

(b) Translation from English into Sanskrit.

C. (Mimansa and Smriti.)

Paper V.—(a) Mimansa Sutras with Sabara Bhashya, first six chapters.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Mimansa Philosophy, such as the Sloka-Vartika and the Tantra-Vartika, for translation into English.

Paper VI.—(a) Jaiminiya Nyaya Mala Vistara and Mimansa Nyaya-prakasa.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Mimansa Philosophy, such as the Mimansa-Balaprakasa, and the Tupteeaka, for translation into English.

Paper VII.—(a) Manu Samhita with Kulluka's commentary.

Dharma Sutras of Apastamba and Gautama with Haradatta's commentary.

(b) Grihya-Sutra—Gobhila.

Paper VIII.—(a) Yajurvediya Sanhita with Vijnanesvara's Mitakshara. Parsara's Institutes with Madhava's commentary.

(b) Translation from English into Sanskrit.

D. Vedanta.

Paper V.—(a) Vedantasara (Jacob's Edition), Panchadasi, Vedanta Paribhasha Hastanataka (with commentary), and Siddhantalesa.

(b) Simple unseen Sanskrit passages from any work on Vedanta Philosophy, such as the Vivaranaprāmēya-Sangraha, for translation into English.

Paper VI.—(a) Vedantasutras with Sankara Bhashya.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Srihashya—Chapter I, Part I.

(b) Advaita-Brahma-Siddhi.

Paper VIII.—(a) Bhagavadgita and Ohhandogya as in Group B.

Munda, Mandukya.

Svetasvatropanishad with Sankara's commentary.

(b) Passages for translation into English from the Anubhashya and the Saivabhashya.

E. (Sankhya and Yoga.)

Paper V.—(a) Sankhyasutras of Kapila, with Vritti of Aniruddha.

Sankhya-Karika of Iswarakrishna, with Bhashya of Gaurapada.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Sankhya Philosophy, for translation into English.

Paper VI.—(a) Sankhya Pravachana Bhashya.

Sankhya-Sara and Sankhya-Tattva Kaumudi.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Yoga Sutras of Patanjali, with Bhashya of Vyasa and Vritti of Bhoja Yoga-Vartika of Vijnana-Bhiksha.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Yoga Philosophy, for translation into English.

Paper VIII.—(a) Yoga Vasishtha—Chapter on Nirvana, Part II.

Sarbadarsana-Sangraha.

(b) Translation from English into Sanskrit.

F. (Nyaya and Vaiseshika.)

Paper V.—(a) Nyayasutras of Gautama, with the Bhashya of Vatsyayana, Vartika of Udyotkara, and Vritti of Visvanatha.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Nyaya Philosophy, for translation into English.

Paper VI.—(a) Nyayamanjari of Jayanta Bhatta.

Khandana Khanda Khadya of Sriharsha—Chapter I.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Bhasha Parichheda, Siddhanta-muktavali, Kusumanjali of Udayanacharyya with commentary of Ruchhidatta and loss of Vardamana.

(b) Translation from English into Sanskrit.

Paper VIII.—(a) Vaiseshika Sutras of Kanada, with Bhashya of Prasastapada, Nyayakandali of Sridhara and Vritti of Jayarain.

Saptapadarthi of Sivaditya, with commentary of Yatinramadhava.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Vaiseshika Philosophy, for translation into English.

G. (General Philosophy.)

Paper V.—(a) Sankhyasutras of Kapila with Vritti of Aniruddha.

Sankhya Tattva Kaumudi.

Yogasutras of Patanjali with the Bhashya of Vyasa and Vritti of Bhoja.

(b) Simple unseen Sanskrit passages from any work on Philosophy for translation into English.

Paper VI.—(a) Nyayasutras of Gautama with Bhashya of Vatsyayana and Vritti of Visvanatha. Vaiseshikasutras of Kanada, with Bhashya of Prasastapada, and Nyayakandali of Sridhara.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Vedantasara (Jacob's Edition), Bhagavadgita, Vedantasutras, with Sankara's commentary, Chapter I, Parts I and IV; Chapter II, Part II.

(b) Translation from English into Sanskrit.

Paper VIII.—(a) Nyayaratnamala of Parthasarathi Misra: Mimansa Nyaya Prakasa of Apadeva. Upanishads—Isa, Kena, Katha, Prasna, Munda, Mandukya and Svetasvatara with Sankara's commentary.

(b) Simple unseen Sanskrit passages from any work on Philosophy for translation into English.

H. (Prakrit.)

Paper V.—(a) Prasna Vyakarana and Vipakasutra.

(b) Translation from English into Sanskrit (or Prakrit, at the option of the candidate).

Paper VI.—(a) Prakrit portions of the following dramas:—

Sakuntala, Vikramorvasi, Malavikagnimitra, Uttaracharita, Malati-madhava, Mahavira-Charita, Mrichhakatika, Mudrarakshasa, Ratnavali, Karpuramanjari, Venisanhara.

(b) Translation from Sanskrit into Prakrit.

GOVERNMENT OF BENGAL.

BENGAL LEGISLATIVE COUNCIL.

NOTIFICATION.

No. 2417 L., dated the 15th December, 1913.—His Excellency the President having been pleased to order, under rule 39 (b) of the Bengal Legislative Rules, 1912, the publication of the Report of the Select Committee to which the Bill “to abolish the Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies, and to provide for the application of the property and funds thereof as nearly as possible in accordance with the intentions of the founders” was referred, the Report of the said Committee, with the Bill, as amended by them, annexed, is hereby published for general information.

REPORT OF THE SELECT COMMITTEE ON THE DOVETON TRUST BILL, 1913.

We, the undersigned Members of the Select Committee, to which the Bill "to abolish the Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies, and to provide for the application of the property and funds thereof as nearly as possible in accordance with the intentions of the founders," was referred, have the honour to submit this our Report, together with the Bill, as amended by us, annexed thereto.

2. We have carefully examined the Bill and consider that it is suitably framed to give effect to the objects which it has in view, but we would recommend that two slight changes be made therein :—

(a) In clause 4, we would follow more closely the precedent of the Charitable Endowments Act (VI of 1890, sec. 3), and substitute for the words "an officer" the words "an officer of the Government by the name of his office", and so give greater precision to the intentions of Government. Without some such amplification as this, the clause might give rise to some uncertainty.

(b) The proviso to clause 6 (2) strikes us as unnecessary in the circumstances of the present Bill, and we would omit it.

3. We recommend that the Bill, as thus amended, be passed.

CALCUTTA;

The 15th December, 1913.

A. W. WATSON,

Secretary to the Bengal Legislative Council.

THE DOVETON TRUST BILL, 1913;
(as amended by the Select Committee.)

BILL

to abolish the Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies, and to provide for the application of the property and funds thereof as nearly as possible in accordance with the intentions of the founders.

Preamble.

WHEREAS, on the first day of March, 1823, an Educational Society was established in Calcutta, under the designation of "The Parental Academic Institution," with the object of establishing one or more schools under its own control in order to procure the means of affording to youth the best education of which existing circumstances would admit, and, as far as the state of funds would allow, to provide education for the orphans of members dying not possessed of property sufficient to educate their children;

And whereas the designation of the said Society was changed in the year 1855 to that of "The Parental Academic Institution and Doveton College";

And whereas the said Society was registered as a Society under the Societies Registration Act, 1860, on the twenty-ninth day of August, 1881; XXI of 1860

And whereas the designation of the said Society was again changed in the year 1886, on the incorporation therewith of "The Young Ladies' Institution," to that of "The Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies";

And whereas various properties and funds have from time to time been vested in the Governing Body of the said Society, and in other persons, for the benefit of, or in trust for, the said Institution or pupils to be educated therein;

And whereas the said Institution is now governed by certain persons claiming to be a Committee duly elected or appointed under an order made by the High Court, Calcutta, on the eighth day of April, 1907;

And whereas it appears to the Governor in Council that the said Committee are unable satisfactorily to manage the said Institution according to the intentions of its founders, and that portions of the property and funds of the Institution have been wasted away in litigation and by mismanagement, and that it is expedient that the Legislature should intervene in order to prevent further waste and mismanagement;

And whereas it appears to the Governor in Council that the objects of the founders of the said Institution would best be met by providing for the application of its property and funds, under the direction of the Government, to the education of Christian children of what is known as the Domiciled Community of Bengal;

And whereas the sanction of the Governor General has been obtained, under section 5 of the Indian Councils Act, 1892, to the passing of this Act;

55 & 56
Vict., c. 14.

It is hereby enacted as follows:—

Short title.

1. This Act may be called the Doveton Trust Act, 1913.

**Abolition of the
Doveton Institution.**

2. The "Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies" is hereby abolished.

The Doreton Trust Bill.

(Clauses 3-6.)

Vesting and appli-
cation of trust prop-
erty and funds.

3. All property, movable and immovable, which is vested in the Managing Committee of the said Institution, or in any other person, for the benefit of the said Institution or any-wise in trust therefor, and all sums standing to the credit of the said Institution, shall vest in the Accountant-General, Bengal, as bare trustee, and shall be applied —

- (a) to the discharge of all debts and liabilities properly payable out of, or chargeable upon, the property or funds of the said Institution, and
- (b) to making provision for the education of Christian children of what is known as the Domiciled Community of Bengal, by the granting of scholarships, by grants-in-aid to institutions intended for the education of such children, or in such other similar manner as to the Local Government may seem reasonable and proper.

Appointment of ad-
ministrator, and
transfer of powers to
him.

4. The Local Government shall, by notification in the *Calcutta Gazette*, appoint an officer of the Government (not being the Accountant-General, Bengal) by the name of his office to administer the property and sums referred to in section 3; and all powers in respect of such property and sums, which have hitherto been exercisable by the said Managing Committee or by any other person, may henceforth be exercised by such officer, subject to the control of the Local Government.

[Cf. Act VI of
1890, s. 3, b
(1, last part.)]Power to make
rules.

5. (1) The Local Government may make rules to carry out the purposes of this Act.

[Cf. Act VI
of 1890, s. 15
(c); Act V of
1912, s. 24
(1).]

(2) In particular, and without prejudice to the generality of the foregoing power, such rules may prescribe—

[Cf. Act V
of 1912, s. 24
(2).]

- (a) the method of applying property and funds held under this Act to the purpose specified in clause (b) of section 3;

[Cf. Act VI
of 1890, s. 8
(2), last part.]

- (b) the securities in which funds held under this Act and not required for immediate disbursement shall be invested;

[Cf. Act VI
of 1890, s. 4
(3).]

- (c) the accounts to be kept by the Accountant-General, Bengal, and by the officer appointed under section 4, and the mode in which such accounts are to be audited;

[Cf. Act VI
of 1890, s. 8
(2), first part,
and s. 13 (d).]

- (d) the periodical publication of a list of all property and funds held under this Act, and of an abstract of all accounts kept hereunder;

[Cf. Act VI
of 1890, s. 9.]

- (e) the fees (if any) to be paid to the Government in respect of property held and administered under this Act.

[Cf. Act VI
of 1890, s. 13
(b).]

(3) The power conferred by this section to make rules is subject to the condition of the rules being made after previous publication.

[Cf. Act VI
of 1890, s. 13
(c); Act V of
1912, s. 24 (3).]

(4) All rules made under this section shall be published in the *Calcutta Gazette*, and on such publication shall have effect as if enacted in this Act.

[Cf. Act V
of 1912, s. 24
(4).]

Indemnity

6. (1) No suit shall be instituted against the Government in respect of anything done or purporting to be done under this Act, or in respect of any alleged neglect or omission to perform any duty devolving on the Government under this Act, or in respect of the exercise of, or the failure to exercise, any power conferred by this Act on the Government.

[Cf. Act VI
of 1890, s. 14.]

(2) No suit shall be instituted against the Accountant-General, Bengal, or any officer appointed under section 4, except—

- (a) for divesting him of property on the ground of its not being subject to this Act, or

The Doreton Trust Bill.

(Clause 6.)

- (e) for making him chargeable with or accountable for the loss or misapplication of any property vested in or managed by him under this Act, or the income thereof, where the loss or misapplication has been occasioned by or through his wilful act, neglect or default.

3. Government reserves to itself the right to alter the quantity and class of opium to be offered for sale in each month. No reduction in the quantities to be sold, however, will be made without three months' previous notice.

4. The following are the conditions of sale. Government reserves to itself the right of altering all or any of these conditions after giving three months' previous notice, and power is reserved to vary the upset price referred to in condition (ii) at any time without such previous notice :—

(i) The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

(ii) The opium will be ordinarily offered for sale at an upset price of Rs. 1,200 per chest of uncertified opium and will be sold to the highest bidder above that price, except under the circumstances for which provision is made by clause (xiii) of these conditions of sale. The bids must advance by Rs. 5 at a time.

(iii) The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M., but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of Government, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or if the whole quantity advertised shall not be sold on the day appointed, the Government may dispose of the lots which remain on hand at a future sale.

(iv) Each lot shall contain five chests, excepting one lot at the December sale, which will consist of four chests of Patna opium and one chest of Benares opium.

(v) A promissory note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such promissory notes shall be redeemed on the part of the purchasers at this office by Bank of Bengal receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday,

DEPOSIT.

When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest.

On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 800 per chest.

On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.

And so on, Rs. 100 being added to the deposit for every bid additional to the extent of Rs. 400.

the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as Government shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

(vi) The said promissory notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

(vii) The promissory notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

(viii) No tender of money, Bank of Bengal receipts, or public securities, on account of opium upon which the proscribed deposit may not have been made before the proscribed time in clause (v) on the fifth day following the day of sale, will be afterwards accepted: Provided always that money so subsequently tendered may be taken in payment of the said promissory note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. (v) and No. (vi).

(ix) The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and, in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as Government shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages

that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

(x) Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

(xi) No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

(xii) The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India notes, Bank of Bengal receipts, or Government securities, a sum equal to the amount for which a promissory note would otherwise be taken under the fifth of these conditions.

(xiii) With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bond fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 1,200 specified in the second of these conditions.

(xiv) The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether fifteen lots, provided always that there remain a sufficient number of lots of the opium to complete the said fifteen.

(xv) In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

(5) The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Government of Bengal:—

No. 1—Certificate of the opium advertised for sale.

No. 2—Report of the examination of such opium.

(6) The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug, when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the office of the Government of Bengal.

(7) Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Government of Bengal. But, in accordance with established usage, under no circumstances will the Government entertain or recognize

any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

The Calcutta Gazette

WEDNESDAY, DECEMBER 24, 1913.

PART I B.

Orders by the Governor of Bengal in Council.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 2271M.—The 19th December 1913.—In exercise of the power conferred by section 27 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council is pleased to appoint Babu Radhika Lal Satiar to be a Commissioner of the Old Malda Municipality, in the district of Malda, *vice* Babu Rukmini Kanta Set, deceased.

No. 2273M.—The 19th December 1913.—The following draft of rules which has been framed by the Commissioners of the Bankura Municipality under section 241 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), and which the Governor in Council proposes to sanction under clause (2) of that section, is published for the information of persons likely to be affected thereby.

2. The draft rules will be taken into consideration on the 17th January 1914 and any objection or suggestion received by the undersigned through the Magistrate before that date will be duly considered.

Draft Rules framed by the Commissioners of the Bankura Municipality under section 241 of Bengal Act III of 1884.

The following rules apply to houses, not being huts:—

Drains.

1. Any house erected or re-erected after these rules come into force shall be provided with drains sufficient for its effective drainage, to the satisfaction of the Chairman.

2. The owner or occupier of any premises shall, provided that he first obtains the written permission of the Chairman and that he complies with the conditions prescribed by these rules, be entitled to connect his house-drain with the nearest Municipal drain.

3. No house-drain shall be so constructed as to pass beneath any floor or part of a building or in the case of a drain carrying foul water within 10 feet of any well or tank the water of which is used for bathing or drinking purposes.

4. Every house-drain must be open and ~~at least 3 inches~~ in breadth and must be laid upon a bed of good concrete and constructed with cut stone or brick masonry well plastered and protected with cement and must have a proper fall.

5. Every house-drain must be laid in a straight line as far as possible. The bends, if any, should not be at right angles but in easy curves.

6. The level of the ground-floor of every house shall be at least 2 feet higher than the top of the nearest Municipal drain:

Provided that, where the Municipal drain is more than 100 feet from the house, the ground-floor level shall be at least 2 feet higher than the level of the surrounding land.

Privies.

7. No privy situated in, or adjacent to, a house shall be placed at a distance of less than—

(a) 6 feet from any other building which is a public building, or

(b) 4 feet from any other building which is, or is likely to be, used as a dwelling place or as a place in which any person is, or is intended to be, employed in any manufacture, trade or business.

8. No privy shall be erected at a distance of less than 25 feet from any tank, or 12 feet from any well, the water of which is used for bathing or drinking purposes.

9. (1) A drain shall be provided for every privy.

(2) Such drain shall be constructed of some impervious material, and must connect the floor of the privy—

(a) with a drain communicating with a Municipal drain or sewer, or

(b) if permitted by the Chairman, with an impervious cesspool, the contents of which can be removed either by hand or by flow after filtration.

10. (1) The floor of every privy—

(a) shall be made of one of the following materials, to be selected by the owner of the privy, that is to say, of glazed tiles, artificial stone or cement, and

(b) must be in every part at a height of at least 6 inches above the level of the ground adjoining the privy.

(2) The floor of every privy shall have a fall or inclination of at least half an inch to the foot towards the drain prescribed by rule 9 and the platform of the privy shall have a similar fall towards the aperture.

11. The walls and the roof (if any) of every privy shall be made of such materials as may be approved by the Chairman:

Provided that the entire surface of the walls below the platform shall either be covered with cement or be made in the manner prescribed for the making of the floor in clause (a) of rule 10.

12. The platform of every privy shall either be plastered with cement or made in the manner prescribed for the making of the floor in clause (a) of rule 10.

13. Every privy situated in, or adjacent to, a house shall have an opening, at least 3 square feet in area, in one of the walls of the privy, as near the top of the wall as may be practicable and communicating directly with the open air.

14. Every privy shall be constructed in accordance with the following provisions:—

(a) The space beneath the platform of the privy must be of such dimensions as to admit of at least one moveable receptacle for sewage, of a capacity not exceeding 1 cubic foot, being placed and fitted beneath the platform in such manner and position as will effectually prevent the deposit, otherwise than in such receptacle of any sewage falling or thrown through the aperture of the platform.

(b) The privy shall be so constructed as to afford adequate access to the said space for the purposes of cleansing such space and of placing therein and removing therefrom a proper receptacle for sewage.

(c) The said receptacle must be water-tight.

(d) The door of the opening for the insertion and removal of such receptacle must be so as to completely cover the opening.

15. All powers of the Chairman under these rules can be delegated by him to the Vice-Chairman.

No. 2295 M.—The 20th December 1913.—The following draft order which the Governor in Council proposes to make in exercise of the powers conferred by section 221 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), is published for the information of persons likely to be affected thereby.

Howrah.
2. The draft will be taken into consideration on the 1st February 1914, and any objection or suggestion which may be received by the undersigned through the District Magistrate and the Divisional Commissioner before that date will be duly considered:—

Draft order.

In exercise of the power conferred by section 221 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), and upon the application of the Commissioners of the Bully Municipality, in the district of Howrah, made in pursuance of a resolution passed at a meeting specially convened to consider the question, the Governor in Council is pleased to extend all provisions of Part X of that Act to the said Municipality.

No. 2312 M.—The 22nd December 1913.—In exercise of the power conferred by section 351 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council is pleased to confirm the following by-law framed by the Commissioners of the Nawabganj Municipality in the district of Malda.

Malda.
No person shall affix or cause to be affixed to any building, owned or occupied by him, any gutter, spout or other thing intended for the conveyance and discharge of water, or shall leave in any such building any opening for the discharge of water, in such a way that the water discharged therefrom is thrown or falls upon a road or into any drain in or near a road, except through a downpipe or other suitable contrivance reaching to the level of the road or drain.

The penalty for the infringement of this by-law shall be a fine not exceeding Rs. 10, and a further fine not exceeding Rs. 2 for each day after written notice of the offence from the Commissioners.

No. 2265 L.S.G.—The 19th December 1913.—In exercise of the power conferred on him by section 60 of the Bengal Local Self-Government Act, 1885 (Bengal Act III of 1885), the Governor in Council is pleased to extend the provisions of section 99 of the said Act, as amended by Bengal Act V of 1908, to the District Boards of the following districts:—

Burdwan.
Bankura.
Birbhum.
Hooghly.

Howrah.
Midnapore.
24-Parganas.
Jessore.

Khulna.
Nadia.
Murshidabad.

2. This cancels notification dated 18th February 1890 so far as the above mentioned District Boards are concerned.

No. 2300 L.S.G.—The 23rd December 1913.—In exercise of the power conferred by section 29A (2) of the Bengal Local Self-Government Act, III of 1885, the Governor in Council is pleased to re-appoint the District Magistrate of 24-Parganas to be the Chairman of the District Board of 24-Parganas.

24-Parganas.

No. 2301 L.S.G.—The 23rd December 1913.—In exercise of the power conferred by section 29A (2) of the Bengal Local Self-Government Act, III of 1885, the Governor in Council is pleased to re-appoint the District Magistrate of Khulna to be the Chairman of the District Board of Khulna.

No. 2302 L.S.G.—The 23rd December 1913.—In exercise of the power conferred by section 29A (2) of the Bengal Local Self-Government Act, III of 1885, the Governor in Council is pleased to re-appoint the District Magistrate of Murshidabad to be the Chairman of the District Board of Murshidabad.

SIBPUR, the 26th April 1912.

NOTICE.

HER EXCELLENCY LADY HARDINGE of Penshurst has decided to give, out of the funds which have been collected for a Medical College for Women at Delhi, a certain number of scholarships for lady students who may wish to join that institution, when it is opened.

2. It is proposed to allot 18 scholarships of Rs. 30 a month each, tenable for two years. Four scholarships are allotted for students who are residents of the Presidency of Bengal.

3. The object of the scholarships being to enable ladies to enter the College at Delhi and take up a professional course there, the award will be made on the result of the Matriculation, School Final or School-leaving Certificate examination, the object of this procedure being to enable such students as have already enrolled themselves in colleges or have just completed their school course to pass the Intermediate examination of a University or an examination recognized as equivalent thereto in 1915, and thus to render themselves eligible so far as the examination qualifications are concerned, and to enter the college at Delhi at its opening.

4. Candidates for these scholarships must be statutory natives of India. They must also guarantee that they will study, for two years in a college affiliated to the local University, the course leading up to the Intermediate examination, or an examination recognized for this purpose as equivalent thereto, such special subjects as may be prescribed by that University as qualifying for entrance upon a professional course of medical study being included in the course. They must also undertake that on the completion of these two years they will seek admission to the Medical College to be established at Delhi, and continue their studies up to the examinations for the Medical degree for which that College will prepare students. Should the College be not completed by the close of 1915, suitable arrangements will be made for the instruction of the students elsewhere, until the College is ready to receive them.

5. The question of providing scholarships tenable during the period of study in Delhi is under consideration by the Governing Body of the College. It is hoped to make an announcement on this subject within the next six months. The continuance of the scholarships and the award of any further scholarships will be contingent on the progress of the scholars and the receipt by the Local Government of good reports upon them.

6. Scholarships will be awarded to such lady students as the Local Government may, on the results of the examination which closes the secondary school course, regard as most likely to profit by the facilities which the proposed College at Delhi will offer. Applications in the enclosed form, which must be submitted through the head of the College or head of a high school of which the applicant is a student, will be received in the office of the Director of Public Instruction, Bengal, up to the 15th January 1914. The scholarships will run for two years from the date on which each particular scholarship-holder enters on her preliminary course of study. In the case of a lady student who has already entered upon a course of study, the successful completion of which would qualify her for admission to the College, a scholarship may be awarded with retrospective effect from the date on which she entered upon the course or any date subsequent thereto.

W. W. HORNELL,

Director of Public Instruction, Bengal.

1. Name of candidate
2. Date of birth (the year, and the actual date of the month, if possible, must be stated).

3. Nationality—

In the case of a pure European candidate the application must be accompanied by a duly authenticated statement to the effect that the applicant is a native of India within the meaning of the Statute, viz., that she was born of parents habitually resident in India and not established there for temporary purposes only.

4. Caste

5. Name of father or guardian ...

In the case of European or Anglo-Indian candidates the names of both parents should be given and it should be stated whether they are living or not. In the event of both parents being dead, the name of the guardian must be given and his or her relationship to the applicant must be stated.

6. Place of residence

7. Education

The names of the various schools or colleges at which the applicant has studied should be stated with dates in each case. The public examinations passed should be stated, as also any special distinctions gained.

8. Whether the applicant made any special study of any branch of science.

9. Whether the candidate, or her parent or guardian, in case she is still a minor, is prepared to execute a bond to refund the scholarship money, if she fails to abide by the conditions of award of these scholarships as detailed in paragraph 4 of the rules.

10. Names of relatives of position, and the precise relationship each bears to the candidate.

11. Names of two persons of position to whom reference regarding the candidate can be made.

12. Remarks of the Principal of the College at which the candidate is studying at present.
Head of the school at which she is studied.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

Nrisinhachandra Mukhopadhyay	Matriculation History of India in Bengali.

Administration and Progress of India under British Rule.

N. N. Ghose	... England's Work in India.
-------------	------------------------------

GEOGRAPHY.

The following books are recommended as indicating the methods of study as well as the standard of knowledge required:—

A. J. Herbertson	... The Oxford Geographies, Vol. II.
------------------	--------------------------------------

The World with fuller treatment of India (Longman's Geographical Series for India, Book II).

J. F. Unstead	... The Practical Geography, Parts I and II.
---------------	--

The following books are recommended for the use of teachers:—

Blanford	... The Rudiments of Physical Geography for the use of Indian Schools.
Patterson	... Geography of India, Parts I and II.

The following book is recommended for the use of teachers in connection with the teaching of "Sand Modelling" in the lower classes of schools:—

A. E. Frye	... The Child and Nature.
------------	---------------------------

Every school that intends to undertake instruction in Geography for the Matriculation Examination is required to possess the apparatus mentioned in the following list:—

I.—The total cost need not exceed Rs. 65—

1. A measuring tape.
2. A magnetic compass.
3. Squared paper and tracing paper.
4. Clay, dry sand, paper pulp for modelling.
5. A globe, not less than 14 inches in diameter, with writing surface, and with lines of latitude and longitude, and outlines only of the landmasses, marked upon it.
6. A map of the school locality on a scale of 4" or 6"=1 mile.
7. A map of the district in which the school is situated on the scale 1"=1 mile.

8. A coloured map of the Province.
9. A coloured political map of India.
10. A physical map of India.
11. A relief map of India.
12. A map of the world on Mollweide's equal area projection and a map of Asia.

It is essential that the students should be provided with atlases, or with the necessary hand-maps. Maps for school work should not contain too much detail, or be crowded with names.

II.—The following additional equipment is recommended when it can be provided, but that lack of it is not to be considered as a bar to the recognition of the school in Geography :—

1. A thermometer.
2. A mercury barometer.
3. A rain-gauge.
4. A small collection of typical rocks, in particular those of the Province and of India.
5. A small museum of typical products.
6. A good standard atlas.
7. Geographical pictures.

* The attention of teachers is requested to the raised maps of Bengal and Eastern Bengal and Assam made of paper pulp prepared by Babu Kailas Chandra Datta, Head Pandit, Habiganj Government Girls' School, Sylhet, and sold for Rs. 7 and Rs. 5, respectively.

(2) Globes of all kinds are made by George Philip and Son, London, W. and A. K. Johnston, London, and Messrs. Ruddiman Johnston, London.

Small hand Globes of German make can be obtained through the Calcutta School Book Society for about a rupee each.

(3) The "Comparative" series of large wall maps of the continents published by George Philip and Son is good and up to date; so also are the Orographical wall maps published by Edward Stanford. Messrs. Ruddiman Johnston publish a series of smaller wall maps which includes maps of India illustrating various distributions.

Messrs. Nelson's wall atlases are good. Mr. S. B. Chatterjee publishes District Maps; also ordinary and relief maps of the Province.

Babu L. M. Basu, the drawing master of the Dacca Collegiate School, has published good relief maps of Eastern Bengal and Assam and of India.

The Vidal-Lablache French wall maps on strong card board, named on one side, and the same map without names on the reverse, published by Armand Colin, Paris, are good and cheap. They measure 46 inches by 39 inches and can be delivered in Calcutta for Rs. 4-14 each.

(4) The hand maps, coloured to indicate relief, published by the Diagram Company, West Barnes Lane, New Malden Surrey, at one penny each, are the best of their kind.

The uncoloured half-penny maps, showing river systems and a few towns, published by the same Company, are excellent for class use.

The Autograph hand maps, with hill shading in brown, published by Edward Stanford, London, at one penny each, are very good, and are larger than the Diagram Company's hand maps. The 15 inches map of the world on Mollweide's equal area projection is specially to be commended.

(5) Wall pictures of considerable artistic merit are published by Messrs. Edward Arnold of Leeds, Messrs. Hachette of Paris, and Messrs. Hölzel of Vienna and Messrs. Longmans, Green & Co. They cost, delivered in India, from two to three rupees each.

Map lantern slides, and view slides especially prepared for geography teaching, are sold by the Diagram Company for two or three shillings each. Mr. Bartington Smith of Darjeeling also sell good picture slides of the Himalayas at Rs. 15 per dozen.

ELEMENTARY MECHANICS.

The following book is recommended :—

Sir Philip Magnus ... Elementary Mechanics (Longmans, 1903).

The following list of apparatus is prescribed as indicating the approximate requirements of a recognised High School seeking to teach Elementary Mechanics for the Matriculation Examination :—

Plumb-line and level.
 Simple Lever (including brass slotted weights).
 Roman Steelyard.
 Lecture apparatus for experiments on moments.
 George's New Atwood's Machine.
 Stop-watch.
 Glazebrooke's apparatus (to demonstrate movement of a body).
 Hick's Ballistic Balance.
 Compound Wheel and Axle.
 4 Single brass Pulleys.
 2 " " "
 2 Triple " "
 Weston Differential Pulley Blocks ($\frac{1}{4}$ ton).
 16 feet of chain at 6d. per foot.
 Inclined Plane.
 Parallelogram of Forces apparatus.
 Wall Crane.
 Becker's New Physical Balance.
 Set of Gramme Weights (200 grams to 1 mgr.).
 2 Composition-Ivory Balls.

NOTE.—The above list is not exhaustive, and much of it might be replaced by simpler forms that could probably be made far more cheaply by any clever mistry under proper supervision. In most cases, however, it will probably be found advantageous to buy such a set as indicated in the list specially for demonstration purposes, and subsequently to develop simplified duplicates, illustrating the same principles, which the boys should be given opportunity actually to experiment with on their own individual accounts or working in pairs.

Farrer, J. B.	... Practical Introduction to the Study of Botany (London, 1905).
Bailey, L. H.	... Botany, an Elementary Text for Schools (New York, 1901).
Darwin, F.	... Elements of Botany (Cambridge, latest edition).
Mitra, H. N.	... Structural Botany, Part I, Morphology (S. K. Lahiri & Co.).
Fyson, P. F.	... A Botany for India.

Candidates who take up Botany will be required to possess a special knowledge of the following Natural Orders of plants:—

(1) Cruciferae.	(7) Compositae.
(2) Malvaceae.	(8) Solanaceae.
(3) Rhamnaceae or Sapin- daceae.	(9) Acanthaceae.
(4) Leguminosae.	(10) Amarantaceae.
(5) Cucurbitaceae.	(11) Scitamineae.
(6) Rubiaceae.	(12) Gramineae.

At the Intermediate Examinations in Arts and Science a study of the outline of the life history of the following "Selected plants" is required to illustrate the gradual ascent in complexity of structure and reproductive cycle from the lowest fungi and algae to the phanerogams:—

(1) Yeast.	(5) A Fern.
(2) Mucor or Euroteum.	(6) A Conifer.
(3) Spirogyra.	(7) A Monocotyledon.
(4) A Moss.	(8) A Dicotyledon.

SYLLABUS IN EXPERIMENTAL PHYSIOLOGY.

Pass Course.

The induction coil ; single shocks ; short circuiting key ; effect of single shocks on the tongue ; break-shock is stronger than the make-shock. Helmholtz's Modification ; Neef's Hammer.

Pithing a frog ; nerve-muscle preparation. Mechanical, chemical, thermal and electrical stimulation of muscle and nerve.

The Graphic method : Simple lever ; crank lever (myograph) ; moist chamber, minimal and maximal excitation with single induction shocks (make and break). Stimulation by constant current : contraction of muscle only at make and break.

The muscle curve:—Single contraction of a frog's muscle: the latent period, the period of contraction and the period of relaxation. Time-tracing by tuning-fork. Method of after-loading. The influence of temperature and of load on muscular contraction. The work performed by a muscle during a twitch. Elasticity and extensibility of muscle. Summation of muscular contraction: tetanus. Fatigue of muscle. Thickening of a muscle on contraction. Bernard's curare experiment. Stimulation of a motor nerve; unequal excitability (greater nearer the centre of a motor nerve); excitability of flexor and extensor nerves. Velocity of nerve-impulse (myographic method). Electro-Physiology:—Galvani's experiment of contraction with metals; Galvani's experiment of contraction without metals. The Frog's heart:—Beating of the heart; effect of heat and cold (heart *in situ*); section of the heart; effect of heat and cold on excised heart. Stannius' experiment. Graphic record of the beat of the heart (suspension method and also direct registration with heart-lever). Pulse—Sphygmographic tracing. Blood-pressure in man: Sphygmometer and Sphygmomanometer. Reflex action (simple experiments on a pithed frog). Vision:—Accommodation; Scheiner's experiment; near and far point. Parkinge-Sanson's images: Phakoscope; Blind spot; yellow spot; Colour vision; Complementary colours.

HONOURS COURSE.

Additional Experiments—

The Induction Coil—Break extra-current of Faraday. The Rheonome: Effect of sudden variation of current. Isotonic and Isometric contraction. Influence of veratrine on muscular contraction. Indefatigability of nerve. Excitation of muscle by constant current: Polar excitation of a muscle. Electrotonus. Electrotonic changes in excitability and conductivity of a nerve. Kuhne's experiment of contraction without metals. Examination of currents in muscle, nerve and heart by means of the reflecting galvanometer. Frog's heart—Minimal stimulus causes maximal contraction. "Staircase effect." Single contraction of the ventricle. Tetanisation. Refractory period. Stimulation of the vagus. Action of drugs (Muscarin and Atropin) on the heart. Voice and Speech: Laryngoscope. Vision: Ophthalmoscope; Perimeter.

GEOLOGY.

No text-books are prescribed or recommended. The subject is to be studied with the help of the Syllabus prescribed in the Regulations.

EXPERIMENTAL PSYCHOLOGY.

The subject is to be studied as defined by the Syllabus. Students are recommended to use one or more of the following books or select portions thereof, with special reference to the course laid down in the Syllabus:—

Pass Course.

I.—General Psychology—

Hoffding	...	Outlines of Psychology.
Wundt	...	Human and Animal Psychology.
William James	...	Text-book of Psychology.
J. Dunlop Leckley	...	The Nervous System (Longman & Co.).

Preparatory Reading—Students are advised to read **Croom Robertson's Elements of Psychology** before joining the regular class.

II.—Experimental Psychology—

Titchener ...	...	Text-book of Psychology.
Külpe ...	...	Outlines of Psychology.
Scripture ...	...	New Psychology.

Laboratory Course—Titchener's *Experimental Psychology*, Vol. I, Part I. and Vol. II, Part I.

Honours Course.

I.—General Psychology—Same as in the Pass Course.

II.—Physiological and Comparative Psychology.

Wundt ...	...	Outlines of Physiological Psychology (Vol. I).
Ladd ...	...	Elements of Physiological Psychology.
Romanes ...	...	Mental Evolution in Man.
Romanes ...	...	Mental Evolution in Animals.
Lloyd Morgan	...	Comparative Psychology.
Herbert Spencer	...	Principles of Psychology.
M. Greenwood (Jr.)	...	Physiology of the Sense Organs.

III.—Experimental Psychology—

In addition to the books recommended for the Pass Course, the following:—

Ziehen	...	Introduction to Physiological Psychology.
Ladd	...	Outlines of Physiological Psychology. (Latest edition.)

A.B. No text-books are recommended for the guidance of teachers.

Candidates for the M.A. or M.Sc. Examination are required to consult original papers in the Chemical Society's Journals and other Scientific periodicals, and also to consult the Annual Reports issued by the Chemical Society on the "Progress of Chemistry," in connection with the especial subject taken up by them.

GEOLOGY.

No text-books are prescribed or recommended. The subject is to be studied in accordance with the syllabus prescribed in the Regulations.

PHYSIOLOGY.

(No text-books are prescribed.)

In section 7, Chapter XXXVII of the Regulations, in first paragraph of the syllabus in Physiology, for the M.Sc. Examination the expression "a particular branch" be interpreted to mean one of the following branches:—

1. Circulation and Respiration.
2. Alimentation and Metabolism.
3. Physiology of the Central Nervous System and the Organs of Sense.
4. Physiology of the Nervous System and the Muscular System.
5. Histology and Reproduction.

The four theoretical papers in Physiology be distributed so as to cover the following subjects:—

Paper I.—Circulation, Respiration, Alimentation, Metabolism and Reproduction (compulsory to all candidates).

Paper II.—Nervous System and Muscular System. (Candidates offering a piece of research work falling under the head of "Organs of Sense" will be exempted from this paper.)

Paper III.—Organs of Sense. (Candidates offering a piece of research work falling under any of the following heads—Circulation, Respiration, Alimentation, Metabolism, Reproduction, Nervous System, Muscular System and Histology—will be exempted from this paper.)

Paper IV.—The branch of Physiology professed by the candidate for special study.

The Practical Examination will include—

Paper I.—Experimental Physiology. (Candidates offering research work falling under the head of Histology or Chemical Physiology will be exempted from this paper.)

Paper II.—Histology. (Candidates offering research work falling under the head of Chemical Physiology will be exempted from this paper.)

Paper III.—Chemical Physiology.

Paper IV.—Candidates' special subject.

BOTANY.

No text-books are prescribed. The subject is to be read in accordance with the prescribed Syllabus.

ZOOLOGY AND COMPARATIVE ANATOMY.

THE INDIAN LAW REPORTS.

Published in **FOUR SERIES**, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta, or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, v...

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depot, Calcutta, or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

Bills introduced into the Council of the Governor General for making
Laws and Regulations, or published under Rule 23.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Delhi, the 12th December 1913.

No. 71.—The Governor General has been pleased, under Rule 23 of the Rules for the conduct of the Legislative Business of the Council of the Governor General, to order the publication in the Gazette of India and in the local gazettes in English of the following Bill, together with the Statement of Objects and Reasons relating thereto, and the Bill and Statement of Objects and Reasons are accordingly hereby published for general information.

No. 13 OF 1913.

A Bill further to amend the Negotiable Instruments Act, 1881.

XXVI
1881. WHEREAS it is expedient further to amend the Negotiable Instruments Act, 1881, so as to remove doubts as to the validity of the making and endorsing of negotiable instruments in certain forms; It is hereby enacted as follows:—

1. This Act may be called the Negotiable Instruments (Amendment) Act, 1913.
Short title.

XXVI
1881. 2. In section 13 of the Negotiable Instruments Act, 1881 (hereinafter called the said Act), after the figures "13" insert the
Amendment of section 13, Act XXVI of 1881.

figure and signs "(1)", and to the same section add the following sub-section, namely:—

"(2) A negotiable instrument may be made payable to two or more payees jointly or it may be made payable in the alternative to one of two, or one or some several payees."

3. In section 16 of the said Act, after the figures "16" insert the
Amendment of section 16, Act XXVI of 1881. figure and signs "(1)" and to the same section add the following sub-section, namely:—

"(2) The provisions of this Act relating to a payee shall apply with the necessary modifications to an indorsee."

STATEMENT OF OBJECTS AND REASONS.

It has long been the practice in this country to endorse negotiable instruments, particularly Government promissory notes, in such a way as to make them payable to two or more payees jointly, or in the alternative to one or some of several payees. Doubts have arisen as to the legal validity of such endorsements, and the present Bill is designed to place their validity beyond question. The amending Bill will affect all three forms of negotiable instruments, *vis.*, cheques, promissory notes, and bills of exchange, and will result in a close approximation of the Indian to the English law on the subject.

Obituary :

The death of Sir W. A. Dring, K.C.I.E., who was long a member of the Garden, was a great loss to the Committee, who at their meeting on 30th November 1912 resolved that an expression of the regret of the Committee at his sad and untimely death be recorded and a copy sent to Lady Dring with a message of condolence and sympathy.

2. STAFF AND ESTABLISHMENT.

During the absence of Mr. B. Basu on deputation to England, Mr. Surendra Krishna Mitra, Lecturer, Bengal Veterinary College, was placed in charge of the Garden from 1st April to 3rd August 1912. Babu Somadev Ganguli acted as Assistant Superintendent throughout the year and Babu Panchanan Mukherji was appointed to the vacant post of Gate Clerk.

The following is a list of the superior staff of the Garden at the end of 1912-13:—

Superintendent :

Mr. Bijay Krishna Basu, G.B.V.C., C.M.Z.S.

Assistant Superintendent :

Babu Somadev Ganguli.

Store-keeper and Typist :

Babu Jugal Kishore Roy.

Overseer :

Babu Niranjan Mukherji.

Gate Clerk :

Babu Panchanan Mukherji.

The following is a list of the menial staff of the Garden at the end of 1912-13:—

1 Head-keeper.	1 Cook.
20 Keepers.	3 Sweepers.
10 Durwans.	1 Chaprasi.
3 Bhistis.	2 Cartmen.
1 Carpenter.	1 Syce.
1 Scytheman.	

Besides these, there were a number of labourers engaged temporarily by the Garden.

3. BUILDINGS.

During the past year the most important improvements comprised the construction of the Rodent House, the remodelling of the Murshidabad House, the conversion of the old Rodent House into a Refreshment pavilion, the construction of the kitchen and the construction of lavatories for ladies and gentlemen, the renewal of the wire-netting of the Surnomoyi House, the conversion of the Skating Rink into a lawn, the conversion of the old Refreshment pavilion into an Insect House.

- (1) *The construction of the Rodent House.*—The rodents were accommodated in small wire cages in a dark and unattractive house and the animals had no outdoor runs. To afford them greater facilities for movement and exercise the present house was built. It is a circular brick-built house very similar to the new Monkey House with a large open-air enclosure and is divided into 16 compartments. A number of trees were planted to afford the animals facilities for indulging in their natural habit of climbing trees.

(2) *The remodelling of the Murshidabad House.*—

This is another great improvement effected during the year. The small outer cages were demolished and big open-air aviaries were substituted instead. Advantage was also taken to improve the site by constructing ornamental rocks and rivulets which are fed by pipe-water. Mango, papaya and plantain trees are planted inside, and the Birds of Paradise who are the inmates of the house enjoy themselves in their natural surroundings.

(3) *Refreshment Hall.*—The removal of the rodents to the new Rodent House afforded the Committee the opportunity of improving the site and converting it into a Refreshment Hall. The whole structure was remodelled and a verandah was built on the western side facing the lawn. The floor was laid with white marble and the whole place is greatly improved and converted into an excellent Refreshment Hall. A kitchen was also built and a cooking range provided for, and the increased demands of the public will be served by the new accommodation.

The agreement with Messrs. Wallace having ended on 31st December 1912, Messrs. Peliti were given a contract for the catering at the Garden.

(4) *Lavatories for ladies and gentlemen.*—The arrangement was primitive, and the want of proper lavatory accommodation for the visitors was long keenly felt, but the work could not be taken in hand for want of funds.

The present retiring rooms for ladies and gentlemen have been built on approved lines and meet the requirements of the increasing number of visitors.

(5) *Insect House.*—The old Refreshment pavilion which had been lying vacant on the transfer of the Refreshment room to the new building was thoroughly overhauled and converted into an Insect House. The stone floor was relaid and the partition removed and the woodwork repainted. Show-cases were constructed for exhibiting various kinds of insects.

(6) The large plot of land occupied by the old Skating Rink was unsightly and useless, and the Rink was gradually falling into a state of disrepair and decay. It was

suggested that the site might be utilised for some better purpose. The Rink was accordingly dismantled and the site converted into a lawn.

Among minor works that were undertaken during the year may be mentioned the construction of a new road leading to the Hippo enclosure from the Burdwan House, the renewing of the wire-netting of the outer cages of the Sarnomoyi House and a thorough repair of the inside wire-netting of the same house, the construction of windlasses in the Small Carnivora House, teakwood flooring of the Abdul Ghany House.

As all available funds were spent in original construction, the annual repairs could not be carried out on an extensive scale. Only those houses which needed repairs very badly were attended to.

4. FINANCE.

The financial condition of the Garden is satisfactory. The receipts from visitors steadily increased and amounted to Rs. 50,499 as against Rs. 48,496-11 of the previous year, thus showing an increase of Rs. 2,002-5.

The following is a comparative statement of receipts from visitors:—

Year.	Receipts.	
	Rs.	A.
1910-11	42,018	12
1911-12	48,496	11
1912-13	50,499	0

The amounts of income and expenditure are summarised in Appendix A.

5. VISITORS.

The total number of paying visitors to the Garden during the year amounted to 656,402, showing an increase of 27,251.

Comparative table of visitors during the last three years.

Year.	Visitors.	
1910-11	537,122	
1911-12	629,151	
1912-13	656,402	

In addition, a large number of children under four years of age and school children attended by their teachers were admitted free. On the day of the Fancy Fair about 6,000 people entered the Garden. Besides these, 62,222 persons visited the Garden on the free days. A list of free days with the number of visitors is given in Appendix C.

S. DEPUTATION OF THE SUPERINTENDENT TO EUROPE.

In April 1912 the Superintendent of the Garden, Mr. B. Basu, was deputed by the Committee in connection with the transport of the King's collection of Nepal animals to study the management of the Zoological Gardens in England and Europe.

CONCLUSION.

The thanks of the Committee are due to the ladies and gentlemen who have added to the collection of the Garden by their donations, a list of which is given in Appendix D. Thanks are also due to those who kindly offered to present animals to the Garden, but whose offers could not be accepted, either because the particular species of animals was already sufficiently well represented, or owing to the want of accommodation.

The Committee also desire to express their sincere thanks to the Officers Commanding 40th Pathans for allowing their band to play on Sunday evenings without charge.

The thanks of the Committee are also due to many Railway and Steamer Companies for conveying animals belonging to the Garden free of charge and in particular to the East Indian Railway Company, Eastern Bengal State Railway, Bengal-Nagpur Railway Company, Oudh and Rohilkhand Railway, Bengal and North-Western Railway Company, British India Steam Navigation Company, India General Navigation and Railway Companies and Rivers Steam Navigation Company.

The Committee acknowledge with thanks the assistance of Dr. N. Annandale, B.A., D.Sc., and of F. H. Gravely, Esq., in organising the Insect House.

F. HAROLD BROWN,
Honorary Secretary.

F. W. DUKE,
President.

SUPERINTENDENT'S REPORT.

I HAVE the honour to submit the following report on the existing condition and the progress of the menagerie of the Garden.

The following comparative table shows how the various collections of animals in the Garden stood during the last four years:—

Year.	Mammals.	Birds.	Reptiles.
1909-10	... 589	1,137	247
1910-11	... 599	1,342	259
1911-12	... 654	1,612	127
1912-13	... 841*	1,188*	150

* The apparent reduction in the number of animals is due to the rabbits, guinea-pigs, common rats, common doves, common mynas, coles, etc., having been excluded from the list by order of the Committee of Management of the Garden.

ACQUISITIONS.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 29th December 1913.

Summary.—During the week under review no rain fell throughout the province except some light showers in parts of Darjeeling and Jalpaiguri. Harvesting of winter rice is continuing briskly and is nearing completion. The outturn is reported to be fairly good. The prospects of *rabi* crops are hopeful. Cattle-disease is reported from three districts only. The average price of common rice has fallen by about 0.42 per cent. as compared with that of the previous week.
